FORWARD-LOOKING STATEMENTS

Certain statements contained in this Preliminary Placement Document that are not statements of historical fact constitute “forward-looking statements”. Investors can generally identify forward-looking statements by terminology such as “aim”, “anticipate”, “believe”, “continue”, “can”, “could”, “estimate”, “expect”, “intend”, “may”, “objective”, “plan”, “potential”, “project”, “pursue”, “shall”, “should”, “will”, “would”, or other words or phrases of similar import. Similarly, statements that describe our strategies, objectives, plans or goals are also forward-looking statements. However, these are not the exclusive means of identifying forward-looking statements.

The forward-looking statements appear in a number of places throughout this Preliminary Placement Document and include statements regarding the intentions, beliefs or current expectations of our Company concerning, amongst other things, the expected results of operations, financial condition, liquidity, prospects, growth, strategies and dividend policy of our Company and the industry in which we operate. In addition, even if the result of operations, financial conditions, liquidity and dividend policy of our Company, and the development of the industry in which we operate, are consistent with the forward-looking statements contained in this Preliminary Placement Document, those results or developments may not be indicative of results or developments in subsequent periods.

All statements regarding our Company’s expected financial conditions, results of operations, business plans and prospects are forward-looking statements. These forward-looking statements include statements as to our Company’s business strategy, planned projects, revenue and profitability (including, without limitation, any financial or operating projections or forecasts), new business and other matters discussed in this Preliminary Placement Document that are not historical facts. These forward-looking statements contained in this Preliminary Placement Document (whether made by us or any third party), are predictions and involve known and unknown risks, uncertainties, assumptions and other factors that may cause the actual results, performance or achievements of our Company to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements or other projections. All forward-looking statements are subject to risks, uncertainties and assumptions about our Company that could cause actual results to differ materially from those contemplated by the relevant forward-looking statement. Important factors that could cause the actual results, performances and achievements of our Company to be materially different from any of the forward-looking statements include, among others:

- Some or all of our ongoing and planned projects may not be completed by their expected completion dates or at all. Such delays may adversely affect our business, results of our operations and financial condition.
- Our real estate development activities are subject to certain concentration risks, which may have an adverse effect on our business, results of operations, cash flows and financial condition.
- While acquiring land parcels or other properties, we may not be aware of legal uncertainties and defects, which may have an adverse impact on our ability to develop and market projects on such lands.
- Our inability to effectively manage our growth and expansion or to successfully implement our business plans and growth strategies, including in relation to the setting up of data centres may have a significant impact on our implementation of this strategy.
- We have entered into and may enter into joint ventures, development agreements and similar arrangements with third parties in the future, which do not convey any interest in the immovable property to us and only the development right will be transferred to us. Investments through development agreements involve risks, including the possibility that our development partners may fail to meet their obligations under the development agreement, causing the whole project to suffer.
- Unsold inventory in our projects if not sold in a timely manner adversely affects our business, results of operations and financial condition.
- We depend significantly on our residential development business, the success of which is dependent on our ability to anticipate and respond to consumer requirements.
- Some of our projects are in the preliminary stages of planning and require us to obtain approvals or permits, and we are required to fulfil certain conditions precedent in respect of some of them. We also

do not currently have the requisite approvals to develop our land reserves. Any failure to obtain the necessary approvals in time or at all may result in material delays to our ongoing and planned projects, or prejudice our ability to develop our land reserves, which may prejudice our growth strategy and could have an adverse impact on our results of operation and projects.

- Increases in prices of, or shortages of, or delay or disruption in supply of labour and key building materials could affect our estimated construction cost and timelines resulting in cost overruns or less profit.
- Our business is capital intensive and requires significant expenditure for development and is therefore heavily dependent on the availability of real estate financing, which may not be available on terms acceptable to us in a timely manner or at all.

Additional factors that could cause actual results, performance or achievements of our Company to differ materially include, but are not limited to, those discussed under the sections titled “*Risk Factors*”, “*Industry Overview*”, “*Our Business*” and “*Management’s Discussion and Analysis of Financial Condition and Results of Operations*” on pages 45, 111, 159 and 86, respectively.

By their nature, market risk disclosures are only estimates and could be materially different from what actually occurs in the future. As a result, any future gains, losses or impact on net income and net income could materially differ from those that have been estimated, expressed or implied by such forward-looking statements or other projections. The forward-looking statements contained in this Preliminary Placement Document are based on the beliefs of the management, as well as the assumptions made by, and information currently available to, the management of our Company. Although we believe that the expectations reflected in such forward-looking statements are reasonable at this time, we cannot assure investors that such expectations will prove to be correct. Given these uncertainties, investors are cautioned not to place undue reliance on such forward-looking statements. In any event, these statements speak only as on the date of this Preliminary Placement Document or the respective dates indicated in this Preliminary Placement Document, and neither we nor the BRLM undertake any obligation to update or revise any of them, whether as a result of new information, future events, change in assumptions or changes in factors affecting these forward-looking statements or otherwise. If any of these risks and uncertainties materialize, or if any of our Company’s underlying assumptions prove to be incorrect, the actual results of operations or financial condition of our Company could differ materially from that described herein as anticipated, believed, estimated or expected. All subsequent forward-looking statements attributable to us are expressly qualified in their entirety by reference to these cautionary statements. In accordance with SEBI and Stock Exchange requirements, our Company and the BRLM will ensure that the eligible equity shareholders are informed of material developments until the time of the grant of listing and trading permissions by the Stock Exchanges.

ENFORCEMENT OF CIVIL LIABILITIES

Our Company is a public limited liability company incorporated under the laws of India. All our Directors, the Key Managerial Personnel and the Senior Management are residents of India and all or a substantial portion of the assets of our Company and such persons are located in India. As a result, it may be difficult or may not be possible for investors outside India to effect service of process upon our Company or such persons in India, or to enforce judgments obtained against such parties outside India predicated upon civil liabilities of our Company or such directors and executive officers under laws other than Indian laws, including judgments predicated upon the civil liability provisions of the federal securities laws of the United States.

Recognition and enforcement of foreign judgments is provided for under Section 13 and Section 44A of the Code of Civil Procedure, 1908, as amended (the “**Civil Procedure Code**”), on a statutory basis. Section 13 of the Civil Procedure Code provides that a foreign judgment shall be conclusive regarding any matter directly adjudicated upon between the same parties or parties litigating under the same title, except: (i) where the judgment has not been pronounced by a court of competent jurisdiction; (ii) where the judgment has not been given on the merits of the case; (iii) where it appears on the face of the proceedings that the judgment is founded on an incorrect view of international law or a refusal to recognise the law of India in cases in which such law is applicable; (iv) where the proceedings in which the judgment was obtained were opposed to natural justice; (v) where the judgment has been obtained by fraud; or (vi) where the judgment sustains a claim founded on a breach of any law then in force in India. India is not a party to any multilateral international treaty in relation to the recognition or enforcement of foreign judgments. However, Section 44A of the Civil Procedure Code provides that a foreign judgment rendered by a superior court (within the meaning of that section) in any jurisdiction outside India which the Government has by notification declared to be a reciprocating territory, may be enforced in India by proceedings in execution as if the judgment had been rendered by a competent court in India. Under Section 14 of the Civil Procedure Code, a court in India will, upon the production of any document purporting to be a certified copy of a foreign judgment, presume that the foreign judgment was pronounced by a court of competent jurisdiction, unless the contrary appears on record but such presumption may be displaced by proving want of jurisdiction. However, Section 44A of the Civil Procedure Code is applicable only to monetary decrees not being in the nature of any amounts payable in respect of taxes or other charges of a like nature or in respect of a fine or other penalties and does not include arbitration awards.

Among other jurisdictions, the United Kingdom of Great Britain and Northern Ireland, Republic of Singapore, United Arab Emirates and Hong Kong have been declared by the Government to be reciprocating territories for the purposes of Section 44A of the Civil Procedure Code, but the United States of America has not been so declared. A judgment of a court in a jurisdiction which is not a reciprocating territory may be enforced only by a fresh suit upon the judgment and not by proceedings in execution. The suit must be brought in India within three years from the date of the foreign judgment in the same manner as any other suit filed to enforce a civil liability in India.

It is unlikely that a court in India would award damages on the same basis as a foreign court if an action is brought in India. Furthermore, it is unlikely that an Indian court would enforce foreign judgments if it viewed the amount of damages awarded as excessive or inconsistent with public policy of India. Further, any judgment or award in a foreign currency would be converted into Rupees on the date of such judgment or award and not on the date of payment. A party seeking to enforce a foreign judgment in India is required to obtain approval from the RBI to repatriate outside India any amount recovered, and any such amount may be subject to income tax in accordance with applicable laws. We cannot assure that such approval will be forthcoming within a reasonable period of time, or at all, or that conditions of such approvals would be acceptable. Our Company and the Book Running Lead Manager cannot predict whether a suit brought in an Indian court will be disposed of in a timely manner or be subject to considerable delays.

Gurugram stands out as one of the most dynamic residential real estate markets in the NCR, with approximately 51% of total area absorbed. Demand in the Delhi-NCR market has outpaced supply with supply catching up due to low ready to move inventory levels. A diverse portfolio of residential and commercial projects with large land reserves and a strong project pipeline

We believe that our large land reserves are an important component of our real estate development business. We typically acquire agricultural land which is subsequently converted into developable land. We identify location based on the potential use of land. After identification, we reach out to the owners through our network of brokers. We conduct diligence of the title and viability of the land. After acquisition, we acquire the relevant licenses to develop properties based on development plans. As of September 30, 2023, we held a total of 312.20 acres across the Delhi-NCR region of which we held 88.44 acres of land reserves in the New Delhi region, 167.14 acres of land reserves in Sector 63A, Gurugram and 56.62 acres of commercial land and buildings. The land reserves are either owned by us or are land reserves over which we have sole development rights.

As of September 30, 2023, our total land reserves had a Potential Developable area of 3.19 million square feet in the New Delhi region. Our expansive land reserves allow us to launch and market our residential and commercial developments at appropriate times to take advantage of favourable market conditions and demand, without having to acquire land in time-constrained circumstances. This allows us to respond more effectively to changes in market conditions and demand. Our land reserves also provide us with the ability to develop projects at strategic locations, which we believe command higher values resulting in relatively higher margins and higher lease income. As of September 30, 2023, our land reserves are uncontested and are not subject to any ongoing litigation.

We believe, our strong brand recall, track record of quality execution and deliveries have been instrumental in our sales and performance. As of September 30, 2023, we have been able to complete and nearly-complete 11 projects with an aggregate Developable area of 9.07 million square feet. Our completed projects include Anant Raj Aashray I in Neemrana, Rajasthan, an office building in Sector 44, Gurugram and Anant Raj Tech Park in Panchkula and Manesar. As part of our project Anant Raj Estate, we are currently developing 7.84 million square feet of which we are developing 0.67 million square feet of plots and villas and have planned to develop two projects of independent floors of 0.40 million square feet each, which is to be completed by Fiscal 2027 and Fiscal 2028, respectively. As of September 30, 2023, we have delivered a total inventory of 4.72 million square feet of floors, plots and villas. We expect to complete further development of 1.47 million square feet of floors, plots and villas by Fiscal 2027 and 2028. For further details, please see “Our Planned Residential Projects” on page 169.

Our customers have diversified profiles and aspirations across ready-to-move homes and newly-launched projects (which may take a few years to complete). To cater to customer demand, we aim to tailor our inventory mix to an optimum proportion of under-construction developments and ready-to-move units. We believe that such inventory mix positions us as one of the few real estate developers in India with a diverse portfolio of ready-to-move homes and under-construction developments, enabling us to cater to the varied preferences of residential customers.

The table below sets forth details of the Saleable area/Leasable area of our completed projects and near-completion projects, ongoing projects and planned projects:

Portfolio	Saleable Area/Leasable area (million square feet)	
	Residential	Commercial
Completed Projects/Near-Completion Projects	5.75	3.32
Ongoing Projects	5.08	2.58
Planned Projects	3.98	4.82
Total	14.81	10.72

Over the past three years, the National Capital Region (NCR) has generally experienced higher absorption levels compared to supply in the region due to increased affordability, coupled with ongoing and upcoming infrastructure projects that enhance the mobility of people. (Source: C&W Report) We believe that due to the large number of our residential properties that are either available for sale or will be available for sale, we are well positioned to benefit from an upturn in the Indian residential real estate market. In respect of several of our recent developments such as Anant Raj Estate and Ashok Estate, we have been able to increase our average selling prices, from project launch until completion. (Source: C&W Report)

We are also focused on the execution of our planned projects. The tables below provides information in relation to these Planned Projects as of September 30, 2023:

Ability to capitalize on industry tailwinds, rising prices and low unsold inventories in our key micro markets

In light of the current market scenario and the upturn in economic activity, the residential market in the National Capital Region (NCR) is poised to witness strong activity, propelled by the demand from end users. Gurugram stands out as one of the most dynamic real estate markets in the NCR, particularly in terms of residential supply. Out of the total units launched in NCR in 2022 (24,206 units), Gurugram accounted for ~75%. In 2022, Gurugram saw the addition of 18,201 units, aligning with the figures from the previous year. The supply continued to rise, with 15,595 new launches until Q3 2023, constituting ~53% of the total supply in Delhi NCR. Over the past three years, numerous launches in Gurugram included plotted projects and units with additional spaces such as study rooms, catering to the demand driven by the work-from-home concept.

Golf Course Extension Road has established itself as a distinguished and premium real estate micro market. The region features a mix of residential projects, including high-rise apartments, independent floors, plots and villas. As customer preferences pivoted toward premium and luxury housing, the micro-market experienced comparable supply levels in both 2022 and 2023, accompanied by exceptional sales momentum. In the years 2022 and 2023, the micro-market saw the addition of approximately 3,000 units by 7 developers such as DLF, Birla Estate, Emaar, Adani Realty and others. During this time, the Golf Course Extension Road market has experienced the supply of both independent floors and apartments. According to C&W, multiple newly launched projects have recorded significant traction within a short period of launch. For instance, Emaar Urban Oasis and Puri Aravallis were entirely sold out within the initial two weeks of their releases, priced in the range of Rs. 15,500 to 16,500 per square feet. Moreover, DLF The Arbour, a luxury project, also received a tremendous response and got sold out within the first week of its launch. The historic launch of a residential project with a price range of Rs. 17,500 - 18,500 per square feet in Golf Course Road Extension area indicates that the real estate market in the location is highly buoyant. This might be attributed to various factors including the location, connectivity, and amenities available in the area, along with the overall favourable sentiment towards the real estate market in the region. Furthermore, the market witnessed a further elevated the price range of the micro market to Rs. 18,000 – 22,000 per square feet with launches of Birla Avik. (Source: C&W Report)

Unless there is a change in consumer sentiment, the upward momentum in prices will persist for several quarters. These launches have exhibited strong absorption trends. Presently, plots in this micro market are valued within the range of Rs. 1,75,000 to 2,00,000 per square yard. From 2018 to 2023, ~3702 units of Apartments were launched while ~3,004 units of independent floors were launched. Both residential formats saw healthy absorption with apartments observing ~99% absorption while independent floors observing 96% absorption levels. (Source: C&W Report)

We believe that we are well positioned to capitalize on the industry tailwinds in the Delhi-NCR real estate market including increasing prices and absorption rates. Our unsold inventory in Anant Raj Estate which is located in the Golf Course Extension Road micro-market enables us to monetize our land parcels in the area.

Investments in the high growth, high yield data centre segment

We believe that our investments in the data centre segment enable us to capitalize on rising data consumption coupled with data localisation law fuelling rapid demand. In August 2023, the Parliament of India approved the Digital Personal Data Protection Act, 2023, which mandates companies to store personal data locally, encouraging local storage of the data gathered within India. In the Delhi-NCR region, the data centre capacity is expected to increase from 84MW in calendar year 2022 to 364MW in 2026. The demand for data centres is being largely driven by recent development in artificial intelligence & machine learning and the widespread transition of 4G to 5G in India. Data localization norms initiated by the government and regulators, that mandates storage of sensitive data within India, is also expected to support development of local data centres. (Source: C&W Report)

We currently possess land parcels with a potential Leasable area of 5.66 million square feet at Manesar, Panchkula and Rai which can be structurally strengthened and retrofitted to create a potential data centre capacity of 300 MW. Phase I of our data centre in Manesar, Gurugram is currently operational with an initial capacity of 3 MW and an enhancement of an additional 3 MW is ongoing. We expect the capacity of our data centres to increase to 50MW in subsequent years. We have received TIA-942 tier III certification for phase I of our proposed 21MW data centre at Manesar, 5G ready and have strategic tie ups with government agencies to provide data centre services to the government. Our data centres enable us to offer cost-effective data storage, with the advantage of low maintenance, high-end protection, and risk management. The table below provides details of the total developable area and maximum capacity of our proposed data centres:

Property	Total developable area (in million square feet)	Total proposed capacity (in MW)
Anant Raj Tech Park, Manesar	1.70	50
Anant Raj Tech Park, Panchkula	0.56	50
Anant Raj Tech Centre, Rai	3.40	200

Note: The details in the tables above in relation to total proposed capacity have been confirmed by Udayan Chaudhari & Associates Pvt. Ltd., pursuant to their certificate dated January 4, 2024.

We have the ability to lease out the existing capacity of 3 MW at our Manesar data centre. Data Centres with a capacity of 1MW to 5MW are projected to be rented at a rate of 80-100 USD per KW per month. (Source: C&W Report)

Projects	Date of land (or development rights) acquisition	Commencement of sale of units	Commencement of handover of units
Anant Raj Estate	November 15, 2011	February 25, 2012	May 5, 2014

Our Strategies

Further aggregate adjacent land in Sector 63A to strengthen our ongoing developments and land parcels

We currently possess 167.14 acres of land in Sector 63A, Gurugram. We intend to aggregate land parcels adjacent to our ongoing projects in order to strengthen our foothold in Section 63A. We believe that increasing our land holdings will allow us to benefit of the synergies from our various projects. Further, expansion of our presence will enable us to draw more benefits from our proximity to the Sector 56 metro station, connectivity through Golf Course Extension Road and to commercial centres such as Cyber Hub in Gurugram.

[Remainder of page intentionally left blank]

We have a strong pipeline of upcoming projects in Sector 63A, Gurugram including residential projects such as Anant Raj Estate which consists of multiple offerings including plots, villas and floors, Ashok Estate with small sized plots targeting mid-segment buyers and Birla Navya that offers luxury floors. Retrofit existing commercial properties for development of data centres to capitalise on growing market.

We plan to retrofit our IT parks which already possess the necessary infrastructure and approvals into data centres at an incremental cost. We have retrofitted a portion of our IT park in Manesar for the development of a data centre.

We believe that our eligibility to develop data centres enables us to derive benefits from industry tailwinds in relation to data centres in India. We have also entered into strategic tie ups with government agencies to offer our data centre services. We intend to continue expanding these services to other government agencies and companies who may be mandated to store their data in local data centres as per the Digital Personal Data Protection Act, 2023 and may require enhanced data storage space. RISK FACTORS

An investment in the Equity Shares involves a high degree of risk. You should carefully consider all the information in this Preliminary Placement Document, including the risks and uncertainties described below, before making an investment decision in the Equity Shares. The risks described below are not the only ones relevant to us or our Equity Shares, the industry and segments in which we currently operate or propose to operate. While we have described the risks and uncertainties that our management believes are material, the risks set out in this Preliminary Placement Document may not be exhaustive. If any of the following risks, or other risks that are not currently known or are currently deemed immaterial, actually occur, our business, results of operations, financial condition and cash flows could suffer, the price of our Equity Shares could decline, and you may lose all or part of your investment. To obtain a more complete understanding of our Company, prospective investors should read this section in conjunction with “Our Business”, “Industry Overview” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” on pages 159, 111 and 86, respectively, as well as the financial, statistical and other information contained in this Preliminary Placement Document. In making an investment decision, prospective investors must rely on their own examination of us and the terms of the Issue including the merits and risks involved. Prospective investors should consult their own tax, financial and legal advisors about the particular consequences to them of an investment in our Equity Shares.

Unless otherwise stated, references in this section to “we”, “our” or “us” are to our Company together with its Subsidiaries, Associates and Jointly Controlled Entity, on a consolidated basis.

Unless otherwise indicated or the context requires otherwise, the financial information included herein is based on our Audited Consolidated Financial Statements and Unaudited Consolidated Financial Results included in this Preliminary Placement Document. For further information, see “Financial Information” on page 244.

Unless otherwise indicated, all industry and market data used in this section has been derived from the report “Multiple asset classes across Delhi-NCR” dated December 21, 2023 (the “C&W Report”) prepared and released by Cushman and Wakefield and commissioned by us. Our Company commissioned and paid for the C&W Report pursuant to the engagement letter dated December 11, 2023. For risks in relation to commissioned reports, see “Risk Factors – We have referred to the data derived from the industry report commissioned from Cushman and Wakefield.” on page 64.

Prospective investors should pay particular attention to the fact that our Company is incorporated under the laws of India and is subject to a legal and regulatory environment that may differ from that of other countries. This Preliminary Placement Document also contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and elsewhere in this Preliminary Placement Document. See “Forward-Looking Statements” on page 18.

Unless specified or quantified in the relevant risk factors below, we are unable to quantify the financial or other implications or any of the risks described in this section.

Internal Risk Factors

1. Some or all of our ongoing and planned projects may not be completed by their expected completion dates or at all. Such delays may adversely affect our business, results of our operations and financial condition.

As of September 30, 2023, our ongoing and planned projects accounted for an estimated Developable area of 7.66 million square feet and 8.80 million square feet, respectively. Our ongoing and planned projects may be subject to significant changes and modifications from our currently estimated management plans and timelines as a result of factors outside our control, including, among others:

- lack of availability of financing;
- failure or delay in securing necessary statutory or regulatory approvals and permits for us to develop some of our projects;
- natural disasters, weather conditions and geopolitical events;
- reliance on third-party contractors and the ability of third parties to complete their services on schedule and in budget; and

- the risk of decreased market demand subsequent to the launch of a project.

Such changes and modifications to our timelines may have a significant impact on our ongoing and planned projects, and consequently, we may not develop these projects as contemplated, including quick monetization of land parcels after their acquisition, or at all, which may have an adverse effect on our business, results of operations and financial condition. Further, if there are any revisions made to the existing plans, approvals, permits or licenses granted for our ongoing projects by relevant authorities, then we may, as a result of such revisions, be required to undertake unplanned rework, including demolition on such projects. Such an occurrence may result in time and cost overruns in our ongoing projects.

For instance, some of our ongoing, near-completion and completed projects have faced delays in the past. We have paid compensation to a few of our customers on account of such delays. In addition to the compensation already paid to our customers, our Company may be required to pay further compensation to our customers in the future. Such compensation, if paid, may affect the overall profitability of the project and therefore adversely affect our business, results of operation and financial condition.

In addition, some of the sale agreements which we enter into with our residential customers contain penalty clauses wherein we are liable to pay interests payments to our customers due to completion delays. Some of our customers in our near-completion, completed and ongoing projects have experienced delays in the past. These delays, in many cases due to factors beyond our control. Further, a buyer of our residential unit may also terminate his arrangements with us if we fail to deliver the unit as per the timelines mentioned under the sale agreement, and we may be liable to refund the amount along with interest. We might also be exposed to penalties under the Real Estate (Regulation and Development) Act, 2016 (the “**RERA**”). The aggregate penalties we may be liable to pay in the event of delays may affect the overall profitability of the project and therefore adversely affect our business, results of operations and financial condition.

2. ***Our financing documents require us to obtain consents from our lenders for, among other things, issuing further share capital, dilution of Promoter shareholding and undertaking the Issue, two of which have not been obtained.***

Under some of our financing documents, we require consents from the relevant lenders for carrying out certain activities in relation to the Issue including issuing Equity Shares, effecting changes in the shareholding pattern of our Company and diluting the shareholding of the Promoters in our Company. As on September 30, 2023, our total outstanding borrowings were ₹ 1,050.58 crore from eight lenders. We have made applications to five lenders from whom we require approvals for any further issuance of Equity Shares or any other activities in furtherance of the Issue. As on the date of this Preliminary Placement Document, we have obtained consent from three lenders out of the five from whom consents were required. We have not yet received, and are currently awaiting, consent from two lenders (such two lender consent that we are currently awaiting, the “**Pending Lender Consents**”, and the financing documents relating to such Pending Lender Consents, the “**Pending Lender Consents Financing Documents**” (each a “**Pending Lender Consents Financing Document**”). Undertaking the Issue without receiving the Pending Lender Consents may constitute a default by us under the Pending Lender Consents Financing Documents and may entitle the relevant lender to declare a default against us and enforce remedies under the terms of the relevant Pending Lender Consents Financing Document, which could entail among others cancellation of our facilities, appointment of receiver or agent to enforce any or all security created in respect of the Pending Lender Consents Financing Documents, or restriction on payment of dividend.

A default by us and/or acceleration of repayment under the terms of any of the Pending Lender Consents Financing Documents would also trigger a cross-default and/or cross-acceleration of outstanding amounts under our other financing documents, including the indenture and other financing agreements and instruments containing such provisions. We also propose to repay/pre-pay certain facilities availed from the lenders from whom the consents are pending. Such prepayment may be subject to penalties as per the terms of the financing documents entered into with these lenders. Further, the consent that we have received from one of our lenders is subject to our Company prepaying the relevant facility availed from such lender. For further details, please refer to the section titled “*Use of Proceeds*” on pages 74.

We do not expect to have sufficient funds to meet all of the repayment demands as described above, if they were to occur. Further, even if not all of our lenders make repayment demands as described above, loans for which repayment demands are made, may, individually or in aggregate, have an adverse effect on our financial

condition, credit rating, prospects, business, results of operations and reputation, including our ability to raise further debt financing on terms acceptable to us or at all. The aforementioned defaults may also result in a decline in the trading price of the Equity Shares and you may lose all or part of your investment. We cannot assure you that we will be able to obtain Pending Lender Consents for undertaking the Issue, and we also cannot assure you that, failing which, such lenders (and those whose loans have been cross-defaulted and/or cross-accelerated) will not resort to the actions described herein. Further, consent obtained from the lenders, if any, may subject us to conditions which can limit our ability to use the proceeds in a manner anticipated by us.

3. *Our real estate development activities are subject to certain concentration risks, which may have an adverse effect on our business, results of operations, cash flows and financial condition.*

Our real estate development activities are primarily focused in and around the Delhi-NCR region, which may perform differently from, and may be subject to market conditions and regulatory developments that are different from, real estate markets in other parts of India or the world. In addition, the Delhi-NCR region may be exposed to natural disasters and our projects in the Delhi-NCR region may be subject to such risks.

We had 11 completed projects and near-completion projects as of September 30, 2023, with an aggregate Developable area of 9.07 million square feet, which is located in the Delhi-NCR region. As of September 30, 2023, we also had 7 ongoing and 9 planned projects in India with an aggregate Developable area of 7.66 million square feet and 8.80 million square feet, of which 6.44 million square feet and 8.24 million square feet is located in the Delhi-NCR region, respectively. In addition, as of September 30, 2023, we had land reserves of approximately 312.20 acres in the Delhi-NCR region. For details of our projects, see “*Our Business - Overview of our Business*” beginning on page 167.

The real estate market in the Delhi-NCR region may be affected by various factors outside our control, including prevailing local and economic conditions, changes in the supply and demand for properties comparable to those we develop, changes in the applicable regulations, economic conditions, demographic trends, employment and income levels and interest rates, regional natural disasters, among other factors. These factors may contribute to fluctuations in real estate prices, rate of sales and the availability of land in the Delhi-NCR region and could also adversely affect the demand for and valuation of our ongoing and planned projects. Consequently, our business, results of operations, cash flows and financial condition have been and will continue to be heavily dependent on the performance of, and the prevailing conditions affecting, the real estate market in the Delhi-NCR region.

4. *While acquiring land parcels or other properties, we may not be aware of legal uncertainties and defects, which may have an adverse impact on our ability to develop and market projects on such lands.*

We use different ways to acquire land. We primarily acquire agricultural land which we convert into developable land. Land is typically acquired directly through negotiations with the seller. It can also be acquired through acquisitions, joint ventures, or other such arrangements with the entities that hold land parcels. While making such purchases or acquisitions, we may be unable to identify various legal defects and irregularities to the title of the land or properties that we purchase. Property records in India have not been fully computerized and are generally maintained and updated manually through physical records of all land-related documents. This process may take a significant amount of time and result in inaccuracies or errors. For example, there could be discrepancies in the land area in revenue records, the area in title deeds or the actual physical area of some of our land. In certain cases, our name may not have been updated in the land records as owners or lessees or developers of the land. We may be unable to obtain approval for conversion of agricultural land to developable land, which may affected the timelines of our planned projects.

In addition, we may not be aware of all the risks associated with acquisitions of land or property. It is often difficult for us to conduct a substantial independent due diligence review of non-public information about the target company or property. We may not have good and marketable title to some of our land as a result of non-execution, non-registration or inadequate stamping of conveyance deeds and other acquisition documents, or not having obtained requisite approvals from courts or concerned governmental authorities for acquisition of land or property, or may be subject to, or affected by, encumbrances of which we may not be aware. We may not therefore be able to assess or identify disputes, unregistered encumbrances or adverse

possession rights over title to real property in which we have invested or may invest. We may also be exposed to risk of litigation on account of acquisition of land or property without requisite approvals, which could affect our title to such land or property. Legal disputes in respect of land title can take several years and considerable expense to resolve if they become the subject of court proceedings and their outcome can be uncertain. Court records in India have not been completely digitised, and we cannot assure you that searches of court records will reveal all relevant proceedings. Interested parties could be excluded from litigation and online court records may not provide details of the relevant property that may be in dispute in a particular legal proceeding. If either we or the owner of the land which is the subject of our development agreements are unable to resolve such disputes with these claimants, we may lose our interest in the land. Further, if we are unable to comply with the terms and conditions of the development agreements, we may be exposed to risk of litigation as well as termination, and we may lose our interest in the land or property.

In the ordinary course of our business we acquire properties for conducting our operations, which may expose us to title or ownership related disputes pertaining to such properties. For instance, our Subsidiary, Grandstar Realty Private Limited (“Grandstar”), is currently involved in a litigation with Yes Bank Limited and another, for the alleged fraud in the auction sale of the property by Yes Bank Limited to Grandstar. For further details, please see “Legal Proceedings – Litigation involving our Subsidiaries – Litigation against our Subsidiaries - Civil proceedings above the Civil Materiality Threshold” on page 239. Failure to obtain, or to prove that we hold, good title to a particular plot of land may materially prejudice the success of a development for which that plot is a critical part, may require us to write off expenditures in respect of that development and may adversely affect our property valuations and prospects. For further details of outstanding litigation in relation to the title of our land parcels, see “Legal Proceedings” on page 237.

Following the completion of a purchase or an acquisition, we may have to incur significant expenditure to maintain the assets we have acquired and to comply with regulatory requirements. The costs and liabilities actually incurred in connection with such acquisitions may exceed those anticipated.

5. Our inability to effectively manage our growth and expansion or to successfully implement our business plans and growth strategies, including in relation to the setting up of data centres may have a significant impact on our implementation of this strategy.

We have experienced significant growth since Fiscal 2021 and we have significantly expanded our operations. Details of the growth of our revenue from operations, profit after tax and EBITDA from Fiscal 2021 to Fiscal 2023 are set forth below:

Particulars	Revenue from Operations	PAT	EBITDA
	₹ in crore (except for %)		
Fiscal 2021	249.66	0.23	65.75
Fiscal 2023	956.94	144.41	251.69
CAGR (%)	95.65%	270.50%	95.01%

One of our growth strategies involves the retrofitting of our existing Tech Parks for the development of data centers in the Delhi-NCR region. We have made investments pursuant to this strategy, including the retrofitting of a part of our IT Park in Manesar, Haryana. In addition, the Digital Personal Data Protection Act, 2023, has imposed stringent standards for secure processing of personal data and has shifted the onus of implementation on to data processing entities. Regulatory development in this sector is, therefore, expected to drive demand for third-party data processing centers which can process personal data securely on behalf of data fiduciaries (Source: C&W Report) For further details, see “Our Business – Strategies – Retrofit existing commercial properties for development of data centers to capitalize on growing market.” on page 165.

However, the success and implementation of this strategy is dependent on various factors including but not limited to, our ability to procure consumer contracts, increased competition in the market for data centre infrastructure, vulnerability to cyber-attacks and terrorism, and obtaining requisite approvals. Many of these factors are beyond our control and we cannot guarantee that these factors will not impede our implementation of this strategy.

Further, we have limited experience in the development of data center infrastructure, which requires specialized knowledge and technical expertise. For instance, we are required to maintain a specified working

environment (including maintenance of optimal temperature) to cater to substantial power demand by the client. Any inability to maintain the requisite operating environment may materially impact the operation of our data centres. While we engage third parties in the design, planning and execution of our projects, we cannot assure you that we will not face any technical limitations in the implementation of our strategy, which may adversely affect our business prospects and operations.

We cannot assure you that our growth strategy will continue to be successful or that we will be able to continue to expand further, or at the same rate. The success of our business will depend greatly on our ability to effectively implement our business and growth strategy.

6. *We have entered into and may enter into joint ventures, development agreements and similar arrangements with third parties in the future, which do not convey any interest in the immovable property to us and only the development right will be transferred to us. Investments through development agreements involve risks, including the possibility that our development partners may fail to meet their obligations under the development agreement, causing the whole project to suffer.*

As of September 30, 2023, we have entered into joint development agreements in relation to certain land parcels amounting to a total of 1.85 million square feet of Saleable area amounting to 24.15% of our ongoing projects. For further details regarding our properties, please see “Our Business – Overview of our Business” on page 167. Such agreements confer rights on us to construct, develop, market and eventually sell the Saleable Area to third party buyers. Such agreements generally will not convey any interest in the title of the immovable property to us and only the development right would be transferred to us. Under these agreements, we would typically be entitled to a share in the developed property or a share of the revenues or profits generated from the sale of the developed property, or a combination of the above entitlements after adjusting the amount paid earlier, if any. Investments through development agreements involve risks, including the possibility that our development partners may fail to meet their obligations under the development agreement, causing the whole project to suffer. For example, the landowners may be responsible for certain financial obligations towards the development of the project, procuring certain regulatory approvals (such as approvals for change in use of the land for residential or commercial purposes), furnishing documents of title to lenders for securing financing, paying taxes and local levies on the land, curing title defects and settling title litigation within a stipulated period of time. We cannot assure you that projects that will involve collaboration with third parties will be completed as scheduled, or at all, or that our ventures with these parties will be successful. Any delay or failure by counterparties to fulfil their obligations under development agreements may have an adverse effect on our reputation as well as on our ability to complete the project on time and realize cash flows, which could in turn have an adverse effect on our results of operations and financial condition.

Our inability to acquire such land or land development rights, or our failure to recover any payments made by us with respect to such land, may adversely affect our business, financial condition and results of operations.

Disputes that may arise between us and our development partners may cause delay in completion, suspension or complete abandonment of a project, which may adversely affect our business, financial condition and results of operations. Additionally, any change to our share of revenues and/or profits under any development agreement may adversely affect our profitability from that particular project, and may also adversely affect our business, financial condition and results of operations.

7. *Unsold inventory in our projects if not sold in a timely manner adversely affects our business, results of operations and financial condition.*

As of September 30, 2023, we had unsold inventory in our residential projects of 2.93 million square feet. For further details, see “Our Business” on page 159. If we are unable to sell such inventory at acceptable prices and in a timely manner, our business, results of operations and financial condition could be adversely affected.

8. *We depend significantly on our residential development business, the success of which is dependent on our ability to anticipate and respond to consumer requirements.*

As of September 30, 2023, 55% of our Developable area in ongoing and planned projects comprise residential projects. We categorize our residential developments into integrated township projects, group housing

projects and affordable housing projects. Further, our revenue from sale of residential projects contributes a significant portion to our revenue from operations. For Fiscal 2021, 2022, 2023 and six-months ended September 30, 2023, respectively, our revenue from the sale of our residential projects has contributed to 94.04%, 95.60%, 90.14% and 96.16% of our revenue from operations. Any decrease in revenue or margins from the sale of our residential projects, may have an adverse effect on our business, cash flows, results of operation and financial position.

We rely on our ability to understand the preferences of our customers in each of these segments and to accordingly develop projects that suit their tastes and preferences. The growing disposable income of India's middle and upper classes has led to a change in lifestyle resulting in substantial changes in the nature of their demands. As customers continue to seek better housing amenities as part of their residential needs, we plan to continue our focus on the development of quality residential accommodation with various amenities. Our inability to provide customers with quality construction or our failure to continually anticipate and respond to customer needs may affect our business and prospects and could lead to the loss of significant business to our competitors.

9. ***Some of our projects are in the preliminary stages of planning and require us to obtain approvals or permits, and we are required to fulfill certain conditions precedent in respect of some of them. We also do not currently have the requisite approvals to develop our land reserves. Any failure to obtain the necessary approvals in time or at all may result in material delays to our ongoing and planned projects, or prejudice our ability to develop our land reserves, which may prejudice our growth strategy and could have an adverse impact on our results of operation and projects.***

As of September 30, 2023, we had 7 ongoing and 9 planned projects. Our building plans in relation to some of the planned projects are yet to be finalized and approved. Further, we may need some additional approvals to complete our ongoing projects. To successfully execute each of these projects, we are required to obtain statutory and regulatory approvals, permits, licenses, registrations, certifications and consent, and applications need to be made at appropriate stages of the projects with various government authorities. For example, we are required to obtain the approval of building plans and layout plans, no-objection certificates for construction of high-rise projects, environmental consents and fire safety clearances. For instance, with respect to our ongoing project Anant Raj Aashray II in Tirupati, Andhra Pradesh, currently we do not have the requisite consent to establish from the Andhra Pradesh Pollution Control Board, and we are in the process of applying for the same. In addition, we are required to obtain a certificate of change of land use in respect of lands designated for purposes other than real estate development. We may also be required to apply for and obtain approvals before proceeding with construction of any phase or part of our ongoing projects or planned projects. Further, we may be required to renew certain of our existing approvals. We cannot assure you that the relevant authorities will issue any such approvals or renewals in the anticipated time frames or at all. Any delay or failure to obtain the required approvals or renewals in accordance with our plans may adversely affect our ability to implement our ongoing and planned projects, or to exploit the development potential of our land parcels to the fullest and adversely affect our business and prospects. Moreover, the approvals may be subject to numerous conditions, and we cannot assure you that these approvals will not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof or pursuant to regulatory action. Suspension or revocation of approvals by the relevant regulatory authority, either on account of non-compliance or otherwise, would impact our operations and consequently have an adverse impact on our business, cash flows and financial condition.

Further, there is a part of our land reserves for which we do not yet have the requisite approvals to commence development. This part is not included in our ongoing or planned projects, although we envisage developing such land reserves in the longer term. When we set out to actually develop such land reserves, we will need to seek approvals and permissions from granting authorities at the relevant time, which may not be obtained in time or at all. Any failure to obtain requisite approvals and permissions in time or at all, may result in our failure to develop our land reserves in accordance with our future long-term plans and exploit the estimated development potential on such land parcels, which may prejudice our growth strategy and could have an adverse effect on our business and prospects.

In addition, certain land parcels may fall under eco-sensitive zones, green zones and forest zones, for which we may be required to obtain special permission to develop the said property, apart from the non-agriculture land order. We cannot assure you that such permissions will be obtained in a timely manner or at all.

10. *Increases in prices of, or shortages of, or delay or disruption in supply of labour and key building materials could affect our estimated construction cost and timelines resulting in cost overruns or less profit.*

We procure building materials for our projects, such as steel, cement, ready mix concrete, flooring products, hardware, bitumen, sand and aggregates, doors and windows, bathroom fixtures and other interior fittings, from contractors who purchase these through third-party suppliers. The prices and supply of basic building materials and other raw materials depend on factors outside our control, including cost of raw materials, general economic conditions and geopolitical events, commodity prices, competition, production costs and levels, transportation costs, indirect taxes and import duties. Further, we do not enter into long term agreements for supply of labour and key materials for construction of our projects. Our ability to develop and construct projects profitably is dependent on our ability to obtain adequate and timely supply of building materials within our estimated budget. As we source our building materials from third parties, our supply chain may be interrupted by circumstances beyond our control. Poor quality roads and other transportation-related infrastructure problems, inclement weather and road accidents may also disrupt the transportation of supplies. Prices of certain building materials and, in particular, cement and steel prices, are susceptible to rapid increases.

Further, we operate in a labour-intensive industry and if we or our contractors are unable to negotiate with the labour or their sub-contractors, it could result in labour unrest, strikes or other labour actions and work stoppages which could result in increased operating costs as a result of higher than anticipated wages or benefits. In addition, it may be difficult to procure the required labour for ongoing or planned projects.

Although we have not experienced such disruptions in the past, we cannot assure that we will not face any shortage or disruption of supplies in the future. During periods of shortages in the supply of building materials or labour, we may not be able to complete projects according to our previously determined time frames, at our previously estimated project costs, or at all, which may adversely affect our results of operations and reputation. In addition, during periods where the prices of building materials or labour significantly increase, we may not be able to pass these price increases on to our customers, which could reduce or eliminate the profits we intend to gain from our projects. These factors could adversely affect our business, results of operations and cash flows.

11. *Our business is capital intensive and requires significant expenditure for development and is therefore heavily dependent on the availability of real estate financing, which may not be available on terms acceptable to us in a timely manner or at all.*

Our business is capital intensive, requiring substantial capital to develop and market our ongoing and planned projects for activities including the performance of engineering, construction and other works on projects before we receive payment from our clients. The actual amount and timing of our future capital requirements may also differ from estimates as a result of, among other things, unforeseen delays or cost overruns in developing our projects, changes in business plans due to prevailing economic conditions, unanticipated expenses, regulatory changes, and engineering design changes. To the extent our planned expenditure requirements exceed our available resources, we will be required to seek additional debt or equity financing. Additional debt financing, if available, could increase our interest cost and require us to comply with additional restrictive covenants in our financing agreements. In addition, the Indian regulations on foreign investment in housing, built-up infrastructure and construction and development projects impose significant restrictions on us, including the types of financing activities we may engage in.

Our ability to obtain additional financing on favourable commercial terms, if at all, will depend on a number of factors, including:

- our results of operations and cash flows;
- the amount and terms of our existing indebtedness;
- general market conditions in the markets where we operate

- interest rates in India and globally; and
- general condition of the debt and equity markets in India.

In addition, changes in the global and Indian credit and financial markets may affect the availability of credit to our customers and decrease in demand for our development. Our inability to obtain funding on reasonable terms, or at all, could affect our ability to develop our ongoing and planned projects and would have an adverse effect on our business and results of operations.

12. *We have not obtained independent title reports or search reports for part of the land comprising our land reserves, and we do not have and may not obtain title insurance guaranteeing title or land development rights.*

The title to the lands in India is often fragmented and the land may, in many cases, have multiple owners. This also makes the acquisition and development process more complicated and may expose us to legal disputes and adversely affect our land valuations. We conduct diligence of the title and viability of the land. After acquisition, we acquire the relevant licenses to develop properties based on development plans. With regard to certain land parcels, it is often difficult for legal counsels to satisfy themselves of certain technical requirements while assessing the title. For much of our land purchased outside the Delhi-NCR region, while we may have undertaken diligence and investigation internally without assistance of external lawyers, we may or may not have invited claims by issuing public notices, undertaken searches (including land registry search, search on the official database maintained by the Ministry of Corporate Affairs and negative searches in the concerned courts) or raised requisition in relation to title of the land, in terms of the documents so executed and registered we have rights/title to such pieces and parcels of lands. Also, since our land reserves are large and fragmented and we do not have immediate plans to develop a substantial portion of these reserves, we have not obtained legal opinions and search reports, written or otherwise, with respect to all parcels of land, and the estimates of land owned are our own, without confirmation from any third party. We do not have independent title search reports for a portion of our land reserves in the New Delhi region. Our failure to obtain legal opinions and search reports in respect of our land reserves may result in our inability to obtain financing or sell our units constructed on such land reserves in the future in a timely manner, which may adversely affect our business and results of operations.

Further, title guarantee insurance is not available in India at a commercially viable cost to guarantee title or development rights in respect of land. As a result, we may not obtain title guarantee insurance or obtain inadequate coverage for the title guarantee insurance. This, coupled with difficulties in verifying title to land, may increase our exposure to third parties claiming title to the property. Consequently, we may be required to sell the property or lose our title to the property, which could adversely affect our business, results of operations and financial condition.

13. *We may not be able to successfully identify and acquire suitable land or development rights, or anticipate and respond to customer demand in a timely manner, which may affect our business and growth prospects.*

Our ability to identify suitable parcels of land for development is a vital element of growing our business and involves certain risks, including identifying land with clean title and at locations that are preferred by our target customers. We follow both internal and external assessment processes for land selection and acquisition and project development, which includes a due diligence exercise to assess the title of the land and its suitability for development and marketability. These processes are based on information that is available or accessible to us. We cannot assure you that such information is accurate, complete or current, and any decision based on inaccurate, incomplete or outdated information may result in certain risks and liabilities associated with the acquisition of such land or joint development rights, which could adversely affect our business and growth prospects.

We acquire parcels of land, or development rights for land at various locations, which can be subsequently consolidated to form a contiguous land area, upon which we can undertake development. While in the past we have acquired contiguous parcels of land for our development activities, we may not be able to acquire such parcels of land in the future or may not be able to acquire such parcels of land on terms that are acceptable to us, which may affect our ability to consolidate these parcels of land into a contiguous land area. Failure to acquire such parcels of land may cause a delay or force us to abandon or modify our development of land that we have acquired at a certain location, which may result in a failure to realize profit on our initial investment

and also affect our assessment of the Developable Area of our land reserves. In connection with the acquisition of land, disputes may arise between the local government and residents as to the applicable compensation payable or residents may refuse to relocate. Such disputes could delay the resettlement process and consequently, the land acquisition and development process. We cannot assure you that such disputes would be resolved in a timely manner or at all. Additionally, we may be asked to pay premium amounts for acquiring certain large parcels of land. If we are unable to make the deferred payment consideration on time, or at all, on our current land reserves or future land reserves, it may result in disputes and ultimately affect our ability to develop such land and may also result in a failure to realize profit on our initial investment.

In addition, due to the increased demand for land in connection with the development of residential and commercial properties, we may experience increased competition in our attempt to acquire land in the geographical areas in which we operate and the areas in which we anticipate operating in the future. For example, the supply of land in Delhi-NCR region is limited and acquisition of new land poses substantial challenges and is highly competitive. Increased competition may result in a shortage of suitable land that can be used for development and can increase the price of land. We may not be able to or may decide not to acquire parcels of land due to various factors, such as the price of land.

Further, in certain instances, we acquire certain land parcels through collaboration agreements for development of projects. Ownership of these land parcels will transfer after the completion of the projects. As of September 30, 2023, such parcels of land are located at Ullawas and Kadarapur. If we experience a delay, we may not be able to gain full title. Accordingly, our inability to acquire parcels of land may adversely affect our business and growth prospects.

Moreover, the availability of land, as well as its use and development, is subject to regulation by various local authorities. For example, if a specific parcel of land has been deemed as agricultural land, depending on its location, no commercial or residential development may be permitted beyond certain specified timelines or without the prior approval of the local authorities, as applicable. Further, certain land parcels can be subject to reservations, including reservations for railway lines, dams, freight corridors and road widening, and accordingly, such reserved areas will be deducted from the Developable area. Further, certain areas may fall under eco-sensitive or buffer or green or forest zone, and due to such zoning, there may be restrictions on carrying out developmental activities in accordance with the applicable development regulations. We may also be required by applicable laws or court orders to incur expenditures and undertake activities in addition to real estate development on certain portions of our land reserves. Accordingly, our inability to acquire parcels of land or development rights or any restrictions on use of our land or development thereof may adversely affect our business and growth prospects.

While we have in the past successfully identified suitable projects that meet market demand, we may not be as successful in the future. The failure to identify suitable projects or meet customer demand in a timely manner may cause us to change, delay or abandon entire projects, which in turn could materially and adversely affect our competitive position, business, financial condition, results of operations and prospects.

14. *Our business is subject to the RERA and any non-compliance of the provisions of RERA or the applicable state specific legislations may have an adverse effect on our business, results of operations and financial condition.*

The Central Government had notified the RERA in the official gazette on March 26, 2016. The RERA was introduced to regulate the real estate industry and to ensure, amongst others, imposition of certain responsibilities on residential real estate developers and accountability towards customers and protection of their interest. The RERA has imposed certain obligations on residential real estate developers, including us, such as mandatory registration of residential real estate projects, not issuing any advertisements or accepting advances unless real estate projects are registered under RERA, maintenance of a separate escrow account for amounts realized from each real estate project and restrictions on withdrawal of amounts from such escrow accounts and taking customer approval for major changes in sanction plan. Further, state-specific RERA rules and regulations such as the National Capital Territory of Delhi Real Estate (Regulation and Development) (General) Rules, 2016, may impose various obligations on us. Any non-compliance of the provisions of RERA or the applicable state specific legislations may result in punishments (including penalties and/or imprisonment), blacklisting of promoters and revocation of registration of our ongoing projects which may have an adverse effect on our business, results of operations and financial condition.

15. *We have a substantial amount of debt, which could affect our ability to obtain future financing or pursue our growth strategy.*

As of September 30, 2023, we had ₹1050.58 crore of aggregate outstanding borrowings on a consolidated basis, of which ₹1023.08 crore was secured indebtedness and ₹27.50 crore was unsecured indebtedness. Our indebtedness could have important consequences and significant adverse effects on our business, including the following:

- our ability to satisfy our obligations under our financing agreements may be limited;
- our vulnerability to adverse general economic and industry conditions may be increased;
- we must use a substantial portion of our cash flow from operations to pay interest on our indebtedness, which will reduce the funds available to us for operations and other purposes;
- our ability to obtain additional financing for working capital, capital expenditure or general corporate purposes may be impaired;
- our indebtedness could limit, along with the financial and other restrictive covenants of our indebtedness, our ability to borrow additional funds and increase the cost of additional financing;
- our indebtedness could place us at a competitive disadvantage compared to our competitors that may have proportionately less debt; and
- our flexibility in planning for, or reacting to, changes in our business and the industry in which we operate may be limited.

We may not be successful in obtaining additional funds in a timely manner, on favourable terms or at all. If we do not have access to funds required, we may be required to delay or abandon some or all of our planned projects or to reduce planned expenditure and advances to obtain land development rights and reduce the scale of our operations. Additionally, we may not be successful in maintaining or increasing the same growth rate while reducing our debt levels, and if we are unsuccessful in doing so, our business, results of operations and financial condition could be adversely affected.

Our ability to obtain financing on favourable terms, if at all, will depend on various factors, including our future financial condition, results of operations and cash flows, the amount and terms of our existing indebtedness, general market conditions and market conditions for financing activities. For further details of the impact of increases of interest rates on us, see “*Financial Information*” on page 244. If interest rates continue to increase in the future, it could lead to an increase in our cost of debt. Such occurrences could adversely affect our ability to borrow and renew maturing debt on competitive terms, adversely affecting our business, results of operations, cash flows and financial condition.

16. *Our Company may undertake a preferential issue of Equity Shares after completion of the Issue which is subject to the corporate approvals and other considerations.*

Our Board of Directors have approved a capital raise of up to ₹75 crores, comprising a preferential issue of 9,02,527 fully paid Equity Shares at a price of ₹277 per Equity Share for an aggregate amount of ₹24.99 crores to Gagandeep Credit Capital Private Limited and a preferential issue of 17,85,714 fully convertible warrants at a price of ₹280 per warrant aggregating to ₹49.99 crores to Shri Ashok Sarin Anant Raj LLP, an entity forming part of our promoter group, pursuant to their resolution dated December 14, 2023 which is subject to certain conditions including the execution of the relevant agreements and receipt of regulatory approvals in accordance with the applicable provisions of the Companies Act, SEBI ICDR Regulations and applicable law (“**Fund Raise**”). Pursuant to the same, we have issued a notice for an extraordinary general meeting of our shareholders to be held on January 13, 2024 for approving the Fund Raise. We cannot assure you that our Shareholders will accord their respective approval for the Fund Raise and that our Company will be able to raise funds through the preferential issue in a timely manner or at all due to other considerations.

17. *We rely on independent contractors to execute our projects and any failure on their part to perform their obligations could adversely affect our business, results of operations and cash flows.*

We utilize independent contractors to execute our projects. If a contractor fails to perform its obligations satisfactorily or within the prescribed time periods with regard to a project, or terminates its arrangement with

us, we may be unable to develop the project within the intended timeframe and at the intended cost. If this occurs, we may be required to incur additional cost or time to develop the property to appropriate quality standards in a manner consistent with our development objective, which could result in reduced profits or, in some cases, significant penalties and losses, which we may not be able to recover from the relevant independent contractor. For further details, see “*Our Business- Proven end- to-end execution capabilities with continuous innovation and ability to delivery projects at competitive cost with an experienced management team*” on page 163. We cannot assure you that the services rendered by any of our independent contractors will always be satisfactory or match our requirements for quality. Further, we may be subject to litigation challenging the quality of our projects, which may adversely affect our business and reputation.

In addition, we may be subject to claims in the future in relation to defaults and late payments to our contractors, which may adversely affect our business, results of operations, and cash flows.

18. *Corrupt practices or fraud or improper conduct may delay the development of a project and adversely affect our business and results of operations.*

The real estate development and construction industries in India and elsewhere are not immune to the risks of corrupt practices or fraud or improper practices. Large construction projects in all parts of the world provide opportunities for corruption, fraud or improper conduct, including bribery, deliberate poor workmanship, theft or embezzlement by employees, contractors or customers or the deliberate supply of low-quality materials. If we or any other persons involved in any of the projects are the victim of or involved in any such practices, our reputation or our ability to complete the relevant projects as contemplated may be disrupted, thereby adversely affecting our business and results of operations.

19. *Some of our corporate records, regulatory filings, including those relating to allotments and forfeiture of our equity shares in the past are not traceable/filed and further, there are certain inaccuracies in some of the regulatory filings done by us. We have also received certain clarifications and/or notices from the Stock Exchanges in the past in relation to the filings made with them. We cannot assure you that there will be no other instances of such inadvertent non-compliances with statutory requirements, or clarifications/notices received from regulatory authorities.*

Certain corporate records and regulatory filings in relation to certain allotments and forfeiture of equity shares of our Company from its incorporation on July 30, 1985 up to February 29, 2008 could not be traced as the relevant information was not available in the records maintained by our Company, at the MCA Portal maintained by the Ministry of Corporate Affairs and the RoC, despite conducting searches of our internal records and the records maintained by the jurisdictional RoC for the aforesaid secretarial and other corporate documents and records. We had commissioned a physical and online search of the RoC records through Ms. Priya Jindal, a practicing company secretary, to retrieve missing documents in relation to, *inter alia*, issuances of Equity Shares by the Company. Pursuant to the foregoing, Ms. Priya Jindal, the practicing company secretary has issued a certificate dated December 23, 2023 (“**PCS Certificate**”). The PCS Certificate confirmed that apart from Form-2 i.e. the return of allotment for the equity shares allotted by our Company on March 29, 2004 and September 27, 2005, respectively, and certain return of allotments which were already available on the MCA portal, no other documents were retrieved during the search. Further, there are certain inaccuracies in some of the regulatory filings done by our Company, such as, with respect to equity shares allotted by our Company on (i) November 13, 2006, (ii) May 25, 2007, (iii) July 3, 2007, (iv) September 14, 2007, (v) December 14, 2007 and (vi) February 29, 2008, the amount of total paid up share capital of the Company is incorrectly mentioned instead of the total issued share capital of the Company, in the relevant forms filed in relation to the return of allotment with RoC. Accordingly, we have relied on other corporate records and documents, including, annual returns, board and shareholders’ resolutions, audited financial statements, annual reports of the Company, forms filed with the RoC and other secretarial records of the Company as available and, the PCS Certificate for the periods to which such documents relate, for such matters. For details, see “*Capital Structure*” on page 81.

We cannot assure you that the secretarial records or regulatory filings which we have not been able to locate or inaccurately filed will be available in the future, or that the regulatory filings were done in accordance with applicable law or at all or in timely manner. Additionally, while no disputes or penalties have arisen or been imposed in connection with these secretarial records as on the date of this Preliminary Placement Document, we cannot assure you that no dispute or penalties shall arise or be imposed in the future, including for any

delay in statutory filings. Further, being a listed company, in the past we have also received certain clarifications and/or notices from the Stock Exchanges in relations to the filings made with the Stock Exchanges in the regular course of our business. For instance, on August 3, 2022, we had received a notice from BSE, stating that there is a discrepancy in our corporate governance report for quarter ended June 30, 2022 filed with Stock Exchanges, as the special resolution for our Independent Director, Mr. Brajindar Mohan Singh was not passed. Thereafter, our Company responded to this notice, stating that Mr. Brajindar Mohan Singh would attain the age of 75 years on October 26, 2022, and the details of the respective special resolution passed on December 31, 2018, will be updated in the corporate governance report for the quarter ended December 31, 2022, pursuant to which no further query or clarification was received from BSE in this regard. Further, in the last three Fiscals, we have delayed in the payment of statutory dues for which we have paid a penalty. Additionally, our Associates, Roseland Buildtech Private Limited and E2E Solutions Private Limited, have not been compliant with certain applicable statutory laws and rules, such as the statutory requirements under the Companies Act in relation to filing of annual return and financial statements, since Fiscal 2020 and Fiscal 2023, respectively.

As we continue to grow, there can be no assurance that there will be no other instances of such inadvertent non-compliances with statutory requirements, or clarifications/notices received from regulatory authorities which may subject us to regulatory action, including monetary penalties, which may adversely affect our business, reputation, operations, prospects or financial results.

20. *Any failure to protect or enforce our rights to own or use trademarks and brand names and identities could have an adverse effect on our business and competitive position.*

As of September 30, 2023, we have 10 registered trademarks, for the various names and logos of our projects, under various classes registered with the registrar of trademarks. Any failure to renew registration of our registered trademarks may affect our right to use them in future. If we are unable to register our trademarks for various reasons including our inability to remove objections to our trademark applications, or if any of our unregistered trademarks are registered in favour of or used by a third party, we may not be able to claim registered ownership of such trademarks and consequently, we may not be able to seek remedies for infringement of those trademarks by third parties other than relief against passing off by other entities, causing damage to our business prospects, reputation and goodwill. For example, the name and logo 'Anant Raj Limited' is currently unregistered. While we are in the process of applying for registration of the name and logo, we cannot guarantee that we will be successful in obtaining registration of the same. We also cannot assure you that we will be able to adequately protect our mark against passing off, unauthorized use or infringement during the period that such mark remains unregistered. Further, our efforts to protect our intellectual property may not be adequate and any third party claim on any of our unprotected brands may lead to erosion of our business value and our reputation, which could adversely affect our operations. Third parties may also infringe or copy our registered trademarks. We may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect our trademarks.

Further, if we do not maintain our brand names and identity, which we believe is a principal factor that differentiates us from our competitors, we may not be able to maintain our competitive edge. If we are unable to compete successfully, we could lose our customers, which would negatively affect our financial performance and profitability. Moreover, our ability to protect, enforce or utilize our brands is subject to risks, including general litigation risks.

In addition, we do not own certain trademarks and trade names which we use in our business. For example, we use the names of major design and service brands and developers in our promotional materials for our projects, under licenses or agreements which may be terminated or revoked according to their terms. As of September 30, 2023, we use the Birla Estates trademark owned by third parties. We cannot assure you that we will continue to have the uninterrupted use and enjoyment of these trademarks or logos, in the event that we are unable to renew the relevant license agreements. Furthermore, we cannot assure you that these brand names will not be adversely affected in the future by actions that are beyond our control, including customer complaints or adverse publicity from any other source. Any damage to these brand names, if not immediately and sufficiently remedied, could have an adverse effect on our business and competitive position.

Finally, while we take care to ensure that we comply with the intellectual property rights of others, we cannot determine with certainty whether we are infringing any existing third-party intellectual property rights, which

may force us to alter our offerings. We may also be susceptible to claims from third parties asserting infringement and other related claims.

21. Several of our financing agreements provide for borrowings at floating or variable rates. An increase in interest rates could increase our borrowing costs under such facilities and adversely affect our business, results of operations and financial conditions.

We have incurred borrowings which bear interest at floating or variable rates linked to the prime lending rates of our lenders, as determined from time to time. As of September 30, 2023, of our total outstanding borrowings of ₹1050.58 crore, ₹1021.00 crore had floating or variable interest rates. Upward fluctuations in interest rates could therefore increase the cost of both existing (for floating or variable interest rate borrowings) and new debt, which may have an adverse effect on our business, results of operations and financial condition. For further details, see “Financial Information” on page 244.

We have issued NCDs to India Real Estate II Scheme III, Touchstone Trust Scheme II and Touchstone Trust Scheme IV for a total sanctioned amount of ₹1075.00 crores as of September 30, 2023. Our outstanding loan amount from our NCDs was ₹ 510.38 crores as of September 30, 2023.

22. We are subject to restrictive covenants under our financing agreements which may limit our strategic decisions and operations. A breach of such covenants could force us to sell assets or trigger a cross-default under our other financing agreements.

Certain of our financing agreements contain restrictive covenants regarding, among other things, altering our capital structure (including through the issuance of further share capital on a preferential basis), changing the shareholding of our Company, raising additional finance, the disposition of assets or implementing any scheme of merger, amalgamation, reorganization, expansion or diversification of our business, declaring dividends in the event of any default, materially altering our constitutional documents, investing any funds in any other concern, undertaking guarantee obligations, changing our accounting methods and creating any charge or lien on the security. Upon default, certain lenders also have the right to appoint a nominee on our Board. These agreements also require us to comply with certain financial covenants and ratios. We cannot assure you that we will be able to comply with these financial or other covenants. For example, our ability to create mortgages on our assets, alter our capital structure or raise additional financing could be impacted by our failure to obtain consents from our lenders.

Our failure to obtain waivers for any existing or future non-compliance of, or our inability to comply with, such undertakings or restrictive covenants in a timely manner, or at all, could also result in an event of default under any of our financing agreements, as a result of which we may be required to immediately repay our borrowings either in whole or in part, together with any related costs. In such a scenario, we may be forced to sell some or all of our assets if we do not have sufficient cash or credit facilities to make repayments. Certain of our borrowings are secured against all or a portion of our assets and our secured lenders may, in the event of a default, exercise their right to sell these assets.

Moreover, a certain portion of our Land Reserves, as well as certain of our commercial and retail leased properties, are mortgaged to certain banks, and financial institutions in connection with our outstanding debt facilities. We have also securitized our rent receivables, pursuant to which banks grant us loans against future lease income. Such loans are with recourse to us and in the event a tenant does not pay or delays the lease payment, we are obliged to make good the shortfall. Many of our loan agreements may allow our lenders to call upon additional security. Further, under the terms of certain of our loan agreements, the relevant lender can appoint a nominee director on our Board on occurrence of an event of default. Furthermore, certain of our financing arrangements contain cross default provisions which could automatically trigger defaults under other financing arrangements, in turn magnifying the effect of an individual default. If any of these events occur, our business, reputation and financial condition may be materially and adversely affected.

23. Our success depends in large part upon our qualified personnel, including our senior management, directors and key personnel and our ability to attract and retain them when necessary.

Our operations are dependent on our ability to attract and retain qualified personnel. While we believe that we currently have adequate qualified personnel, we may not be able to continuously attract or retain such personnel, or retain them on acceptable terms, given the demand for such personnel. The loss of the services of our qualified personnel may adversely affect our business, results of operations and financial condition. We may require a long period of time to hire and train replacement personnel when qualified personnel

terminate their employment with our Company. We may also be required to increase our levels of employee compensation more rapidly than in the past to remain competitive in attracting the qualified employees that our business requires.

Further, our senior management team is integral to the success of our business. However, we cannot assure you that we will be able to retain any or all of our management team or successfully find and recruit qualified personnel to replace any members of our senior management team who may leave our Company in the future. Any loss of our senior management or key personnel or our inability to recruit further senior managers or other key personnel could impede our growth by impairing our day-to-day operations and hindering our development of ongoing and planned projects and our ability to develop, maintain and expand customer relationships. Additionally, any leadership transition that results from the departure of any members of our senior management team and the integration of new personnel may be difficult to manage and may cause operational and administrative inefficiencies, decreased productivity amongst our employees and loss of personnel with deep institutional knowledge, which could result in significant disruptions to our operations. We will be required to successfully integrate new personnel with our existing teams in order to achieve our operating objectives and changes in our senior management team may affect our results of operations as new personnel become familiar with our business.

24. There are material outstanding legal proceedings involving our Company and Subsidiaries.

There are material outstanding legal proceedings involving our Company and our Subsidiaries. These proceedings are pending at different levels of adjudication before various courts, tribunals, enquiry officers and appellate tribunals.

A summary of outstanding litigations involving our Company, Subsidiaries, Directors and Promoters, in accordance with the materiality policy approved by Finance and Investment Committee of the Board, solely for the purpose of the Issue pursuant to its resolution dated December 14, 2023 and as disclosed in the section titled “Legal Proceedings” on page 237, are as follows:

Further, Grandstar Realty Private Limited, a Subsidiary of our Company, is also party to a petition filed under Section 7 of the IBC, wherein the petitioners, Manab Datta and others, have sought the initiation of the corporate insolvency resolution process (“CIRP”) against Grandstar Realty Private Limited. While the NCLT had ordered the initiation of the CIRP, the NCLAT vide its order dated October 16, 2023, directed that the committee of creditors shall not be constituted, in relation to the CIRP. For further details, please see “Legal Proceedings – Litigation involving our Subsidiaries – Litigation against our Subsidiaries - Civil proceedings above the Civil Materiality Threshold” on page 239. Such proceedings could divert management time, attention, and consume financial resources in their defence or prosecution. Should any new developments

arise, such as any rulings against us by appellate courts or tribunals, we may need to make provisions in our financial statements that could increase expenses and current liabilities. Further, an adverse outcome in any of these proceedings may affect our reputation, standing and future business, and could have an adverse effect on our business, prospects, financial condition and results of operations. We cannot assure you that any of these proceedings will be decided in favour of our Company or Subsidiaries or that no further liability will arise out of these proceedings. Furthermore, we may not be able to quantify all the claims in which we are involved. We cannot assure you that the provisions we have made for litigation will be sufficient or that further litigation will not be brought against us in the future. Failure to successfully defend these or other claims or if our current provisions prove to be inadequate, our business and results of operations could be adversely affected. Even if we are successful in defending such cases, we will be subjected to legal and other costs relating to defending such litigation, and such costs could be substantial. This could adversely affect our business, cash flows, financial condition, and results of operation.

Further, in the past, certain complaints have been made against our Company, and against certain Subsidiaries by our customers and service providers. We cannot assure you that no further complaints would be received by our Company or our Subsidiaries. Any additional complaints in the future could divert management time, attention, and consume financial resources in their defence. An adverse outcome in any additional complaints may affect our reputation and have an adverse effect on our business, prospects, results of operations and financial condition.

25. *We may be subject to third-party indemnification, liability claims or invocation of guarantees, which may adversely affect our business, cash flows, results of operations and reputation.*

Some of the agreements that we have entered into with third parties place indemnity obligations on us that require us to compensate such third parties for loss or damage suffered by them on account of a default or breach by us. In the event that such third parties successfully invoke these indemnity clauses under their respective agreements, we may be liable to compensate them for loss or damage suffered in respect of such agreements, which may adversely affect our financial condition. We may be subject to claims resulting from defects in our developments, including claims brought under the RERA and other state-specific acts and rules made thereunder. For details concerning litigation involving claims from defaults involving our developments, see “*Legal Proceedings*” beginning on page 237. We may also be exposed to third-party liability claims for injury or damage sustained on our properties. These liabilities and costs could have an adverse effect on our business, cash flows, results of operations and reputation.

26. *We may suffer uninsured losses or experience losses exceeding our insurance limits. Consequently, we may have to make payments to cover our uninsured losses, which could have an adverse effect on our financial condition.*

We typically insure our projects to the extent of their respective full cost of construction. As of September 30, 2023, we have insurance coverage for 20.12% of the total assets of our Company as per the Unaudited Consolidated Financial Results. We are not able to and are not required to insure our land reserves as we have not completed development. Our land reserves used in our ongoing and planned projects constituted 57% of our total assets as per the Unaudited Consolidated Financial Results as of September 30, 2023.

Our real estate projects could suffer physical damage from fire or other causes, resulting in losses, which may not be fully compensated by insurance. In addition, there are certain types of losses, such as those due to earthquakes, floods, other natural disasters, terrorism or acts of war, which may be uninsurable or are not insurable at a reasonable premium. We may also be subject to claims resulting from defects. The proceeds of any insurance claim with respect to insurance that either we or our contractors have taken may be insufficient to cover any expenses faced by us including higher rebuilding costs as a result of inflation, changes in building regulations, environmental issues and other factors. Should an uninsured loss or a loss in excess of insured limits occur, we may lose the capital invested in and the anticipated revenue from the affected property. We could also remain liable for any debt or other financial obligation related to that property. We cannot assure you that losses in excess of insurance proceeds will not occur in the future.

In addition, any payments we may make to cover any uninsured loss may have an adverse effect on our business, financial condition and results of operations. If we suffer any losses, damages and liabilities in the course of our operations and real estate development, we may not have sufficient insurance or funds to cover any such losses. In addition, any payment we may make to cover any uninsured losses, damages or liabilities could have an adverse effect on our business, financial condition and results of operations. Further, we may

not carry insurance coverage for all our projects. We may have to bear the costs associated with any damage suffered by us in respect of these uninsured projects or uninsured events.

- 27. We have certain contingent liabilities, which, if they materialize, may adversely affect our results of operations, financial conditions and cash flows. Further, as of September 30, 2023, March 31, 2023, 2022, 2021, our ratio of total liabilities plus contingent liabilities to net worth was 0.54, 0.80, 0.61, and 0.53 respectively.**

The following table sets forth certain information relating to our consolidated contingent liabilities as of September 30, 2023:

Particulars	As at March 31, 2023 (In ₹ crores)
Claims against the Group not acknowledged as debts	7.55
Income tax demands disputed in appellate proceedings	28.48
Disputed demands in respect of indirect taxes	2.17
Bonds/Guarantee given to custom authorities for custom duty saved on import of capital goods under EPCG scheme	3.31
Guarantees given by Banks:	
Guarantees given to town and country planning, Haryana, towards external/internal development work	31.70
Guarantees given to Gurugram Metropolitan Development Authority Gurugram, Haryana, towards switching station and feeder work	0.11
Guarantees given to Ministry of Food Processing Industries, towards performance security for Agro Processing Cluster Development Project by Project Implementing Agency	0.50
Borrowings by affiliate companies whose loans have been guaranteed by the Company at the close of the year	41.10

As of September 30, 2023, March 31, 2023, 2022 and 2021, our ratio of total liabilities plus contingent liabilities to net worth was 0.54, 0.80, 0.61, and 0.53 respectively. If a significant portion of our contingent liabilities materialize, it could have an adverse effect on our results of operations, financial condition and cash flows. For details, see “*Management’s Discussion and Analysis of Financial Condition and Results of Operations*” on page 86.

- 28. Compliance with and changes in environmental, health and safety and labour laws and regulations could adversely affect the development of our projects and our financial condition.**

We are subject to environmental, health and safety regulations in the ordinary course of our business. If we face any environmental concerns during the development of a project or if the government introduces more stringent regulations, we may incur delays in our estimated timelines and may need to incur additional expenses. Failure to comply with these laws can result in penalties or other sanctions.

Environmental reports that we may request a third party to prepare with respect to any of our properties may not reveal (i) all environmental liabilities, (ii) that any prior owner or operator of our properties did not create or comply any material environmental condition not known to us or (iii) that a material environmental condition does not otherwise exist as to any one or more of our properties. There also exists the risk that material environmental conditions, liabilities or compliance concerns may have arisen after the review was completed or may arise in the future. Finally, future laws, ordinances or regulations and future interpretations of existing laws, ordinances or regulations may impose additional material environmental liability. We may be subject to liabilities or penalties relating to environmental matters, which could adversely affect the development of our projects and our financial condition.

- 29. Increase in competition in the Indian real estate sector, especially in the Delhi and NCR’s real estate market may adversely affect our profitability.**

Our business faces competition from both national and local property developers with respect to factors such as location, procuring raw materials, facilities and supporting infrastructure, services and pricing. Intensified competition between property developers may result in increased land prices, oversupply of properties, lower real estate prices, and lower sales at our properties, all of which may adversely affect our business. This may in turn lead to increased competition for location, services and customers, resulting in lower real estate prices

and lower sales of our properties. Moreover, we cannot assure you that we will be able to compete successfully in the future against our existing or potential competitors or that increased competition will not have an adverse effect on our profitability. For details in relation to our competition, see “Our Business – Competition” on page 174.

30. *Our operations and our workforce are exposed to various natural disasters, hazards and risks that could result in material liabilities, increased expenses and diminished revenues.*

We conduct various site studies prior to the acquisition of any area of land and its construction and development. However, there are certain unanticipated or unforeseen risks that may arise in the course of property development due to adverse weather and geological conditions such as storms, hurricanes, lightning, floods, landslides and earthquakes.

Additionally, operations at construction sites are subject to hazards inherent in providing architectural and construction services, such as the risk of equipment failure, work accidents, fire or explosion. Many of these hazards can cause injury and loss of life, severe damage to and destruction of property and equipment and environmental damage. Occurrence of any such events could adversely effect on our business and reputation. None of our employees have suffered injuries and loss of life at our project sites in the last three years. We cannot assure you that we will not bear any liability as a result of these hazards.

31. *Our business and results of operations could be adversely affected by the incidence and rate of property taxes and stamp duties.*

As a property owning and development company, we are subject to the property tax regime in the geographies that we operate in. We are also subject to stamp duty for the agreements entered into in respect of the properties we buy and sell. These taxes could increase in the future, and new types of property taxes, stamp duties may be introduced which would increase our overall costs. If these property taxes and stamp duties increase, the cost of buying and selling properties may rise. Additionally, if stamp duties or higher stamp duties were to be levied on instruments evidencing transactions which we believe are currently subject to nil or lesser duties, our acquisition costs and sale values may be affected, resulting in a reduction of our profitability. Any such changes in the incidence or rates of property taxes or stamp duties could have an adverse effect on our business and results of operations.

32. *Changing laws, rules and regulations and legal uncertainties, including the withdrawal of certain benefits or adverse application of tax laws, may adversely affect our business, prospects and results of operations.*

In India, our business is governed by various laws and regulations including the Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013, the RERA and the rules made thereunder, including state specific rules, the Delhi Land Revenue Act, 1954, the Delhi and Ajmer Land Development Act, 1948, as amended, and rules made thereunder, the Indian Stamp Act, 1899, as amended, the Indian Registration Act, 1908, as amended, Haryana Development and Regulation of Urban Areas Act 1975, as amended, the Environment (Protection) Act, 1986 and the Consumer Protection Act, 2019, as amended. Our business could be adversely affected by any change in laws, municipal plans or interpretation of existing laws, or promulgation of new laws, rules and regulations applicable to us.

33. *Our ability to pay dividends in the future may be affected by any material adverse effect on our future earnings, financial condition or cash flows.*

Although our Company has declared dividends in the past, our ability to pay dividends in the future will depend on our earnings, financial condition, cash flow, working capital requirements, capital expenditure and restrictive covenants of our financing arrangements. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board and will depend on factors that our Board deems relevant, including among others, our future earnings, financial condition, cash requirements, business prospects and any other financing arrangements. We cannot assure you that we will be able to pay dividends in the future.

34. *We will continue to be controlled by our Promoters after completion of the Issue and potential conflicts of interest may exist or arise as a result.*

As of the date of this Preliminary Placement Document, our Promoters, along with members of the promoter group of our Company, hold 63.30% of the paid-up equity share capital of our Company. After this Issue, our Promoters will continue to exercise significant control or exert significant influence over us which will allow them to vote together in capacity as shareholders of the Company on certain matters in general meetings of the Company. Accordingly, the interests of our Promoters and certain members of the Promoter Group in capacity as shareholders of the Company may conflict with your interests and the interests of other shareholders of the Company. Further, a member of our promoter group is being issued fully convertible warrants for an amount of ₹49.99 crores through the Fund Raise by our Company. For further details, see “- Our Company may undertake a preferential issue of Equity Shares after completion of the Issue which is subject to the corporate approvals and other considerations” on page 54.

35. *We have entered into, and may in the future enter into, certain related party transactions; although these transactions were on arms’ length terms, we cannot assure you that we could not have achieved more favorable terms had such transactions been entered into with unrelated parties or that we will be able to recover the amounts due from related parties.*

We have entered into transactions with related parties in the past and are likely to do so in the future. For the six month period ended September 30, 2023 and for Fiscal 2023, our related party transactions in our financial statements amounted to ₹97.02 crore, and ₹240.39 crore, respectively. These also include loans from the directors of our Company. For further details, see “*Related Party Transactions*” on page 44. We cannot assure you that we could not achieve more favourable terms if such transactions were not entered into with related parties. We cannot assure you that such transactions, individually or in the aggregate, will not have an adverse effect on our results of operations and financial condition. These related party transactions also include certain loans taken from the Directors of our Company.

Further, our Company is subject to risks in connection with loans to its related parties (including jointly Controlled Entity) aggregating to ₹521.47 crore as of September 30, 2023. From time to time, our Company also guarantees certain debt of its subsidiaries and affiliates. Such advances and borrowings could be unsecured or without a fixed maturity date.

Our Company’s ability to pay its obligations may depend on its Subsidiaries and affiliates repaying the loans and advances it has made to them on demand. Our Company’s Subsidiaries and affiliates’ ability to make repayments to it will depend on their operating results and will be subject to applicable laws and contractual restrictions. Further, the ability of our Company to pay its obligations may be adversely affected by the performance of these subsidiaries and affiliates. Our Company has given total loans and guarantees of ₹562.25 crore and ₹539.89 crore, respectively, to related parties as of September 30, 2023 and Fiscal 2023, where all such loans are unsecured. For details, see “*Financial Information*” on page 244. Some of our Subsidiaries or our Jointly Controlled Entity for whose benefit we have provided guarantees may incur losses which affects their ability to repay loans. There is no assurance that any failure or delay by our Company’s subsidiaries or affiliates to repay such loans and advances to it will not result in an adverse effect on our results of operation and financial condition.

36. *Our Promoters, Directors, Key Managerial Personnel and members of Senior Management have interests in us other than the reimbursement of expenses incurred and normal remuneration and benefits.*

Our Promoters, Directors, Key Managerial Personnel and members of Senior Management may be deemed to be interested to the extent of Equity Shares held by them, directly or indirectly, in our Company and its Subsidiaries, as well as to the extent of any dividends, bonuses or other distributions on such shareholding. For details, see “*Capital Structure*” on page 81.

We cannot assure you that the interests of our Promoters, Directors and our Key Managerial Personnel, if they are also our shareholders, will not conflict with your interests or the interests of the other shareholders of our Company. For details, see “*Board of Directors and Senior Management – Shareholding of the Key Managerial Personnel and Senior Management*” on page 181.

37. Certain information contained in this Preliminary Placement Document including that in relation to our ongoing projects, planned projects and the area expressed to be covered by our projects based on management estimates and may be subject to change.

Certain statements contained in this Preliminary Placement Document with respect to our completed projects, near-completion projects, ongoing projects and planned projects, such as the amount of land or development rights owned by us, the location and type of development, the Saleable area, the Leasable area, the Developable area, internal floor area and efficiency ratio, estimated construction commencement and completion dates, estimated construction costs and our funding requirements, are based solely on assumptions, management estimates and our business plan, and have not been verified by any bank or financial institution.

The total area of property that is ultimately developed and the actual total Saleable area may differ from the descriptions of the property presented herein and a particular project may not be completely booked, sold, leased or developed until a date subsequent to the expected completion date. In certain instances, there may be a discrepancy between the areas mentioned in the revenue records, the area mentioned in the title deeds or the actual physical area of some of our land reserves, thereby affecting the management estimates in terms of our land reserves. Further, we are yet to obtain requisite approvals in relation to the part construction of certain of our projects as the development thereof is planned to be carried out in a phased manner. However, we cannot assure you that we will be able to acquire all or part of the contiguous land or obtain approvals in a form similar or better in terms to our existing approvals in respect of our completed projects, near-completion, ongoing projects and planned projects for such land reserves in time for its development or at all. Failure to obtain requisite approvals for any reason including changes in law or development policy of the relevant authorities, may adversely affect our calculations such as that of Saleable Area and Developable Area in relation to our land reserves. As a result, we may have to revise our funding estimates, development plans (including the type of proposed development) and the estimated construction commencement and completion dates of our projects depending on future contingencies and events, including:

- changes in laws and regulations;
- court orders restricting or impairing constructions;
- competition;
- receipt of statutory and regulatory approvals and permits in time, or at all;
- irregularities or claims with respect to title to land or agreements related to the acquisition of land;
- the ability of third parties to complete their services on schedule and within estimated budgets;
- delays, cost overruns or modifications to our ongoing and planned projects;
- natural disasters and force majeure events;
- outbreak of infectious diseases such as COVID-19;
- commencement of new projects and new initiatives; and
- changes in our business plans due to prevailing economic and market conditions.

Further, we lease out certain portions of our near-completion projects for which we have not applied for regulatory approvals. In case of any non-compliance, we may be subject to regulatory, statutory and contractual penalties including termination of lease agreements.

Additionally, certain of the land within our completed projects, near-completion, ongoing projects and planned projects are subject to disputes in relation to the title to such land. If such disputes are not settled in our favour, or if we are unable to obtain clear title to such land in time, or at all, we may not be able to deliver all or some of the estimated Saleable and Developable Area calculated by us in respect of such projects. For further details, see “*Legal Proceedings*” on page 237.

We have created mortgages over several properties forming part of our ongoing projects (extending to both underlying land and unsold units). If we are unable to satisfactorily clear these charges, the mortgages will be

foreclosed against the security (which is the underlying land and unsold units) and we will lose our title over such properties and may not be able to recover the full value in respect of such properties.

In addition, historical profitability of our projects may not be indicative of any future profitability of our ongoing and planned projects. The profitability of our projects could fluctuate significantly over time based in part on the timing of the project cycle. In addition, we may not develop all of our land bank, and we may lease a portion of our land bank to other development companies. Accordingly, our future revenue may not correspond to the remaining land reserves.

38. We have referred to the data derived from the industry report commissioned from Cushman and Wakefield.

We have commissioned the services of an independent third-party research agency, Cushman & Wakefield and have relied on the report titled “Multiple asset classes across Delhi-NCR” dated December 21, 2023 for industry-related data in this Preliminary Placement Document. This report uses certain methodologies for market sizing and forecasting. Neither we nor the Book Running Lead Manager has independently verified such data and therefore, while we believe them to be true, we cannot assure you that they are complete or reliable. Accordingly, investors should read the industry related disclosure in this Preliminary Placement Document in this context. Industry sources and publications are also prepared based on information as of specific dates and may no longer be current or reflect current trends. Industry sources and publications may also base their information on estimates, projections, forecasts and assumptions that may prove to be incorrect. While industry sources take due care and caution while preparing their reports, they do not guarantee the accuracy, adequacy or completeness of the data. Accordingly, investors should not place undue reliance on, or base their investment decision solely on this information.

39. Our revenues and profits are difficult to predict and can vary significantly from period to period.

We derive our revenues and profits primarily from the sale of residential and commercial properties and the leasing of commercial properties. While rental income may be relatively predictable, revenues from sales are dependent on various factors such as the size of our developments, competition, demand for our developments in the regions where we operate, the rights of third parties, receipt of approvals from governmental authorities and general market conditions. A combination of these and other factors may result in significant variations in our revenues and profits, and our financial position in a particular period may not accurately reflect our level of activity in that period. Similarly, our level of activity for a particular period may not accurately reflect our financial position in that period. Therefore, we believe that period-to-period comparisons of our results of operations are not necessarily meaningful and should not be relied upon as indicative of our future performance. If in the future our results of operations are below market expectations, the price of the Equity Shares could decline.

40. A downgrade in our credit ratings could materially adversely affect our business and financial condition and our ability to raise capital in the future

Our Company has received the following credit ratings from Infomerics Rating and Valuation Private Limited vide its press release dated August 18, 2023:

Particulars	Ratings
Long term banking facilities	IVR BBB-/Stable
Long term/ Short term banking facilities	IVR A3

Our credit ratings, which are intended to measure our ability to meet our debt obligations, are a significant factor in determining our finance costs. The interest rates of certain of our borrowings may be significantly dependent on our credit ratings. A downgrade of our credit ratings could lead to greater risk with respect to refinancing our debt and would likely increase our cost of borrowing and adversely affect our business, financial condition, results of operations and prospects.

41. Any failure in our information technology systems could adversely affect our business.

We use information and communication technologies for the execution and management of our projects. Any delay in implementation or disruption of the functioning of our information technology systems could affect our ability to assess the progress of our projects, process financial information, manage creditors or debtors or

engage in normal business activities including online sales. Any such disruption could have an adverse effect on our business.

External Risk Factors

Risks Related to India

42. Our business is substantially affected by prevailing economic, political and other prevailing conditions in India.

We are incorporated in and substantially all our operations are located in India. As a result, we are highly dependent on prevailing economic conditions in India and our results of operations are significantly affected by factors influencing the Indian economy. Factors that may adversely affect the Indian economy, and hence our results of operations, may include:

- any increase in Indian interest rates or inflation;
- any exchange rate fluctuations;
- any scarcity of credit or other financing in India, resulting in an adverse impact on economic conditions in India and scarcity of financing for our expansions;
- prevailing income conditions among Indian consumers and Indian corporates;
- volatility in, and actual or perceived trends in trading activity on, India's principal stock exchanges;
- changes in India's tax, trade, fiscal or monetary policies;
- political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighbouring countries;
- occurrence of natural or man-made disasters;
- outbreak of an infectious disease such as COVID-19;
- prevailing regional or global economic conditions, including in India's principal export markets;
- any downgrading of India's debt rating by a domestic or international rating agency;
- financial instability in financial markets; and
- other significant regulatory or economic developments in or affecting India or its construction sector.

Moreover, a fall in the purchasing power of our customers, for any reason whatsoever, including rising consumer inflation, availability of financing to our customers, changing governmental policies and a slowdown in economic growth may have an adverse effect on our customers' income, savings and could in turn negatively affect their demand for our products. For example, in 2016, the Reserve Bank of India and the Ministry of Finance of the Government of India introduced demonetization policies, leading to a short-term decrease in liquidity of cash in India, which had in turn negatively affected consumer spending. Although there have been minimal short-term effects on our day-to-day business, the medium-term and long-term effects of demonetization on our business are uncertain and we cannot accurately predict the effect thereof on our business, results of operations, financial condition and prospects.

In addition, any slowdown or perceived slowdown in the Indian economy, or in specific sectors of the Indian economy, could adversely affect our business, results of operations and financial condition and the price of the Equity Shares.

Further, conditions outside India, such as slowdowns in the economic growth of other countries, could have an impact on the growth of the Indian economy and government policy may change in response to such conditions. The Indian economy and financial markets are also significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, especially in the United States, France, Europe or China or Asian emerging market countries, may have an impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss of investor

confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets, and could have an adverse effect on our business, financial condition and results of operations and the price of the Equity Shares.

43. *Land is subject to compulsory acquisition by the government and compensation in lieu of such acquisition may be inadequate.*

The right to own property in India is subject to restrictions that may be imposed by the Government from time to time. In particular, the Government under the provisions of the Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013 (the “Land Acquisition Act”) has the right to compulsorily acquire any land if such acquisition is for a “public purpose,” after providing compensation to the owner. However, the compensation paid pursuant to such acquisition may not be adequate to compensate the owner for the loss of such property. The likelihood of such acquisitions may increase as central and state governments seek to acquire land for the development of infrastructure projects such as roads, railways, airports and townships. Additionally, we may face difficulties in interpreting and complying with the provisions of the Land Acquisition Act due to limited jurisprudence on them or if our interpretation differs from or contradicts any judicial pronouncements or clarifications issued by the government. In the future, we may face regulatory actions or we may be required to undertake remedial steps. Any such action in respect of any of the projects in which we are investing or may invest in the future may adversely affect our business, financial condition or results of operations.

44. *Investors may not be able to enforce a judgement of a foreign court against our Company.*

Our Company is incorporated under the laws of India. Our Company’s assets are primarily located in India and a majority of our Board of Directors and Key Managerial Personnel are residents of India. As a result, it may not be possible for investors to effect service of process upon our Company or such persons in jurisdictions outside India, or to enforce against them judgments obtained in courts outside India. Moreover, it is unlikely that a court in India would award damages on the same basis as a foreign court if an action were brought in India or that an Indian court would enforce foreign judgments if it viewed the amount of damages as excessive or inconsistent with Indian public policy.

In addition, India is not a signatory to any international treaty in relation to the recognition or enforcement of foreign judgments. However, recognition and enforcement of foreign judgments is provided for under Section 13 and Section 44A of the Civil Procedure Code. Moreover, it is unlikely that a court in India would award damages on the same basis as a foreign court if an action were brought in India or that an Indian court would enforce foreign judgments if it viewed the amount of damages as excessive or inconsistent with Indian public policy.

Further, a party seeking to enforce a foreign judgment in India is required to obtain approval from RBI under the Foreign Exchange Management Act, 1999 to repatriate outside India any amount recovered pursuant to execution. Any judgment in a foreign currency would be converted into Indian rupees on the date of the judgment and not on the date of the payment. We cannot predict whether a suit brought in an Indian court will be disposed of in a timely manner or be subject to considerable delays.

45. *Restrictions on foreign direct investments (“FDI”) and external commercial borrowings in the real estate sector may hamper our ability to raise additional capital. Further, foreign investors are subject to certain restrictions on transfer of shares.*

While the Government has permitted FDI of up to 100% without prior regulatory approval in the development of townships and in the construction of residential or commercial premises, industrial parks, roads or bridges, hotels, resorts, hospitals, educational institutions, recreational facilities, city and regional level infrastructure, and townships, it has issued a notification and imposed certain restrictions or conditionalities on such investments pursuant to Press Notes, circulars and regulations (including FEMA Rules) issued by the DPIIT or the RBI or the Ministry of Finance, Government of India, from time to time, as the case may be (collectively, the “FEMA Norms”).

In accordance with FEMA Rules, only Eligible FPIs applying under Schedule II of the FEMA Rules or a multilateral or bilateral development financial institution eligible to invest in India under applicable law are permitted to participate in the Issue. Non-residents such as FVCIs are not permitted to participate in the Issue.

As per the existing policy of the Government, OCBs cannot participate in this Issue. For more information on bids by FPIs, see “*Issue Procedure*” on page 198.

Further, under FEMA, transfers of shares between non-residents and residents are freely permitted, subject to certain restrictions, if they comply with the pricing guidelines and reporting requirements specified under the FEMA Norms. If the transfer of shares is not in compliance with such pricing guidelines or reporting requirements, prior regulatory approval of the RBI will be required. We cannot assure you that any required approval from the RBI or any other government agencies will be obtained on favourable terms, or at all.

Further, under current external commercial borrowing guidelines prescribed by the RBI, companies are required to abide by restrictions including minimum maturity, permitted and non-permitted end-uses, maximum all-in-cost ceiling. Our inability to raise additional capital as a result of these and other restrictions could adversely affect our business and prospects.

46. *Investors can be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares or dividend paid thereon.*

Under current Indian tax laws, capital gains arising from the sale of Equity Shares in an Indian company are generally taxable in India. However, any gain realized on the sale of listed equity shares on or before March 31, 2018 on a stock exchange held for more than 12 months will not be subject to long term capital gains tax in India if Securities Transaction Tax (“STT”) is paid on the sale transaction and additionally, as stipulated by the Finance Act, 2017, STT had been paid at the time of acquisition of such equity shares on or after October 1, 2004, except in the case of such acquisitions of equity shares which are not subject to STT, as notified by the Central Government under notification no. 43/2017/F. No. 370142/09/2017-TPL on June 5, 2017. However, the Finance Act, 2018 levies taxes on such long-term capital gains exceeding ₹100,000 arising from sale of Equity Shares on or after April 1, 2018, while continuing to exempt the unrealized capital gains earned up to January 31, 2018 on such Equity Shares. Accordingly, an investor may be subject to payment of long-term capital gains tax in India, in addition to payment of STT, on the sale of any Equity Shares held for more than 12 months. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold.

Further, the Finance Act, 2020 has, amongst others things, provided a number of amendments to the direct and indirect tax regime, including a simplified alternate direct tax regime and that dividend distribution tax (“DDT”) will not be payable in respect of dividends declared, distributed or paid by a domestic company after March 31, 2020, and accordingly, such dividends would not be exempt in the hands of the shareholders, both resident as well as non-resident and are likely be subject to tax deduction at source. The Company may or may not grant the benefit of a tax treaty (where applicable) to a non-resident shareholder for the purposes of deducting tax at source from such dividend. Investors should consult their own tax advisors about the consequences of investing or trading in the Equity Shares.

Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax in India. Capital gains arising from the sale of the Equity Shares will be exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India’s ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares.

Further, the Government of India has notified the Finance Act, 2023, which has introduced various amendments to the Income Tax Act, 1961. There is no certainty on the impact that the Finance Act, 2023 may have on our business and operations. We cannot predict whether any tax laws or other regulations impacting us will be enacted or predict the nature and impact of any such laws or regulations or whether, if at all, any laws or regulations would have a material adverse effect on our business, financial condition, results of operations and cash flows.

47. *Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.*

Our Articles of Association and Indian law govern our corporate affairs. Indian legal principles related to corporate procedures, directors’ fiduciary duties and liabilities, and shareholders’ rights may differ from those that would apply to a company in another jurisdiction. Shareholders’ rights including in relation to class

actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction.

48. *We may be affected by competition law in India and any adverse application or interpretation of the Competition Act could in turn adversely affect our business.*

The Competition Act, 2002 ("Competition Act") was enacted for the purpose of preventing practices that have or are likely to have an adverse effect on competition in India and has mandated the Competition Commission of India ("CCI") to regulate such practices. Under the Competition Act, any arrangement, understanding or action, whether formal or informal, which causes or is likely to cause an appreciable adverse effect on competition is void and attracts substantial penalties.

Further, any agreement among competitors which, directly or indirectly, involves determination of purchase or sale prices, limits or controls production, shares the market by way of geographical area or number of subscribers or directly or indirectly results in bid-rigging or collusive bidding in the relevant market is presumed to have an appreciable adverse effect in the relevant market in India and shall be void. The Competition Act also prohibits abuse of a dominant position by any enterprise. On March 4, 2011, the Central Government notified and brought into force the combination regulation (merger control) provisions under the Competition Act with effect from June 1, 2011. These provisions require acquisitions of shares, voting rights, assets or control or mergers or amalgamations that cross the prescribed asset and turnover based thresholds to be mandatorily notified to, and pre-approved by, the CCI. Additionally, on May 11, 2011, the CCI issued the Competition Commission of India (Procedure for Transaction of Business Relating to Combinations) Regulations, 2011, as amended, which sets out the mechanism for implementation of the merger control regime in India. The Competition Act aims to, among other things, prohibit all agreements and transactions which may have an appreciable adverse effect in India. Further, the CCI has extra-territorial powers and can investigate any agreements, abusive conduct or combination occurring outside of India if such agreement, conduct or combination has an appreciable adverse effect in India. However, the impact of the provisions of the Competition Act on the agreements entered into by us cannot be predicted with certainty at this stage. We do not have any outstanding notices in relation to non-compliance with the Competition Act or the agreements entered into by us.

However, if we are affected, directly or indirectly, by the application or interpretation of any provision of the Competition Act, or any enforcement proceedings initiated by the CCI, or any adverse publicity that may be generated due to scrutiny or prosecution by the CCI or if any prohibition or substantial penalties are levied under the Competition Act, it would adversely affect our business.

49. *Significant differences exist between Ind AS used to prepare our financial information and other accounting principles, such as IFRS and U.S. GAAP, with which investors may be more familiar.*

Our financial statements included in this Preliminary Placement Document are prepared and presented in conformity with Ind AS. Ind AS differ in certain respects from U.S. GAAP, IFRS and other accounting principles and standards. We have not attempted to quantify the impact of U.S. GAAP or IFRS on the financial information included in this Preliminary Placement Document nor do we provide for a reconciliation of the financial information included in this Preliminary Placement Document to those of U.S. GAAP or IFRS. If we were to prepare our financial statements in accordance with such other accounting principles, our results of operations, financial condition and cash flows may be substantially different. Accordingly, the degree to which financial information included in this Preliminary Placement Document will provide meaningful information is entirely dependent on investor's familiarity with Indian accounting principles. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Preliminary Placement Document should accordingly be limited.

Risks Related to the Equity Shares and the Issue

50. *The trading volume and market price of the Equity Shares may be volatile following the Issue, and you may not be able to sell your Equity Shares at or above the Issue Price.*

The Indian securities markets are smaller and more volatile than securities markets in more developed economies. The Indian stock exchanges have in the past experienced substantial fluctuations in the prices of

listed securities. The governing bodies of the Indian stock exchanges have from time to time imposed restrictions on trading in certain securities, limitations on price movements and margin requirements. The market price of the Equity Shares may decline or fluctuate significantly due to a number of factors, some of which may be beyond our control, including:

- actual or anticipated fluctuations in our operating results;
- announcements about our earnings that are not in line with analyst expectations;
- the public's reaction to our press releases, other public announcements and filings with the regulator;
- significant liability claims, complaints from our customers, shortages or interruptions in the availability of raw materials, or reports of incidents of tampering of raw materials;
- changes in senior management or key personnel;
- macroeconomic conditions in India;
- fluctuations of exchange rates;
- the operating and stock price performance of comparable companies;
- changes in our shareholder base;
- changes in our dividend policy;
- issuances, exchanges or sales, or expected issuances, exchanges or sales;
- changes in accounting standards, policies, guidance, interpretations or principles; and
- changes in the regulatory and legal environment in which we operate;

Any of these factors may result in large and sudden changes in the volume and trading price of the Equity Shares. We cannot assure you that you will be able to resell your Equity Shares at or above the Issue Price. We cannot assure you that an active trading market for the Equity Shares will be sustained after this Issue, or that the price at which the Equity Shares have historically traded will correspond to the price at which the Equity Shares will trade in the market subsequent to this Issue.

51. Holders of Equity Shares may be restricted in their ability to exercise pre-emptive rights under Indian law and thereby suffer future dilution of their ownership position.

Under the Companies Act, a company incorporated in India must offer its equity shareholders pre-emptive rights to subscribe and pay for a proportionate number of equity shares to maintain their existing ownership percentages prior to issuance of any new equity shares, unless the pre-emptive rights have been waived by the adoption of a special resolution by shareholders of such company.

However, if the law of the jurisdiction that you are in does not permit the exercise of such pre-emptive rights without us filing a placement document or registration statement with the applicable authority in such jurisdiction, you will be unable to exercise such pre-emptive rights, unless we make such a filing. If we elect not to make such a filing, the new securities may be issued to a custodian, who may sell the securities for your benefit. The value that such custodian would receive upon the sale of such securities, if any, and the related transaction costs cannot be predicted. To the extent that you are unable to exercise pre-emptive rights granted in respect of the Equity Shares, your proportional interests in our Company may be reduced.

52. Fluctuations in the exchange rate between the Rupee and the U.S. dollar could have an adverse effect on the value of the Equity Shares, independent of our operating results.

The Equity Shares are quoted in Rupees on the Stock Exchanges. Any dividends in respect of the Equity Shares will be paid in Rupees and subsequently converted into U.S. dollars for repatriation. Any adverse movement in exchange rates during the time it takes to undertake such conversion may reduce the net dividend to investors. In addition, any adverse movement in exchange rates during a delay in repatriating the proceeds from a sale of Equity Shares outside India, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares, may reduce the net proceeds received by shareholders. The exchange rate between the Rupee and the U.S. dollar has changed substantially in the last two decades and could fluctuate

substantially in the future, which may have an adverse effect on the value of the Equity Shares and returns from the Equity Shares, independent of our operating results.

53. An investor will not be able to sell any of the Equity Shares subscribed in the Issue other than on a recognized Indian stock exchange for a period of one year from the date of allotment of such Equity Shares.

Pursuant to the SEBI ICDR Regulations, for a period of one year from the date of the allotment of the Equity Shares in the Issue, investors subscribing for the Equity Shares in the Issue may only sell such Equity Shares on NSE or BSE and may not enter into any off-market trading in respect of such Equity Shares. We cannot be certain that these restrictions will not have an impact on the market price of the Equity Shares. Further, allotments made to venture capital funds and alternative investment funds in the Issue are subject to the rules and regulations that are applicable to them, including in relation to lock-in requirements. This may affect the liquidity of the Equity Shares subscribed by investors and it is uncertain whether these restrictions will adversely impact the market price of the Equity Shares subscribed by investors.

54. Any downgrading of India's sovereign debt rating by a domestic or international rating agency could adversely affect our ability to obtain financing and, in turn, adversely affect our business.

Our customers' and our borrowing costs and access to the debt capital markets depend significantly on the credit ratings of India. Any adverse revision to India's credit rating for domestic and international debt by international rating agencies may adversely impact our ability to raise additional finances at favourable interest rates and other commercial terms. This could have an adverse effect on our growth, financial performance and our operations.

*To be determined upon finalisation of the Issue Price and updated in the Placement Document. The amount utilised for general corporate purposes shall not exceed 25% of the Gross Proceeds.

The funding requirements, deployment of funds and the intended use of Net Proceeds indicated above is based on management estimates, current circumstances of our business, our existing business plans, the certificates dated January 12, 2024 from our Statutory Auditors, M/s Ranjana Vandana & Co, Chartered Accountants, prevailing market conditions, and other commercial and technical factors. Given the nature of our business, we may have to revise our funding requirements and intended deployment schedule on account of a variety of factors such as our financial condition, business strategy, delay in procuring and operationalizing assets or necessary licenses and approvals, and external factors such as market conditions, competitive environment, price fluctuations and interest or exchange rate fluctuations and other external factors which may not be within the control of our management. Depending upon such factors, we may have to reduce or extend the deployment period for the stated objects. Subject to applicable law, if the actual utilisation towards the objects is lower than the proposed deployment, such balance will be used for general corporate purposes to the extent that the total amount to be utilized towards general corporate purposes will not exceed 25% of the Gross Proceeds. In case of a shortfall in raising requisite capital from the Net Proceeds, business considerations may require us to explore a range of options including utilising our internal accruals and seeking additional debt from existing and future lenders. We believe that such alternate arrangements would be available to fund any such shortfalls. Further, in case of variations in the actual utilization of funds earmarked for the purposes set forth above, increased fund requirements for a particular purpose may be financed by surplus funds, if any, available in respect of the other purposes for which funds are being raised in the Issue, subject to compliance with applicable laws.

Our Company proposes to deploy the entire Net Proceeds towards the Objects stated above. If the Net Proceeds are not utilized (in full or in part) for the Objects for the period stated above due to any reason, including (i) the timing of completion of the Issue; (ii) market conditions outside the control of our Company; and (iii) any other economic, business and commercial considerations, the remaining Net Proceeds shall be utilized (in part or full) in subsequent periods in such manner as may be determined by our Company, in accordance with applicable laws. Further, our Company may also utilise any portion of or the entire the Net Proceeds, towards the aforementioned Objects, ahead of the estimated schedule of deployment specified above.

Details of the Objects

1. Repayment/pre-payment, in full or in part, of certain outstanding borrowings availed by our Company

We avail majority of our fund based and non-fund based facilities in the ordinary course of business from various banks and financial institutions, including inter alia, term loans, credit facilities. The selection and extent of borrowings proposed to be repaid by our Company as mentioned below is based on various commercial considerations including, among others, the interest rate of the relevant borrowings, the amount of the borrowings outstanding, prepayment charges, and the remaining tenor of the borrowings. The scheduled prepayment and/or repayment will help us reduce our outstanding indebtedness and debt servicing costs, assist us in maintaining a favourable debt to equity ratio and enable utilization of our internal accruals for further investment in business growth and expansion. In addition, the improvement in the debt to equity ratio of our Company is intended to enable us to raise further resources in the future to fund potential business development opportunities and plans to grow and expand our business in the future.

For further details of our financial and operational performance, see “— Our Strengths— Track record of consistent financial performance and growth and strengthening balance sheet” on page 163.

SIGNIFICANT FACTORS AFFECTING OUR FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Our results of operations have been, and will continue to be, affected by a number of events and actions, some of which are beyond our control. However, there are some specific items that we believe have impacted our results of operations and, in some cases, will continue to impact our results. We believe that the following factors, amongst others, have, or could have, an impact on these results, the manner in which we generate income and incur the expenses associated with generating this income. For further details of such factors, please see the sections titled “Our Business” and “Risk Factors” on pages 159 and 45, respectively.

General Economic Conditions and Fluctuations in Market Price of our Projects

We derive a substantial part of our revenue from our real estate activities in India, with a focus on the Delhi-NCR region. Accordingly, our business is heavily dependent on the performance of the Indian real estate sector, particular in the Delhi-NCR region where majority of our projects are located. As demand for new residential and commercial properties is driven by increased employment and increasing disposable income, any slowdown or perceived slowdown in the Indian economy, or in specific sectors of the Indian economy, could adversely affect our business and financial performance. The slowdown may occur for various factors beyond our control including outbreak of infectious diseases and changes in regulatory requirements. Our results of operations are also affected by changes in supply of residential and commercial projects and demand for our projects in key cities of our operations. The Delhi-NCR real estate markets may perform differently in terms of supply, absorption and selling price from real estate markets in other parts of India.

Sales Volume and Rate of Progress of Construction and Development

Our revenue from operations comprised 97.28%, 94.53 %, 95.23%, 92.14% and 92.59% of our total income for the six months ended September 30, 2023 and 2022 and the financial years 2023, 2022 and 2021 respectively.

The volume of sales depends on various factors including our ability to design projects that will meet customer preferences and market trends, to timely market our projects, the willingness of customers to pay for the projects or enter into sale agreements well in advance of receiving possession of the projects and general market conditions. We market and pre-sell our projects in phases from the date of launch of the project after receiving requisite approvals, including those required under the RERA, which is typically after acquisition of the land or land development rights, conversion of the use of land to residential and during the process of planning and designing the project, up until the time we complete our project.

Construction progress depends on various factors, including the availability of labor and raw materials, the actual cost of construction (which is particularly affected by fluctuations in the market price for steel and cement) and changes to the estimated total construction cost, the competence of and priority given to our projects by our contractors, the receipt of approvals and regulatory clearances, changes to extant regulations, access to utilities such as electricity and water, and the absence of contingencies such as litigation and adverse weather conditions.

Changes and modifications to our timelines impact our Ongoing Projects and Planned Projects, and consequently, our revenues recognized, and our business, results of operations and financial condition. For further details, see *“Risk Factors – Some or all of our ongoing and planned projects may not be completed by their expected completion dates or at all. Such delays may adversely affect our business, results of our operations and financial condition.”* on page 45.

We recognize revenue as per Ind AS 115 “Revenue from Contract with Customers”. This standard specifies the accounting for an individual contract and establishes a five-step model to account for revenue arising from contracts with customers. We believe that our contracts with customers satisfy the conditions of Ind AS 115 for recognition of revenue under point in time approach, and we therefore recognize revenue under the project completion method, which is linked to the application and receipt of occupancy certificate. For details, see *“Financial Information”* on page 244.

In accordance with Ind AS 115, revenue is recognized when control over the assets that is the subject of the contract is transferred to the customer. In the case of contracts to sell real estate assets this is generally when the unit has been handed over to the customer through a registered sale deed. We have elected to apply the input method in allocating the transaction price to performance obligations where revenue is recognized over time (in case of registered sale deeds for units in projects that are not completed). In applying the input method, we estimate the cost to complete the projects in order to determine the amount of revenue to be recognized. These estimates include the cost of providing infrastructure, potential claims by contractors as evaluated by the project consultant and the cost of meeting other contractual obligations to the customers. The revenues and profit recognized are potentially subject to adjustments in subsequent periods based on refinements in estimated costs of project completion that could affect our future revenues and profit. In addition, our revenues and costs may fluctuate from period to period due to a combination of other factors beyond our control, including registration of sales deeds in a particular period, volatility in expenses such as costs to acquire land or development rights and construction costs.

Costs of construction and development

Our cost of construction includes the cost of raw materials such as steel, cement, wood, flooring and other building materials, labour costs and cost of design and technical assistance which is directly related to the project. Raw material prices, particularly those of steel and cement, may be affected by price volatility caused by various factors that affect the Indian and international commodity markets. If there are significant price increases in construction materials, or shortages in supply, the contractors we hire for construction or development work may increase their contract prices or be unable to fulfil their contractual obligations. Increases in costs for any construction materials may affect our construction costs, and consequently the sales prices for our projects. Further, we are subject to the property tax regime and if the property taxes and stamp duties increase, the cost of buying and selling properties may rise.

In addition, the timing and quality of construction of the projects we develop depends on the availability and skill of our contractors and consultants, as well as contingencies affecting them, including labour and industrial actions, such as strikes and lockouts. Such labour and industrial actions may cause significant delays to the construction timetables for our projects and we may therefore be required to find replacement contractors and consultants at higher cost. As a result, any increase in prices may have an impact on business, operations and profitability.

Supply of land and cost of acquisition of development rights

Our growth is linked to the availability of land in areas where we intend to develop projects either by ourselves joint venture arrangements. Suitable land parcels are severely limited in the city of Delhi, our primary market. Occasionally areas of land become available, but these tend to be expensive and are often sold through an auction process. We believe that we have been

successful in obtaining agricultural land which is converted to developable land, but are not able to predict our ability to do so in the future.

Additionally, any government regulations, policies or other developments that restrict the acquisition of land or increase competition for land will affect our operations. The cost of acquiring land, which includes the amounts paid for freehold rights, leasehold rights, the cost of registration and stamp duty, represents a substantial part of our project cost, and may sometimes determine whether we acquire certain parcels of land at all. Delays in acquiring clean title, conversion of land for development purposes and other requisite approvals may delay the project development schedule and associated costs and affect our operations. Land used in a specific project is assigned to such project and is included in the cost of construction and development of such project. Such costs of land, together with costs of construction and development, are expensed for projects as and when the project is completed or receipt of approvals on completion from relevant authorities or intimation to the customer of the completion of the project.

Cost of Financing and Changes in Interest Rates

We generally fund our property development activities through mix of construction finance and structured debt from banks and other financial institutions. Though we believe we are able to obtain funding at competitive interest rates, cost of financing is material for us, as we require significant capital to develop our projects. Access to these funds affects the expenses incurred by us and impacts the development timelines of our Ongoing projects and Planned projects including our ability to plan expenditures and provide advances to obtain land development rights. Our total borrowings (consisting of current borrowings and non-current borrowings), on a consolidated basis was ₹ 1050.58 crore, ₹ 1144.99 crore, ₹ 1079.46 crore, ₹ 1255.18 crore and ₹ 1635.74 crore as of September 30, 2023, September 30, 2022, March 31, 2023, March 31, 2022 and March 31, 2021, respectively, and our finance costs were ₹15.50 crore and ₹ 14.90 crore for the six months ended September 30, 2023 and September 30, 2022, respectively, and ₹ 31.76 crore, ₹ 27.07 crore and ₹ 30.55 crore for Fiscals 2023, 2022 and 2021, respectively. See “*Risk Factors – Our business is capital intensive and requires significant expenditure for development and is therefore heavily dependent on the availability of real estate financing, which may not be available on terms acceptable to us in a timely manner or at all.*” on page 51.

One of the major drivers behind the growth of demand for housing units is rising disposable income and availability of housing loans at affordable interest rates. Changes in interest rates also affect the ability and willingness of our prospective real estate customers, particularly customers for our residential properties, to obtain financing for their purchase of our developments. The interest rate at which our real estate customers may borrow funds for the purchase of our properties affects the affordability and purchasing power of, and hence the market demand for, our residential real estate developments.

Regulatory Framework

The Indian real estate sector is heavily regulated by central, state and local governmental authorities. Regulations applicable to our operations include standards regarding land acquisition, the ratio of built-up area to land area, land usage, the suitability of building sites, road access, necessary community facilities, open spaces, water supply, sewage disposal systems, electricity supply, environmental suitability and size of the project. Approval of development plans is conditioned on, among other things, completion of the acquisition of the project site and compliance with relevant conditions. Approvals must be obtained at both the national and local levels, and our results of operations are expected to continue to be affected by the nature and extent of the regulation of our business, including the relative time and cost involved in procuring approvals for each new project, which can vary from project to project.

For example, the RERA, which was notified in March 2016, has imposed certain obligations on real estate developers, including us, such as mandatory registration of real estate projects, not issuing any advertisements or accepting advances unless real estate projects are registered under RERA, escrow of project revenues, restrictions on use of funds received from customers prior to project completion and taking customer approval for major changes in sanctioned plans. See “*Risk Factors – Our business is subject to the RERA and any non-compliance of the provisions of RERA or the applicable state specific legislations may have an adverse effect on our business, results of operations and financial condition.*” on page 53. The GST regime which took effect from July 1, 2017 and any new rules or regulations thereunder may also affect our results of operations. See “*Risk Factors – Changing laws, rules and regulations and legal uncertainties, including the withdrawal of certain benefits or adverse application of tax laws, may adversely affect our business, prospects and results of operations.*” on page 61.

Competition

We compete for land, sale of projects, manpower resources and skilled personnel with other private developers. We face competition from regional, national and international property developers. Moreover, as we seek to diversify into new

geographies, we face the risk that some of our competitors have a pan-India presence while our other competitors have a strong presence in certain regional markets. Our competitors include both large corporate and small real estate developers.

SIGNIFICANT ACCOUNTING POLICIES

Basis of Preparation

The consolidated financial statements have been prepared on a going concern basis using the historical cost basis except for the following items:

- (i) Debentures;
- (ii) Mutual funds; and
- (iii) Financial instruments.

Estimates and Assumptions

The preparation of consolidated financial statements in accordance with Ind AS requires use of estimates, assumptions and judgements for some items, which might have an effect on their recognition and measurement in the (i) balance sheet and (ii) consolidated statement of profit and loss and other comprehensive income. The actual amounts may differ from these estimates. Estimates and assumptions are required in particular for:

- *Revenue recognition*

The Group's contracts with customers include promises to transfer multiple products and services to a customer. Revenues from customer contracts are considered for recognition and measurement when the contract has been approved, in writing, by the parties to the contract, the parties to contract are committed to perform their respective obligations under the contract, and the contract is legally enforceable. The Group assesses the services promised in a contract and identifies distinct performance obligations in the contract. Identification of distinct performance obligations to determine the deliverables and the ability of the customer to benefit independently from such deliverables, and allocation of transaction price to these distinct performance obligations involves significant judgement.

The Group uses the percentage-of-completion method in accounting for other fixed-price contracts. Use of the percentage-of-completion method requires the Group to determine the actual efforts or costs expended to date as a proportion of the estimated expended have been used to measure progress towards completion total efforts or costs to be incurred. Efforts or costs as there is a direct relationship between input and productivity. The estimation of total efforts or costs involves significant judgement and is assessed throughout the period of the contract to reflect any changes based on the latest available information.

- *Allowance for credit losses on receivables and unbilled revenue*

The Group determines the allowance for credit losses based on historical loss experience adjusted to reflect current and estimated future economic conditions. The Group considered current and anticipated future economic conditions relating to industries the Group deals with. In calculating expected credit loss, the Group has also considered credit reports and other related credit information for its customers to estimate the probability of default in future.

Measurement of fair values

The Company uses the following hierarchy for determining and/or disclosing the fair value of financial instruments by valuation techniques:

The following is the basis of categorising the financial instruments measured at fair value into Level 1 to Level 3:

- i) Level 1: This level includes financial assets that are measured by reference to quoted prices (unadjusted) in active markets for identical assets or liabilities.
- ii) Level 2: This level includes financial assets and liabilities, measured using inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices).
- iii) Level 3: This level includes financial assets and liabilities measured using inputs that are not based on observable market data (unobservable inputs).

Fair values are determined in whole or in part, using a valuation model based on assumptions that are neither supported by prices from observable current market transactions in the same instrument nor are they based on available market data.

Trade receivables, cash and cash equivalents, other bank balances, loans, other current financial assets, trade payables and other current financial liabilities: Approximate their carrying amounts largely due to short-term maturities of these instruments.

Management uses its best judgment in estimating the fair value of its financial instruments. However, there are inherent limitations in any estimation technique. Therefore, for substantially all financial instruments, the fair value estimates presented above are not necessarily indicative of all the amounts that the Company could have realized or paid in sale transactions as of respective dates. As such, the fair value of the financial instruments subsequent to the respective reporting dates may be different from the amounts reported at each year end.

Significant accounting policies

Basis of preparation and presentation of financial statements

The financial statements of the subsidiaries, associates and jointly controlled entities used in the consolidation are upto the same reporting date as that of the Company i.e. March 31, 2023.

These consolidated financial statements (CFS) of the Company are prepared in accordance with the Indian Accounting Standards (Ind AS), under historical cost convention on the accrual basis except for certain financial instruments which are measured at fair values, the provisions of the Companies Act, 2013 (Act), (to the extent notified) and guidelines issued by the Securities and Exchange Board of India (SEBI). The consolidated financial statements have been prepared on a going concern basis in accordance with accounting principles generally accepted in India. The Ind AS are prescribed under Section 133 of the Act read with Rule 3 of the Companies (Indian Accounting Standards) Rules, 2015, and relevant amendment rules issued thereunder.

Accounting policies have been consistently applied except where a newly issued Accounting Standard is initially adopted or a revision to an existing Accounting Standard requires a change in the Accounting policies hitherto in use.

The consolidated Balance Sheet, the Statement of Changes in Equity, the Statement of Profit and Loss and disclosures are presented in the format prescribed under Division III of Schedule III of the Act, as amended from time to time that are required to comply with Ind AS. The Statement of Cash Flows has been presented as per the requirements of Ind AS 7 'Statement of Cash Flows'.

The consolidated financial statements are presented in Indian Rupees, which is also its functional currency. All amounts have been rounded off to the nearest Rupees lakhs, unless otherwise indicated.

Basis of Consolidation

The CFS comprise the financial statements of the Company and its subsidiaries as at March 31, 2023. Control is achieved when the Group is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Specifically, the Group controls an investee if and only if the Group has:

- (i) Power over the investee (i.e. existing rights that give it the current ability to direct the relevant activities of the investee).
- (ii) Exposure, or rights, to variable returns from its involvement with the investee, and
- (iii) The ability to use its power over the investee to affect its returns.

Generally, there is a presumption that a majority of voting rights result in control. To support this presumption and when the Group has less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- (i) The contractual arrangement with the other vote holders of the investee.
- (ii) Rights arising from other contractual arrangements.

(iii) The Group's voting rights and potential voting rights.

(iv) The size of the group's holding of voting rights relative to the size and dispersion of the holdings of the other voting rights holders.

The Group re-assesses whether or not it controls an investee, if facts and circumstances, indicate that there are changes to one or more of the three elements of control. Consolidation of a subsidiary begins when the Group obtains control over the subsidiary and ceases when the Group loses control of the subsidiary. Assets, liabilities, income and expenses of a subsidiary acquired or disposed of during the year are included in the CFS from the date the Group gains control until the date the Group ceases to control the subsidiary.

CFS are prepared using uniform accounting policies for like transactions and other events in similar circumstances. If a member of the group uses accounting policies other than those adopted in the CFS for like transactions and events in similar circumstances, appropriate adjustments are made to that group member's financial statements in preparing the CFS to ensure conformity with the group's accounting policies.

The financial statements of all entities used for the purpose of consolidation are drawn up to same reporting date as that of the parent company, i.e., year ended on March 31. When end of the reporting period of the parent is different from that of a subsidiary, the subsidiary prepares, for consolidation purposes, additional financial information as of the same date as the financial statements of the parent to enable the parent to consolidate the financial information of the subsidiary, unless it is impracticable to do so.

- (i) Combine like items of assets, liabilities, equity, income, expenses and cash flows of the parent with those of its subsidiaries. For this purpose, income and expenses of the subsidiary are based on the amounts of the assets and liabilities recognised in the CFS at the acquisition date.
- (ii) Offset (eliminate) the carrying amount of the parent's investment in each subsidiary and the parent's portion of equity of each subsidiary.

Eliminate in full intragroup assets and liabilities, equity, income, expenses and cash flows relating to transactions between entities of the group (profits or losses resulting from intragroup transactions that are recognised in assets, such as inventory and fixed assets, are eliminated in full). Intragroup losses may indicate an impairment that requires recognition in the CFS. Ind AS12 'Income Taxes' applies to temporary differences that arise from the elimination of profits and losses resulting from intragroup transactions.

- (i) Profit or loss and each component of 'Other Comprehensive Income' (OCI) are attributed to the equity holders of the parent of the Group and to the non-controlling interests, even if, this results in the non-controlling interests having a deficit balance. When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with the Group's accounting policies. All intra-group assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Group are eliminated in full on consolidation.
- (ii) The Company consolidates the entities which it owns or controls. Control exists when the parent has power over the entity, is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Power is demonstrated through existing rights that give the ability to direct relevant activities, those which significantly affect the investee's returns. Subsidiaries are consolidated from the date control commences until the date control ceases.
- (iii) The financial statements of the Group companies are consolidated on a line-by-line basis and intra-group balances and transaction including unrealized gain/ loss from such transaction are eliminated upon consolidation. These financial statements are prepared by applying uniform accounting policies in use at the Group. Non-controlling interests which represent part of the net profit or loss and net asset of subsidiaries that are not, directly or indirectly, owned or controlled by the company, are excluded.
- (iv) Associates are entities over which the Group has significant influence but not control. Investment in associates are accounted for using the equity method of accounting. The investment is initially recognized at cost, and the carrying amount is increased or decreased to recognize the investor's share of profit or loss of the investee after the acquisition date. The Group's investment in associates includes goodwill identified on acquisition.

Use of estimates

The preparation of the CFS in conformity with Ind AS requires management to make estimates, judgments and assumptions. These estimates, judgments and assumptions affect the application of accounting policies and the reported amounts of assets and liabilities, the disclosures of contingent assets and liabilities at the date of the CFS and reported amounts of revenues and expenses during the period. Accounting estimates could change from period to period. Actual results could differ from those estimates. Appropriate changes in estimates are made as management becomes aware of changes in circumstances surrounding the estimates. Changes in estimates are reflected in the CFS in the period in which changes are made and, if material, their effects are disclosed in the notes to the CFS.

Critical accounting estimates

(i) Revenue recognition

The Group's contracts with customers include promises to transfer multiple products and services to a customer. Revenues from customer contracts are considered for recognition and measurement when the contract has been approved, in writing, by the parties to the contract, the parties to contract are committed to perform their respective obligations under the contract, and the contract is legally enforceable. The Group assesses the services promised in a contract and identifies distinct performance obligations in the contract. Identification of distinct performance obligations to determine the deliverables and the ability of the customer to benefit independently from such deliverables, and allocation of transaction price to these distinct performance obligations involves significant judgement.

The Group uses the percentage-of-completion method in accounting for other fixed-price contracts. Use of the percentage-of-completion method requires the Group to determine the actual efforts or costs expended to date as a proportion of the estimated expended have been used to measure progress towards completion total efforts or costs to be incurred. Efforts or costs as there is a direct relationship between input and productivity. The estimation of total efforts or costs involves significant judgement and is assessed throughout the period of the contract to reflect any changes based on the latest available information.

(ii) Allowance for credit losses on receivables and unbilled revenue

The Group determines the allowance for credit losses based on historical loss experience adjusted to reflect current and estimated future economic conditions. The Group considered current and anticipated future economic conditions relating to industries the Group deals with. In calculating expected credit loss, the Group has also considered credit reports and other related credit information for its customers to estimate the probability of default in future.

Property, plant and equipment

Property, plant and equipment are stated at their cost of acquisition/construction, net of accumulated depreciation and impairment losses, if any. Costs directly attributable to acquisition are capitalized until the property, plant and equipment are ready for use, as intended by management.

Capital work-in-progress represents expenditure incurred in respect of capital projects which are carried at cost. Cost includes land, related acquisition expenses, development and construction costs, borrowing costs and other direct expenditure.

Advances paid towards acquisition of property, plant and equipment outstanding at each Balance Sheet date are disclosed as Capital Advances under 'Other Non-Current Assets' and cost of fixed assets not yet ready for their intended use as at the reporting date are disclosed under 'Capital Work in Progress'. Subsequent expenditures relating to property, plant and equipment is capitalized only when it is probable that future economic benefits associated with these will flow to the Group and the cost of the item can be measured reliably. Repairs and maintenance costs are recognized in the Statement of Profit and Loss when incurred. The cost and related accumulated depreciation are eliminated from the financial statements upon sale or retirement of the asset and the resultant gains or losses are recognized in the Statement of Profit and Loss. Assets to be disposed off are reported at the lower of the carrying value or the fair value less cost to sell.

Depreciation on fixed assets is charged in accordance with estimate of useful life of the assets on written down value method, at rates specified in Schedule II of the Companies Act. Depreciation on assets purchased/sold during a period is proportionately charged.

Depreciation methods, useful lives and residual values are reviewed periodically, including at each financial year end.

Investment property

Property that is held for long-term rental yields or for capital appreciation or both, and that is not occupied, is classified as investment property. Investment property is measured initially at its cost, including related transaction costs. Subsequent to initial recognition,

investment properties are stated at cost less accumulated depreciation and accumulated impairment loss, if any. Subsequent expenditure is capitalized to the asset's carrying amount only when it is probable that future economic benefits associated with the expenditure will flow to the Company and the cost of the item can be measured reliably.

The Group discloses the fair value of investment properties in notes to the consolidated financial statements. Fair values are determined based on annual evaluation performed by the management.

Investment properties are derecognized either when they have been disposed off or when they have been permanently withdrawn from use and no future economic benefit is expected from their disposal. The difference between net disposal proceeds and the carrying amount of the asset is recognized in the Statement of Profit and Loss in the period of derecognition.

Financial instruments

(i) Initial recognition

The Company recognizes financial assets and financial liabilities when it becomes a party to the contractual provisions of the instrument. All financial assets and liabilities are recognized at fair value on initial recognition, except for trade receivables which are initially measured at transaction price. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities, that are not at fair value through profit or loss, are added to the fair value on initial recognition. Regular way purchase and sale of financial assets are accounted for at trade date.

(ii) Subsequent measurement

Financial assets carried at amortized cost

A financial asset is subsequently measured at amortized cost if it is held within a business model whose objective is to hold the asset in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Investments in equity instruments of subsidiaries, joint ventures and associates

Investments in subsidiaries, are stated at cost less provision for impairment losses, if any. Investments are tested for impairment whenever an event or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognized for the amount by which the carrying amount of investments exceeds its recoverable amount. If, in a subsequent period, recoverable amount equals or exceeds the carrying amount, the impairment loss recognized is reversed accordingly.

Investments in equity instruments of subsidiaries, joint ventures and associates are accounted for at cost in accordance with Ind AS-27 'Separate Financial Instruments'.

(iii) Financial liabilities

Financial liabilities are carried at amortized cost using the effective interest method, except or contingent consideration recognized in a business combination which is measured at fair value through profit or loss. For trade and other payables maturing within one year from the Balance Sheet date, the carrying amounts approximate fair value due to the short maturity of these instruments.

(iv) Derecognition of financial instruments

The Group derecognizes a financial asset when the contractual rights to the cash flows from the financial asset expire or it transfers the financial asset and the transfer qualifies for derecognition in accordance with Ind AS 109 "Financial Instruments" issued by the Ministry of Corporate Affairs, Government of India. A financial liability (or a part of a financial liability) is derecognized from the Company's Balance Sheet when the obligation specified in the contract is discharged or cancelled or expires.

Impairment

(i) Financial assets

The Group recognizes loss allowances using the expected credit loss (ECL) model for the financial assets which are not fair valued through profit or loss. Loss allowance for trade receivables with no significant financing component is

measured at an amount equal to lifetime ECL. For all other financial assets, expected credit losses are measured at an amount equal to the 12-month ECL, unless there has been a significant increase in credit risk from initial recognition in which case those are measured at lifetime ECL. The amount of expected credit losses (or reversal) that is required to adjust the loss allowance at the reporting date to the amount that is required to be recognized is recognized as an impairment gain or loss in profit or loss.

(ii) *Non-financial assets*

Property, plant and equipment are evaluated for recoverability whenever events or changes in circumstances indicate that their carrying amounts may not be recoverable. For the purpose of impairment testing, the recoverable amount (i.e. the higher of the fair value less cost to sell and the value-in-use) is determined on an individual asset basis unless the asset does not generate cash flows that are largely independent of those from other assets. In such cases, the recoverable amount is determined for the cash generating unit (CGU) to which the asset belongs.

If such assets are considered to be impaired, the impairment to be recognized in the Statement of Profit and Loss is measured by the amount by which the carrying value of the assets exceeds the estimated recoverable amount of the asset. An impairment loss is reversed in the Statement of Profit and Loss, if there has been a change in the estimates used to determine the recoverable amount. The carrying amount of the asset is increased to its revised recoverable amount, provided that this amount does not exceed the carrying amount that would have been determined (net of any accumulated amortization or depreciation) had no impairment loss been recognized for the asset in prior years.

Provisions and contingent liabilities

Provisions

A provision is recognized if, as a result of a past event, it has a present legal or constructive obligation that is reasonably estimable, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.

Contingent Liabilities

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control or a present obligation that is not recognised because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognised because it cannot be measured reliably. The Group does not recognise a contingent liability but discloses its existence in the financial statements. Contingent assets are neither recognised nor disclosed in the financial statements.

Inventories

Real Estate: Lower of cost or net market value; Cost includes cost of acquisition and other related expenses incurred in bringing the inventories to their present location and condition. Net market value is the estimated selling price in the ordinary course of business.

Constructed/Under Construction Properties: Lower of cost or net realizable value. Cost includes the cost of land, internal development cost, external development charges, construction costs, overheads, borrowing costs and development/construction material.

Development Rights: At cost of acquisition, including cost of acquiring rights of any interested party. Development rights are considered to have been acquired on execution of a Development Agreement upon vesting of irrevocable rights in the Company to construct, market, and sell the development over land and realize and retain the economic and other benefits.

Unbilled receivables

Unbilled receivables represent revenue recognized based on Percentage of Completion of Construction Method, to the extent the work completed exceeds billed receivables.

Revenue recognition

(i) *Revenue from contracts from customers*

Pursuant to the application of Ind AS-115, the Company has applied following accounting policy for revenue recognition:

The Company satisfies a performance obligation and recognizes revenue over time, if one of the following criteria is met:

- (a) The customer simultaneously receives and consumes the benefits provided by the Company's performance as the entity performs; or
- (b) The Company's performance creates or enhances an asset that the customer controls as the asset is created or enhanced; or
- (c) The Company's performance does not create an asset with an alternative use to the Company and the entity has an enforceable right to payment for performance completed to date.

For performance obligations, where one of the above conditions are not met, revenue is recognised at the point in time at which the performance obligation is satisfied.

Revenue is recognised either at point of time and over a period to time based on various conditions as included in the contracts with customers.

(ii) *Others*

- (a) Revenues from sale of investment properties and assets to the extent of sale consideration reduced by the respective costs thereof in each case, being value inclusive of cost of acquisition, and construction and development cost thereof.
- (b) Forfeiture due to non fulfilment of obligations by counter parties is accounted as Revenue on unconditional appropriation.
- (c) Revenues from rentals are recognised on accrual basis in accordance with terms of agreements executed with respective tenants.
- (d) Service receipts and interest from customers is accounted for on accrual basis.
- (e) Dividend income is recognised when the shareholder or unit holder's right to receive payment is established, which is generally when shareholder approve the dividend.

- (g) Interest income is recognized using effective interest method.
- (h) Interest on arrears of allotment money is accounted in the year of receipt.

- (iii) Revenue from fixed-price, fixed-time frame contracts, where the performance obligations are satisfied over time and where there is no uncertainty as to measurement or collectability of consideration, is recognized as per the percentage-of-completion method. When there is uncertainty as to measurement or ultimate collectability, revenue recognition is postponed until such uncertainty is resolved. Efforts or costs expended have been used to measure progress towards completion as there is a direct relationship between input and productivity. Maintenance revenue is recognized rateably over the term of the underlying maintenance arrangement.

Claims

Claims lodged by and lodged against are accounted in the year of payment or settlement thereof.

Borrowing costs

Borrowing costs directly attributable to the acquisition and/or construction/production of qualifying assets which are assets that necessarily take a substantial period of time to get ready for their intended use, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use. All other borrowing costs are charged to Statement of Profit and Loss as incurred. Borrowing consist of interest and other costs that is incurred in connection with the borrowings

of funds.

Employee benefits

- (i) Benefits such as salaries, wages and short term compensations etc. and the expected cost of ex-gratia is recognized in the period in which the employee renders the related service.
- (ii) The Gratuity and Leave encashment schemes are defined benefit plans. Gratuity is provided by covering eligible employees on the basis of actuarial valuation as carried out by an independent actuary using the Projected Unit Credit method, which recognizes each period of service as giving rise to additional unit of employee benefit entitlement and measures each unit separately to build up the final obligation. The obligation is measured at the present value of the estimated future cash flows. The discount rates used for determining the present value of obligation under defined benefit plans is based on the market yields on Government securities as at the Balance Sheet date.
- (iii) The liability is un-funded. Actuarial gains and losses arising through re-measurement of net defined benefit liability/(assets) are recognized in 'Other Comprehensive Income'.

The employees of the Company are entitled to compensated absences as per the policy of the Company. The Company recognizes the charge to the Statement of Profit and Loss and corresponding liability on account of such non-vesting accumulated leave entitlement based on a valuation by an independent actuary. The cost of providing compensated absences are determined using the projected unit credit method. Remeasurements as a result of experience adjustments and changes in actuarial assumptions are recognized in Statement of Profit and Loss.

- (iv) Contributions payable to the concerned government authorities in respect of provident fund, family pension fund and employees state insurance are defined contribution plans. The contributions are recognized as an expense in the Statement of Profit and Loss during the period in which the employee renders the related service. There is no further obligation in this respect, beyond such contribution. Other employee benefits are accounted for an accrual basis.

Foreign currency translations

On initial recognition, all foreign currency transactions are translated in to the functional currency using the exchange rates prevailing on the date of the transaction. As at the reporting date, foreign currency monetary assets and liabilities are translated at the exchange rate prevailing on the Balance Sheet date and the exchange gains or losses are recognized in the Consolidated Statement of Profit and Loss.

Cash and cash equivalents

Cash and cash equivalents comprise cash at bank, cash in hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value. Short-term deposits are made for varying periods of between one day and three months, depending on the immediate cash requirements, and earn interest at the respective short-term deposit rates.

Cash flow statement

Cash flows are reported using the indirect method, whereby profit for the period is adjusted for the effects of transactions of a non-cash nature, any deferrals or accruals of past or future operating cash receipts or payments and item of income or expenses associated with investing or financing cash flows. The cash flows from operating, investing and financing activities are segregated. All highly liquid investments are considered that are readily convertible to known amounts of cash to be cash equivalents.

Dividends

Dividend on equity shares are recorded as a liability on the date of approval by the shareholders and interim dividends are recorded as a liability on the date of declaration by the Company's Board of Directors.

Income taxes

Income tax expense comprises current and deferred tax. It is recognized in Statement of Profit and Loss except to the extent that it relates to items recognized directly in equity or in other comprehensive income.

Income tax expense comprises current and deferred income tax. Income tax expense is recognized in the Statement of Profit and Loss except to the extent that it relates to items recognized directly in equity, in which case it is recognized in 'Other Comprehensive Income'. Current income tax for current and prior periods is recognized at the amount expected to be paid to or recovered from the tax authorities, using the tax rates and tax laws that have been enacted or substantively enacted by the balance sheet date. Deferred income tax assets and liabilities are recognized for all temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

Deferred tax is recorded on temporary differences between the tax bases of assets and liabilities and their carrying amounts, at the rates that have been enacted or substantively enacted at the reporting date. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable profits during the periods in which those temporary differences and tax loss carry-forwards become deductible. The Company considers expected reversal of deferred tax liabilities and projected future taxable income in making this assessment. The amount of deferred tax assets considered realisable, however, could reduce in the near term if estimates of future taxable income during the carry-forward period are reduced.

Earnings per share

Basic earnings per equity share is computed by dividing the net profit attributable to the equity holders of the Group by the weighted average number of equity shares outstanding during the period. Diluted earnings per equity share is computed by dividing the net profit attributable to the equity holders of the Group by the weighted average number of equity shares considered for deriving basic earnings per equity share and also the weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares. The dilutive potential equity shares are adjusted for the proceeds receivable had the equity shares been actually issued at fair value (i.e. the average market value of the outstanding equity shares). Dilutive potential equity shares are deemed converted as of the beginning of the period, unless issued at a later date. Dilutive potential equity shares are determined independently for each period presented.

The number of equity shares and potentially dilutive equity shares are adjusted retrospectively for all periods presented for any share splits and bonus shares issues including for changes effected prior to the approval of the financial statements by the Board of Directors.

Leases

The Group evaluates if an arrangement qualifies to be a lease as per the requirements of Ind AS 116. Identification of a lease requires significant judgment. The Group uses significant judgement in assessing the lease term (including anticipated renewals) and the applicable discount rate. The Group determines the lease term as the non-cancellable period of a lease, together with both periods covered by an option to extend the lease if the Company is reasonably certain to exercise that option; and periods covered by an option to terminate the lease if the Company is reasonably certain not to exercise that option. In assessing whether the Company is reasonably certain to exercise an option to extend a lease, or not to exercise an option to terminate a lease, it considers all relevant facts and circumstances that create an economic incentive for the Company to exercise the option to extend the lease, or not to exercise the option to terminate the lease.

The Group revises the lease term if there is a change in the non-cancellable period of a lease. The discount rate is generally based on the incremental borrowing rate specific to the lease being evaluated or for a portfolio of leases with similar characteristics.

Segment reporting

Operating segments are reported in the manner consistent with the internal reporting provided to the chief operating decision maker (CODM). The Managing Director of the Company has been identified as CODM and he is responsible for allocating the resources, assess the financial performance and position of the Company and makes strategic decisions.

The Company has identified one reportable segment "Real Estate" based on the information reviewed by the CODM.

All other liabilities are classified as non-current.

The net amount of tax recoverable from, or payable to, the tax authority is included as part of receivables or payables, respectively, in the balance sheet.

Recent Pronouncements

On March 31, 2023, the Ministry of Corporate Affairs (“MCA”) notified new standards or amendments to the existing standards under Companies (Indian Accounting Standards) Rules as issued from time to time as below:

Ind AS 1- Presentation of financial statements:

This amendment requires the entities to disclose their material accounting policies rather than their significant accounting policies. The effective date for adoption of this amendment is annual periods beginning on or after April 1, 2023. The Company has evaluated the amendment and the impact of the amendment is insignificant in the standalone financial statements.

Ind AS 8- Accounting policies, Changes in Accounting Estimates and Errors

This amendment has introduced a definition of ‘accounting estimates’ and included amendments to Ind AS 8 to help entities distinguish changes in accounting policies from changes in accounting estimates. The effective date for adoption of this amendment is annual periods beginning on or after April 1, 2023. The Company has evaluated the amendment and there is no impact on its standalone financial statements.

Ind AS 12 - Income Taxes

This amendment has narrowed the scope of the initial recognition exemption so that it does not apply to transactions that give rise to equal and offsetting temporary differences. The effective date for adoption of this amendment is annual periods beginning on or after April 1, 2023. The Company has evaluated the amendment and there is no impact on its standalone financial statements.

The amendments are extensive and the Group will evaluate the same to give effect to them as required by law.

Non – GAAP Measures

In addition to our results determined in accordance with Ind AS, we believe the following non-GAAP financial measures are useful to our Company and our investors as a means of assessing and evaluating our operating performance in comparison to prior periods: EBITDA, EBITDA Growth (CAGR), Average Capital Employed, Return on Capital Employed, Capital Expenditures, Return on Equity, Debt to Equity Ratio, Adjusted Net (cash) / Debt, Interest Coverage Ratio, Net fixed asset turnover ratio, Net debt/EBITDA (leverage) and Gearing ratio. We classify a financial measure as being a non – GAAP financial measure if that financial measure excludes or includes amounts, or is subject to adjustments that have the effect of excluding or including amounts, that are not included or excluded in the most directly comparable measure calculated and presented in accordance with Ind-AS as in effect from time to time in our financial statements. The non-GAAP financial measures are supplemental measures that are not required by, or are not presented in accordance with, Ind-AS. Non-GAAP financial measures do not include operating, other statistical measures or ratios calculated using exclusively financial measures calculated in accordance with Ind-AS. Moreover, the way we calculate the non-GAAP financial measures may differ from that of other companies reporting measures with similar names, which may limit these measures' usefulness as a comparative

measure. Our management believes these non-GAAP financial measures are useful to compare general operating performance from period to period and to make certain related management decisions. We believe that non-GAAP financial information, when taken collectively with financial measures prepared in accordance with Ind AS, may be helpful to investors because it provides an additional tool for investors to use in evaluating our ongoing operating results and trends and in comparing our financial results with other companies in our industry because it provides consistency and comparability with past financial performance. However, our management does not consider these non-GAAP measures in isolation or as an alternative to financial measures determined in accordance with Ind AS.

Non-GAAP financial information is presented for supplemental informational purposes only, has limitations as an analytical tool and should not be considered in isolation or as a substitute for financial information presented in accordance with Ind AS. Non-GAAP financial information are not recognized under Ind AS and do not have standardized meanings prescribed by IND AS. In addition, non-GAAP financial measures used by us may differ from similarly titled non-GAAP measures used by other companies. The principal limitation of these non-GAAP financial measures is that they exclude significant expenses and income that are required by Ind AS to be recorded in our financial statements, as further detailed below. In addition, they are subject to inherent limitations as they reflect the exercise of judgment by management about which expenses and income are excluded or included in determining these non-GAAP financial measures. A reconciliation is provided below for each non-GAAP financial measure to the most directly comparable financial measure prepared in accordance with Ind AS. Investors are encouraged to review the related Ind AS financial measures and the reconciliation of non-GAAP financial measures to their most directly comparable Ind AS financial measures included below and to not rely on any single financial measure to evaluate our business.

QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT RISK ARISING FROM FINANCIAL INSTRUMENTS

We have exposure to the following risks arising from financial instruments:

- a. Market risk;
- b. Credit risk; and
- c. Liquidity risk.

Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises two types of risk: interest rate risk and other price risk, such as equity price risk and commodity/ real-estate risk. Financial instruments affected by market risk include loans and borrowings.

For details of market risk in respect of us, please see “*Financial Information*” beginning on page 244.

Credit risk

Credit risk is the risk that counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The Company is exposed to credit risk from its operating activities (primarily trade receivables) and from its financing activities, including refundable joint development deposits, security deposits, loans to employees and other financial instruments. To manage this, the Company periodically assesses financial reliability of customers and other counter parties, taking into account the financial condition, current economic trends, and analysis of historical bad debts and ageing of financial assets.

Trade Receivables

(i) Receivables resulting from sale of properties: Customer credit risk is managed by requiring customers to pay advances before transfer of ownership, therefore, substantially eliminating the Company’s credit risk in this respect.

(ii) Receivables resulting from other than sale of properties: Credit risk is managed by each business unit subject to the Company’s established policy, procedures and control relating to customer credit risk management. Outstanding customer receivables are regularly monitored. The impairment analysis is performed at each reporting date on an individual basis for major clients. In addition, a large number of minor receivables are grouped into homogeneous groups and assessed for impairment collectively.

Liquidity risk

Prudent liquidity risk management implies maintaining sufficient cash and marketable securities and the availability of funding through an adequate amount of committed credit facilities to meet obligations when due and to close out market positions. Due to the dynamic nature of the underlying businesses, the Company’s treasury maintains flexibility in funding by maintaining availability under committed credit lines. The management monitors rolling forecasts of the Company’s liquidity position and cash and cash equivalents on the basis of expected cash flows.

For details of liquidity risk in respect of us, please see “*Financial Information*” beginning on page 244.

NATIONAL CAPITAL REGION

1. National Capital Region – Overview

The National Capital Region (NCR) is a large metropolitan area that encompasses the capital city of Delhi and its surrounding urban areas across neighboring states. The NCR includes parts of Haryana, Uttar Pradesh, and Rajasthan, along with the National Capital Territory of Delhi. It is a significant economic, political, and cultural hub in the country.

Due to various macro-economic factors like increase in per capita income and favorable shifts in demographic profile, NCR has witnessed rapid growth across different real estate asset classes viz. residential, commercial, retail, warehouse and data centres, etc.

The National Capital Region (NCR) is a huge megapolis and consumption center in India and is considered as gateway to north India. The estimated population in NCR region for 2023 is over 98 Million and Delhi accounts for approximately 43% share of the total population. During 2012 to 2022, Delhi and Gurugram have shown the maximum increase in population viz. 153% and 58% respectively. Further as per the Census 2011, NCT Delhi has the highest per capita income in NCR, followed by Gurugram. Keeping the factor of economic growth, various business and employment opportunities, improved standard of living, all regions in NCR are likely to have higher per capita income as that of 2011 (with similar trendline). As per Draft Regional Plan 2041 shared by National Capital Region Planning Board, NCR is expected to have a population of approximately 70 million and 110 million in 2031 and 2041 respectively.

The below graphs illustrate the population growth and per capita income for regions forming part of NCR:

1.3. NCR – Residential Supply & Absorption Trends

The year 2020 experienced a decline due to the impact of the Covid-19 pandemic on the economy and the real estate sector. During the initial half of the calendar year 2020, the lockdowns imposed due to Covid affected the residential real estate market in the National Capital Region (NCR), causing a slowdown for approximately one quarter of the year. However, as activities resumed in the latter half of the year and developers provided incentives such as diverse payment plans, supplementary offerings like white goods, basic interiors, and extra car parking, the demand for residential properties experienced a revival.

In light of the current market scenario and the upturn in economic activity, the residential market in the National Capital Region (NCR) is poised to witness strong activity, propelled by the demand from end users. The below graph illustrates Supply, absorption and unsold inventory trends for residential units during CY 2019 – CY 2023 (Q3) for NCR:

Source: C&WI research

The positive momentum persisted in 2021, driven by economic recovery, pent-up demand, and a strong preference for home ownership among buyers as the primary demand factors. Across NCR, housing sales surged by ~59%, rising from 24,076 units in the CY 2020 to 38,355 units in the CY 2021. In the pre-COVID-19 era of 2019, the overall sales in the region amounted to 43,495 units, reaching ~88% of the pre-COVID levels. This reflects confidence and strong demand in the market during that time. Despite the restricted supply in CY 2022, the absorption trend continued with sale of 60,706 units jumping up by ~58% and witnessing highest absorption levels. Till Q3 2023, the market has achieved 78% launches of CY 2022,

showcasing dip in unsold inventory by ~39% till Q3 2023 vis-à-vis 2019 and promising trends for the residential real estate industry.

Over the past three years, the National Capital Region (NCR) has generally experienced higher absorption levels compared to the supply in the region. This can be attributed primarily to increased affordability, coupled with ongoing and upcoming infrastructure projects that enhance the mobility of people. Additionally, the employment prospects and the market being driven by end-users linked to employment provide a variety of options in the satellite towns of NCR.

1.4. NCR – Demand Drivers

- **Connectivity and linkages:** All districts of NCR are well connected to each other. Hence, efficient management of commuting by public and private mode of communication makes it a conducive location for workforce travelling for work.
- **Indira Gandhi International airport:** Presence of an international airport has drawn a substantial number of occupants to the region, facilitating its rapid and accelerated growth.
- **Presence of social and lifestyle infrastructure:** Along with good physical infrastructure the city offers a healthy mix of social and lifestyle infrastructure. Presence of good schools and colleges like DPS, Modern School – Barakhamba Road and JNU; good hospitals like AIIMS, BLK Hospital, Artemis, Medanta, Fortis etc.; retail malls like Select City Walk, Mall of India and Ambience mall, etc.; F&B formats like Khan Market, Cyber Hub, 32nd Milestone, Sector 29 etc.; has made NCR as one of the most preferred regions for the working population. The area offers easy accessibility to the amenities required by the working population to lead life independently.
- **Access to educated talent pool from Delhi, Haryana, Punjab, Rajasthan, and Uttar Pradesh:** As the city is accessible through multiple modes of transportation and it offers residential spaces across various price categories, it attracts talent pool from all adjoining locations.
- **Growth of IT and GCC in India:** As India is moving ahead into a higher growth trajectory, the real estate requirement of the growing technology industry is also increasing. Traditionally, the Indian Technology industry was centered in Bangalore and later expanded to other cities such as Noida, Gurugram, Hyderabad, Pune, Chennai, and Mumbai. Concurrently, India has become a host to a staggering count of over 1,580 Global Capability Centers (GCCs) in the fiscal year 2023. These GCCs have collectively amassed a revenue of nearly USD 46 billion, providing employment to over 1.66 million individuals. The allure of India's adept workforce and well-equipped office infrastructure has beckoned numerous multinational corporations to establish GCCs within the country. With the growth in IT Sector and GICs/GCCs, the demand for real estate from these companies have also seen an increase. These companies generally have high stickiness and typically prefer office spaces which offer large floor plates, amenities in the park and have proximity to the talent pool catchment areas.
- **Healthy mix of commercial, IT/ITeS, and SEZ developments:** NCR offers a healthy mix of commercial, IT/ITeS and SEZ office space and hence attracts the occupier base across categories.

- **NH 48 (via Golf Course Road):** ~ 13 km
- **IGI Airport:** ~ 24 km
- **Connaught Place (CBD of Delhi):** ~ 35 km

Golf Course Extension Road has established itself as a distinguished and premium real estate micro market. The region features a mix of residential projects, including high-rise apartments, independent floors, plots and villas by leading real estate developers such as DLF, M3M India, Anant Raj, Emaar India and Signature Global, promoting organized and professional development practices, emphasizing quality construction, innovative designs, and customer-centric approaches.

Furthermore, the market witnessed a further elevated the price range of the micro market to INR 18,000 – 22,000 per sq. ft. with launches of Birla Avik. Established office clusters are centered around Cyber City, Udyog Vihar, MG Road, Golf Course Road, and Sohna Road. Golf Course Extension Road is emerging as the next office location with major investment-grade developments, including Worldmark-65, M3M International Financial Center, Good Earth Business Bay, and others. Gurugram's evolution as an office market has seen diverse development patterns, from strata sold developments to fully owned buildings and integrated/campus developments. Gurugram is primarily characterized by investment grade developments offering modern amenities. To name a few, established players like DLF, Brookfield, Hines, Tata Realty, CapitaLand, and Bharti Realty etc. have their footprint in Gurugram. The table below highlights the key statistics of Gurugram's office market.

1.1. Gurugram – Office Supply, Absorption and Vacancy Trends

As of 9M 2023, Gurugram's total Grade-A office stock is 85.37 msf. The average net absorption during the period 2019-9M 2023 is ~3.25 msf which is the highest among all office markets of NCR. The pandemic led to subdued net absorption in 2020 and 2021, but leasing momentum increased in 2022, resulting in a decline in vacancies. The overall market has double-digit vacancies, primarily due to high vacancy levels in properties with strata ownership. The below graph represents historical supply, net absorption & vacancy across Gurugram:

Note:

1. Only Grade-A office spaces have been considered for the analysis presented in the above chart encompassing factors like developer reputation, ownership status, and subjective elements such as certifications, amenities, tenancy profile, and vacancy trends.
2. The net absorption refers to the net additional leasing activity which has occurred in the year. This does not include any pre-commitments or renewals. The pre-commitments are recorded as absorption in the year in which the tenant moves in.

Golf Course Extension Road is one of the emerging locations for office developments in Gurugram, with total office stock of ~13.75 msf as on 9M 2023. Developers like Emaar, CapitaLand, M3M and Capital Group hold notable share of office stock in the micro market.

Gurugram's nature of hosting diverse demand from sectors like Technology, BFSI, Professional Services, Media & Telecom would help keeping the net absorption figures high. The future supply is expected to follow net absorption trends, maintaining the real estate demand momentum for the city.

1.2. Gurugram – Office Rental Trends

Rental movement in Gurugram is majorly driven by IT/ITeS and Non-IT developments. CY 2019 remains a milestone year in Gurugram's office market with major micro markets reaching all time high levels in terms of rentals. Among Gurugram's micro markets, DLF Cyber City commands the highest rentals at ~INR 117 psfpm followed by Golf Course Road at ~INR 116 psfpm.

1.3. Gurugram – Upcoming Office Supply (Q4 CY 2023 to CY 2026E)

The quality of developments scheduled to be delivered in the coming 3-4 years are majorly investment grade developments, rendering Gurugram as a favorable office destination for global occupiers. The upcoming supply includes prominent developments such as DLF Downtown Block-4, DLF Atrium Place, Godrej-Hero Commercial Tower, and Magnum Global Park among others.

1.4. Gurugram – Emergence of Key Developers

Developers	2016	9M 2023	2026E
DLF	20.22 msf (34% of the Stock)	24.69 msf (29% of the Stock)	29.54 msf (31% of the Stock)
Brookfield Properties	5.38 msf (9% of the Stock)	7.48 msf (9% of the Stock)	7.48 msf (8% of the Stock)

Gurugram's office market is dominated by investment grade developments from prominent developers such as DLF, Brookfield, TATA Realty and Hines which contribute towards ~40% of the total Grade A office stock in the city. With upcoming developments such as TRIL Intellion Park Tower 3 & 4 by TATA Realty, and DLF Atrium Place by DLF and Hines, these developers are further expected to expand their footprint in Gurugram, highlighting the city's favorable location as a prominent office market of NCR.

2. Delhi – Overview

Delhi is the oldest and thus, the most established office market of NCR with limited availability of Grade A office stock. Delhi's office micro-markets include Delhi CBD constituting Central Delhi, Delhi SBD constituting North (Rohini and Shalimar Bagh), South (Munirka, Vasant Kunj, Saket, Nehru Place, Jasola, Okhla and Mohan Cooperative Industrial estate and New Friends Colony) and East Delhi (Shastri Park), and DIAL constituting Aerocity. Delhi CBD, due to its address value, supporting high street retail, and availability of investment grade office stock, acts as the major demand driver for Delhi. Over the last few years however, DIAL has emerged as a premium destination for hospitality and commercial development in NCR. The prominence of DIAL can be attributed to its strategic location i.e., proximity to the Indira Gandhi International Airport, and NH-48 along with the presence of hospitality developments.

2.1. Delhi – Office Supply, Absorption and Vacancy Trends

As of 9M 2023, Delhi's (Including DIAL) total Grade-A office stock of ~9.84 msf and net absorption of ~0.27 msf. Apart from Aerocity, Delhi is not expected to witness any substantial addition to the existing office supply due to the limited availability of suitable land in the city. Only limited number of Grade A office developments are currently under construction in the city. Below graph represents historical supply, net absorption & vacancy across Delhi and DIAL:

Source: C&WI Research

Note:

1. Only Grade-A office spaces have been considered for the analysis presented in the above chart encompassing factors like developer reputation, ownership status, and subjective elements such as certifications, amenities, tenancy profile, and vacancy trends.
2. The net absorption refers to the net additional leasing activity which has occurred in the year. This does not include any pre-committments or renewals. The pre-committments are recorded as absorption in the year in which the tenant moves in.

2.2. Delhi – Office Rental Trends

CY 2019 remains a milestone year in office sector with Delhi achieving all time high average rentals. Delhi CBD fetches the highest rentals amongst all prominent office micro markets of NCR due to its location and address value. Premium buildings from developers like DLF and Parsvnath are commanding rentals above INR 400 psfpm levels. With minimal Grade-A supply expected in the near future, this trend of increase in rentals is likely to continue.

Delhi CBD is followed by DIAL, constituting Worldmark 1, 2 & 3 in terms of rentals with the micro market's quoted rentals in the range of INR 225 – 230 psfpm.

2.3. Delhi – Upcoming Office Supply (Q4 CY 2023 to CY 2026E)

Office supply in Delhi remains subdued due to the established nature of the city's office market and limited availability of suitable land parcels. Due to this, the city is expected to witness only ~0.16 msf of supply till 2026E which comprises of ~0.11 msf Max House Phase-2 in Okhla and ~0.05 msf Ambience Tower in Connaught Place. Due to this, majority of the upcoming supply in Delhi is skewed towards DIAL, which is the premium upcoming office destination of NCR. DIAL is expected to witness ~ 4.95 msf of supply till 2026E which comprises of ~ 4.30 msf Bharti Worldmark Phase-2 and ~ 0.65 msf Prestige DB realty development.

2.4. Delhi – Emergence of Key Developers

Grade-A office developments in Delhi mostly are scattered between regional and one-time developers, however few established and institutionally backed developers like DLF have presence in Delhi contributing ~22% in current office stock featuring premium developments such as DLF Centre, DLF Capitol Point and others. Other prominent developers like Max Estates are also increasing their footprint in Delhi with premium developments such as Max House Phase 1 & 2.

2.5. DIAL – Emergence of Key Developers

Aerocity (DIAL), due to its locational advantage and proximity to IGI Airport and luxury hotel developments showcases different characteristics than Delhi in terms of office developments and is thus categorized as a separate office micro market. Worldmark 1, 2 & 3 by Brookfield and Bharti Realty constitute majority of office stock in Aerocity which has emerged as

the most premium office micro market of NCR in recent years. Upcoming supply includes developments from Bharti and Prestige, further cementing DIAL as an opportunistic market for established developers.

RETAIL MARKET OVERVIEW

1. NCR – Overview

Delhi NCR offers a variety of retail formats with major chunk of supply concentrated in Delhi, Gurugram and Noida. Delhi has unorganized high street retail markets in Connaught Place, South Extension, Sarojini Nagar and Lajpat Nagar. In the second half of 2000s viz. post year 2005, NCR witnessed an upsurge of organized retail developments. During the period 2006 – 2007, retail developments were primarily witnessed in Saket, Rajouri Garden and Pitampura in Delhi. However, the peripheral locations of NCR i.e., Gurugram and Noida continued to witness more retail developments. Select City walk in Saket by Select Infrastructure, Ambience Mall in Gurugram by Ambience Infrastructure and the Great India Place Mall in Noida by Unitech were some of the prominent malls which were completed during this period.

Many retail malls became operational in Vasant Kunj, a prime retail destination of Delhi, during the period 2008 – 2010. Out of the four prominent malls in this region, two were developed by DLF which were DLF Emporio and DLF Promenade. The remaining two were Vasant Square by Suncity Group and Ambience Mall in Vasant Kunj by Ambience Group. Further, DLF Place in Saket also became operational during this period.

In recent years, a noticeable and transformative shift in consumer preferences and retail trends has been observed, with momentum steadily moving away from traditional mall developments and towards the charm and vibrancy of high street developments. Delhi NCR has adeptly embraced and accommodated this evolving trend. This significant change is indicative of a broader transformation in the retail landscape, driven by evolving consumer expectations, lifestyle choices, and a desire for more personalized and community-oriented experiences.

National Capital Region (NCR) has become one of the largest retail markets in India. The high streets are a popular shopping destination even though the city has witnessed a growth in the number of malls over the last decade.

2. Golf Course Extension Road – Overview

Over the last few years, Golf Course Extension Road, as a micro-market, has witnessed the introduction of numerous residential projects. This surge in residential development has consequently generated a demand for retail establishments within the micro-market. Several highstreets and commercial hubs along Golf Course Extension Road offer a mix of shopping, dining, and entertainment options.

Retail offerings on Golf Course Extension Road have emerged through mixed land-use developments that include a combination of retail high streets either with commercial spaces or residential developments. Instead of strictly segregating land for residential and commercial purposes, these developments envision spaces where individuals can seamlessly integrate living, working, and recreational activities, eliminating the necessity for lengthy commutes. Golf Course Extension Road as a micro market, has seen an increasing trend towards mixed-use developments to address the growing population and urbanization. Featuring prominent developers like Bharti Realty, Emaar India, M3M India, AIPL, and Adani – Brahma, the micro-market primarily consists of mixed-use developments, with a predominant focus on the high-street retail format.

Considering the economic and demographic trends within the micro market, coupled with the expanding population. Investors have widely acknowledged the significance of retail high street developments in this context. Furthermore, as leading brands amongst different categories comprehend the dynamics of the region, the micro market demonstrates robust absorption in both strata sales and leasing terms.

Featuring prominent developers like Bharti Realty, Emaar India, M3M India, AIPL, and Adani – Brahma, the micro-market primarily consists of mixed-use developments, with a predominant focus on the high-street retail format.

Real estate developers are recognizing the potential for retail development in Delhi and Gurugram and have initiated the construction of retail developments as part of integrated townships or standalone projects. As residents are aspiring to a higher quality of life and modern amenities, retail developments are becoming integral to fulfilling their lifestyle aspirations.

DATA CENTRE MARKET OVERVIEW

1. India – Overview

Data Centre (DC) sector has been a booming sector of real estate for past couple of years. The surge in technological space such as Artificial Intelligence, Machine Learning and increase in internet consumption has increased the demand for data centres globally. India, one of the largest consumers of internet has witnessed an exponential growth in data centre sector in with an annual CAGR of 29% from 2021 -2023 and is one of the fastest growing Data Centre markets in the APAC region and one of the top 15 countries of the world. The facilities such as constant power supply, affordable land rates, data centre-focused policies & incentives and consistent surge in demand/consumption of internet and technological services ensures a promising growth for the sector.

Govt. Of India has taken been pro to promote the sector by introducing Draft Data Centre Policy 2020, recommendations, and suggestions to the government by organizations such as TRAI, developing various data centres across the country and incentives to attract data centre investments to the region.

*Data mentioned in the chart above represents IT MW which does not consider PUE
Source: C&WI Research

Mumbai facilitates ~48% of the total capacity and is the largest city in the country to run data centres of ~462 MW. However, cities such as Chennai, NCR and Hyderabad have picked up the pace to provide facilities and incentives for establishing Data Centres. NCR (outskirts of its cities), Hyderabad and Chennai are witnessing a steady rise in DC constructions by big giants of the DC industry as well as new entrants due to ample availability of land parcels, data centre-friendly state-run policies along with no-disturbance zones and constant water & electricity supply.

Establishing a Data Centre and its Protection

Data centers are the backbone of the digital age, housing critical IT infrastructure that keeps businesses and organizations running smoothly. To ensure optimal performance and security, data centers operators and developers need to ensure that they take into account various factors before establishing a data centre to safeguard the data centres from various risks and redundancies.

Data centers operators and developers should ensure that they implement:

- High speed internet connectivity, multiple internet services providers and a secured network infrastructure;
- Robust physical security to prevent unauthorized entry, cyber security and encryption of data security;

- Power redundancy through UPS and generators;
- Cooling redundancy with multiple systems regulating temperature and humidity;
- Network redundancy via various connections for uninterrupted data access and
- Comprehensive disaster recovery plans for swift recuperation from disruptions.

In today's high and fast paced businesses, demand of data centres is increasing significantly as the organizations are facing a number of challenges in storing, managing, and transmitting their data. The increase in data volume and complexity leads to the system downtime which can seriously disrupt their operations. To avoid the failure due to hardware malfunctioning, human error or any other cause, companies can empower their business by having a Data recovery as a service.

Various companies and enterprise data centers offer tools and services to put disaster recovery plans into place. 1.3. India – Demand Drivers

The demand for Data Centre has witnessed a significant growth in last couple of years specially post Covid-19. This uptick in the demand is majorly attributed towards the recent development in Artificial Intelligence & Machine Learning and the widespread transition of 4G to 5G in India. Currently, ChatGPT, an AI based chatbot has currently 180 million plus users and is an actively growing platform and has expedited the “AI race” and has led to big tech giants and organizations actively invest in the R&D which will further lead to huge demand of data centres for data transmission and storing purposes.

The transition of mobile networks from 4G to 5G has been huge and sudden. As per the leading mobile operators, rollout of 5G across the country has taken in less than a year and has led to the 100 million+ users within that time span, making it the 47th in mobile download speeds. This sudden growth is only going to further increase as the conversion is out of the 600 million active smartphone users. Increase in data volume would be supported by high growth in the e-commerce expansion, rising usage of social media, greater preference for over the top (OTT) platforms, government backing of the Digital India initiative, and the rapid adoption of digital services, cloud computing boom across sectors are the driving factors of Data Centre. Further, Data localization norms initiated by the government and regulators, that mandates storage of sensitive data within India, which, in turn, would support development of local data centres.

Major End Users:

- **Financial Institutions** rely on data centers for secure storage of sensitive financial information, transactions, and compliance with regulatory requirements.
- **Hyperscale’s** like Microsoft Azure, Amazon Web Services (AWS), and Google Cloud Platform etc. offer cloud computing services that rely on massive data centers to store and process customer data.
- **E – Commerce**, digital media, streaming platforms, Gaming platforms, and other digital services generate massive amounts of data, requiring robust data centres for storage, processing and delivering online services.
- **Public institutions** require data centers to store citizen data, manage government records, running e-governance initiatives, and ensuring data security.
- **Healthcare** sector generates substantial data through electronic health records (EHRs), medical imaging, genomic research, and more, requiring secure and compliant data storage facilities.

Expected technology tenants:

2. NCR – Overview

NCR is one of the fastest growing data centre markets in India with majority of the data centre development being planned in Noida and Gurugram market. This growth is being driven by a number of factors such as:

- Haryana and Uttar Pradesh's government's initiatives to promote the growth of the IT and ancillary industries.
- Availability of economical land parcels, uninterrupted power supply.
- The increasing demand for data centre space from enterprises, government agencies and cloud service providers.

The NCR region is home to a large number of multinational corporations, IT companies, and start-ups. These organizations are driving the demand for data centre space, as they require reliable and secure infrastructure to store and manage their data. The NCR region has strong connectivity infrastructure, a well-connected fibre optic network, reliable power supply etc. that makes it an attractive location for data centres.

Data Centre is an emerging sector which has been witnessing a steady expansion in NCR and its submarkets. Major players have lately shown a keen interest in establishing the Data Centres in NCR promising a constant growth for next few years. However, it should be taken into consideration that the market is still at a nascent stage of growth specially when compared to other markets such as Mumbai which has a much denser Data Centre footprint. Government of these submarkets must ensure to provide adequate infrastructure, investment incentives & opportunities, friendly policies in order to provide a more feasible market to operate in.

WAREHOUSE MARKET OVERVIEW

1. NCR – Overview

The National Capital Region (NCR) is a huge megapolis and consumption center in India and is considered as gateway to north India. The estimated population in NCR region for 2023 is over 98 Million and Delhi accounts for approximately 43% share of the total population. As per Draft Regional Plan 2041 shared by National Capital Region Planning Board, NCR is expected to have a population of approximately 70 million and 110 million in 2031 and 2041 respectively. Since the region houses both consumption and production centers, demand for warehousing has been on the rise. In past, supply of warehouses was observed in peripheral regions of Delhi like Alipur, Bamnoli and Okhla. However, as Delhi city grew and land prices in Delhi increased, institutional players shifted their focus to NCR regions like Gurugram, Sonipat and Ghaziabad. Also, due to rise in instant delivery services (deliveries in less than 1 day), limited supply of in-city warehouses is also being observed.

The rise of warehousing developments in NCR region can also be credited to optimization in road infrastructure. National Highways (NH-48 acting as the backbone) and Expressways like KMP (Kundli – Manesar – Palwal) Expressway, Delhi Mumbai Expressway have attracted the attention of both institutional and local players alike. The market not only caters to the warehousing demand of the region, but also acts as a key storage and warehousing hub for the neighboring states of Punjab, Uttar Pradesh, Haryana, Rajasthan and other distant regions in the North. A road and rail network well-connected

to different states, large-scale manufacturing units and industrialization have facilitated NCR to emerge as one of the most preferred warehousing destinations in India having enormous potential for incremental warehousing stock to be added by institutional and local developers.

Geographically the warehouse clusters are scattered but can be grouped as major regions namely – North-West, South-West, South-East and North-East. Out of all, South-West cluster is most established and preferred cluster. It houses all major warehousing players like Indospace, Logos, FWS, Embassy, Pragati and ESR etc. With completion of DMIC (Delhi – Mumbai Industrial Corridor), South-West cluster is likely to gain more prominence.

In NCR, industrial submarkets are regulated by nodal authorities of different state like DSIDC (Delhi), HSIIDC (Haryana), UPSIDC (Uttar Pradesh) and RIICO (Rajasthan) These regulatory bodies provide the requisite infrastructure to develop and set up industries. Okhla Industrial Estate was first Industrial area established in Delhi. Because of the high land prices and other factor emergence of major Industrial market have been witnessed in the outskirts of

the city.

1.1. NCR – Supply, Absorption and Vacancy Trends

As of September 2023, approximately 77 msf of warehouse stock was present in NCR. Most of the Grade A warehouses are located in South-West cluster. Absorption is largely driven by E-commerce, 3PL, FMCG and Engineering & Manufacturing. The below graph represents historical supply, absorption & vacancy across NCR:

Source: C&WI Research

Note:

- The net absorption refers to the net additional leasing activity which has occurred in the year. This does not include any pre-commitments or renewals. The pre-commitments are recorded as absorption in the year in which the tenant moves in.

1.2. NCR – Warehouse Rental Trends

Rentals for warehousing space fluctuates throughout Delhi region. With substantial growth witnessed in E – commerce sector, the demand for warehousing has witnessed a rise leading to an uptick in average rentals.

1.3. NCR – Upcoming Warehouse Supply (Q4 CY 2023 and Beyond)

NCR is expected to witness a total supply of ~28 msf (under various stages of development) over next one to three years. The Upcoming Supplies are from the below listed developers.

1.4. NCR – Key Warehouse Players

Grade-A/Institutional warehouse players started showing interest in developing large Grade A warehouse space as more and more E – Commerce and 3 PL firms demanded storage spaces. Indospace is the largest warehouse developer in NCR region with a combined (current and upcoming) supply of over 15 msf followed by Horizon and Ascendas. Most institutional players are active in the South-West cluster in regions like Farukhnagar, Pataudi, Tarau and Bilaspur.

1.5. Emergence of Delhi as a Warehousing Address

Delhi stands as a major retail hub in North India with an extensive and diverse consumer base, solidifying its position as a crucial distribution center due to its strategic geographical location. The rise of E-commerce sector has further fueled the city's retail growth, resulting in a surge in demand for storage and fulfillment centers to manage the increasing influx of online orders. Consequently, a significant number of warehouses have proliferated in and around the city, often without proper government approvals. The escalating need for shorter delivery times has led to a surge in demand for in-city warehouses. These demands are being catered by the micro-markets such as Bamnoli, Dhulsirus, Barthal, Alipur, Okhla, Mohan Estate, Munrika, Dwarka, and others on ad hoc basis.

Moreover, the increased saturation of supply in the vicinity of the airport has generated a growing demand for warehouses in surrounding areas. Presently, the warehouses in close proximity to the airport predominantly comprise Grade B and Grade C structures, which lack essential approvals and modern facilities. Despite of their non-compliance, these warehouses experience substantial demand, evident from the high occupancy levels in various micro-markets. However, due to the absence of proper infrastructure and regulation, these warehouses are unable to fully realize their rental potential. Recognizing this untapped market, institutional and organized players like ESR, FWS, and Horizon Industrial Parks are strategically entering micro-markets to address the persisting demand for warehousing solutions.

1.9. Performance Outlook and Inference

The National Capital Region (NCR) continues to be a thriving hub for warehousing, driven by the dynamic interplay of factors such as population growth, economic development, and improved infrastructure. The upcoming supply of approximately 29 msf indicates a sustained interest from key players, especially in the South-West cluster, highlighting its prominence in the region. With E-commerce, 3PL, FMCG, and manufacturing sectors steering absorption, the market is witnessing a rental uptick, particularly for Grade A structures. The emergence of Delhi as a warehousing address reflects its pivotal role in catering to the demands of a diverse consumer base and the growing E-commerce sector. However, challenges persist in the form of unorganized micro-markets with Grade B and Grade C structures lacking necessary approvals and modern facilities. Institutional players are strategically entering these micro-markets to tap into the demand, underscoring a potential shift towards organized and compliant warehousing spaces.

Key developments from major players like Indospace, Horizon, and Logos further indicate a robust landscape, with Grade A structures equipped with essential amenities. The high occupancy levels in these developments emphasize the demand for quality warehousing facilities. The performance outlook suggests a positive trajectory for the NCR warehousing market, driven by sustained demand, strategic developments, and a gradual shift towards organized and compliant storage solutions.

HOSPITALITY MARKET OVERVIEW

1. Delhi – Hospitality Overview (Hotels)

Delhi stands out as a key market for hoteliers due to its varied demand segments. The Diplomatic Enclave and business hubs like Connaught Place, Okhla Industrial Area, Jasola, Wazirpur Industrial Area, Netaji Subhash Place, among others, create distinct demands, particularly in the realm of M.I.C.E. (Meetings, Incentives, Conferences, and Exhibitions) and business tourism. In recent times, Aerocity has become a focal point for numerous prominent hospitality groups, addressing the substantial influx of visitors to Indira Gandhi International Airport. The city also experiences significant local demand for banquet spaces to host events, coupled with a need for Food & Beverages (F&B) services. This trend concurrently influences the demand for complementary room accommodations. It's essential to note that the hotel demand in any city can vary based on socio-economic conditions, geopolitical factors, and global events. The primary factors fueling the demand for hotels in Delhi include:

- **Domestic Tourism:** Domestic tourism has always been a dominant factor in driving the demand for hotels in the country. Domestic tourism has sustained strong growth in recent years and has allowed the sector to thrive. Delhi serves as a major cultural and business hub along with being a key terminal for connection to various other smaller nodes in North India.
- **M.I.C.E Tourism:** M.I.C.E tourism is an integral part of the Indian hospitality industry. It has primarily relied on domestic corporate events and social events. India has been laying groundwork to host more M.I.C.E events with Delhi being one of the central destinations for such developments. The recent emergence of convention centres such as Yashobhoomi Convention Centre and Pragati Maidan mark a significant turning point as India will now be able to position itself with global cities like Berlin, Philadelphia, and Singapore for hosting massive events. Hosting the G20 summit, which culminated in Delhi was a significant milestone reached in this journey.
- **Government and Diplomatic Activities:** Being the capital city, Delhi frequently hosts governmental events, official meetings, and diplomatic activities. This leads to a steady demand for accommodations by government

officials, diplomats, and related personnel. Concentrated clusters near the Delhi-CBD area represent a flurry of luxury, business hotels designated to cater to this demand.

- **Foreign Tourism:** Delhi-NCR has emerged as a major hub for foreign corporations in the previous decade. With its strategic location, well-developed infrastructure, and favorable business environment, Delhi-NCR has become a preferred destination for both domestic and international companies, leading to robust space absorption in recent years. The city's hospitality industry benefits greatly from international business travel.
- **Cultural, Religious, and Spiritual Tourism:** Spiritual and religious sites have become instrumental in shaping the burgeoning domestic and international tourism landscape of the city. Historical landmarks like the Red Fort, India Gate, Qutub Minar, and religious sites like Lotus Temple and Akshardham Temple draw tourists, increasing the demand for accommodation.
- **Airport Transit:** The presence of Indira Gandhi International Airport in Delhi makes it a crucial transit point. Travelers often seek hotels in the vicinity, including the Aerocity area.
- **Weddings and Social Events:** Delhi is a popular destination for weddings and social events. Banquet halls and hotels with event spaces experience heightened demand for hosting such occasions.

1.2. Potential of Mix-use development along NH-48

As per the Delhi Master Plan 2021, hotel land is eligible to use a maximum FAR of 20% for construction of commercial offices, retail shops, and service apartments. For instance, the Pullman and Andaz also lease office spaces at their Aerocity Hotels. A review of this master plan has resulted in the DDA's proposal to increase this permissible limit. According to the proposed rules for Development Controls for Commercial Centres pertaining to hotels, a maximum of 40 per cent of floor area ratio (FAR) can be used for the commercial offices, retail and service shops and residential purposes.

This will address the needs of special category of persons/visitors/tourists/business delegations for both domestic as well as international visitors who would prefer to stay for longer period. Construction of mixed-use development along NH-8 would not only increase the viability of the hotel but also enable the developer to enjoy a share of the upcoming office market near Aerocity. Currently large office developments of developers like Prestige, and Bharti (Worldmark Phase 2) are under construction and expected to add to the office supply near Aerocity. The planned RRTS to run from Delhi till Alwar is also planned to have a station at Aerocity. This enhances the potential of this market as an upcoming hub for Mix-use developments.

1.3. Delhi – Key Hotel Players and Market Share

Delhi remains the second largest hotel market in India in terms of both inventory and branded room revenue. With an active focus on developing Delhi as one of the key destinations for M.I.C.E developments along with its significance in terms of being the capital city, a central transit hub, and an administrative center, Delhi is poised to be at the forefront of growth in the hospitality industry and maintain its position in the top 3 hotel markets of the country.

2. Gurugram – Hospitality Overview (Serviced Apartments)

As Gurugram and the broader Delhi-NCR region continue to emerge as a focal point for international corporations and executives arriving in India to invest and contribute to the country's economy, there is a growing demand for high-quality and serviced accommodations. Both serviced apartments and hotels cater to different preferences and needs, and the choice between them depends on factors such as the length of stay, desired amenities, and the kind of experience a traveler is seeking. Serviced apartments are especially popular among business travelers, expatriates, and families looking for a more homely and cost-effective accommodation option.

Serviced apartments are well-suited for individuals or families planning an extended stay. They often provide a more home-like environment compared to a hotel room, with separate living and sleeping areas. Staying in a serviced apartment allows guests to experience a destination more like a local resident. Serviced apartments are designed to mimic a home setting, with amenities such as a kitchen, living room, and in-unit laundry facilities. This appeals to guests who prefer a more residential atmosphere. Guests staying in serviced apartments have the flexibility to manage their schedules independently and can choose when to cook, do laundry, or relax in their living space, providing a sense of independence. While not as extensive as hotel services, many serviced apartments offer personalized services such as housekeeping and concierge. The contemporary serviced apartment complex comprises studio units, as well as two- or three-bedroom facilities, equipped with a range of modern amenities which includes refrigerators, kitchenettes, microwave ovens, recreational facilities, and high-speed internet.

Serviced apartments are occupied by a diverse range of individuals, and the popularity of these accommodations has grown across various demographics. Gurugram has established itself as a prominent business hub for international companies. Executives and business professionals on short to extended business trips often prefer serviced apartments for their home-

like atmosphere, flexibility, and amenities conducive to both work and relaxation. Individuals relocating to city, whether for work assignments or other reasons, may choose serviced apartments as temporary housing while they settle into the new environment.

Further, Gurugram has been gaining recognition as a medical hub for international travelers. The city is home to some of the leading hospitals and healthcare facilities in India. Renowned hospitals in the city are equipped with state-of-the-art technology, modern infrastructure, and a team of highly skilled medical professionals. Many healthcare institutions in Gurugram have dedicated international patient services departments that assist with travel arrangements, accommodation, language interpretation, and other logistical aspects for international patients. Individuals traveling for medical reasons, such as undergoing treatment or medical procedures, may opt for serviced apartments for a comfortable and supportive environment. The cost of staying in a serviced apartment for an extended period can be more economical than a hotel, particularly when considering expenses like dining out. This can be beneficial for those on a medical journey that requires a prolonged stay.

2.1. Gurugram – Sector Overview

Gurugram, being a business and IT hub, have witnessed a demand for serviced apartment accommodations from business travelers, expatriates, and medical tourists. Sweta Estates, M3M India, Spaze, and Anant Raj Limited have evaluated this demand and have devised projects to leverage the emerging trend of short-term stays. Investors have recognized the long-term investment potential in serviced apartments, anticipating sustained demand and potential capital appreciation.

Serviced apartments in Gurugram are primarily integrated into mixed-use developments, often combining residential, commercial, and sometimes both elements. Developers choose to diversify their real estate offerings by including serviced apartments. Developers collaborate with established hospitality brands to manage and brand their serviced apartments. This partnership can enhance the perceived value of the property and attract buyers looking for a branded hospitality experience. This strategy allows them to cater to a broader range of buyers with varied preferences. Serviced apartments in Gurugram has been an appealing investment for individuals seeking real estate options that provide consistent rental income. Developers, by introducing serviced apartments, have successfully accessed the investor market, positioning their projects as assets capable of generating income.

Being a market, which is steadily developing a stronghold in the real estate market of Gurugram, service apartments are relatively sparsely located and unorganized. However, clusters are quickly coming up around areas such as Sohna Road, Golf Course Extension Road, and New Gurgaon as these are areas with large number of commercial projects and upcoming micro-markets. The below map illustrates presence of prominent serviced apartments in Gurugram:

Source: C&WI Research; Google Maps

2.2. Gurugram – Existing Inventory, Status, Key Players of Serviced Apartments

Details of the prominent service apartment complexes in Gurugram are as follows:

2.3. Upcoming Supply and Outlook

Service apartments are fast becoming the preferred choice for companies as they seek secure and convenience accommodation option for their expat workforce, this makes the life of the executives, more comfortable who can focus on their professional/business instead bothering about domestic help, groceries furniture etc., more over Service Apartments offer more spacious rooms than hotels rooms and have the option of cooking one's own meals.

With significant increase resulting in mixed-use developments in the extended NCR region (resulting from policies such as TOD and mixed-use licensing), developers often plan service apartments together with major retail projects wherever office demand is not established. These service apartments can be leased out to operators in clusters or sold out entirely maximizing the developer's revenue potential. Thus, service apartments act as a suitable alternate for developers instead of being entirely a demand driven product.

Further, players like Housr, The Perch, Flock co-living, and Olive, etc. lease out residential clusters independently and convert them to offer service apartments majorly for working professionals. These players too hold a significant chunk of the total market supply of service apartments and are expanding as work-from-home culture resumes and business travel increases.

Contemporary travelers are constantly on the lookout for abodes that offer the comfort of home in a luxurious setting, resplendent with all amenities. Service apartments offer a perfect opportunity to address these needs of these travelers. Gurugram's status as a corporate and business hub with a significant number of professionals and tourist visiting for short to medium-term durations may lead developers to meet the specific housing needs of travelers.

As delineated above in the table, the prices of farmhouse clusters show considerable variation. Clusters such as Westend Green, Sultanpur, Vasant Kunj, DLF Chhatarpur, Pushpanjali and Bijwasan rank higher primarily due to their connectivity to major roads, quality infrastructure, and proximity to natural serenity.

Furthermore, Westend Green, Sultanpur, Pushpanjali, Bijwasan, Kapashera, and Ghitorni are regions with a substantial availability of farmhouses serving as resorts and banquets for hosting events. These particular pockets command higher prices in the market due to their versatile utility, resulting in a premium over the prevailing market prices in the cluster. As an example, in areas such as Westend Green and Kapashera along NH 48, and likewise in Sultanpur and Ghitorni along

Mehrauli Gurugram Road, properties designated for such uses may change hands at values even surpassing INR 650 – 700 million per acre.

1.2. Green Development Area Policy – Draft

Delhi, like many other cities, has been implementing various policies and initiatives to promote sustainable and environmentally friendly development. Zoning regulations and policies for farmhouses in Delhi are subject to the guidelines set by local authorities and urban planning bodies viz Delhi Development Authority (DDA) and the Municipal Corporation of Delhi (MCD). The authorities aim to control land use, development, and construction activities in the city.

In February 2021, the Green Development Area policy was introduced by the Delhi Development Authority which is expected to be part of the much-awaited Delhi Master Plan 2041. The Green Development Area Policy provides an integrated framework for development in Green Belt – Agricultural land along the border of NCT of Delhi upto a depth of one peripheral revenue village boundary & Low-Density Residential Area (LDRA) – Area under 23 identified villages falling in Urban Extension having a concentration of farmhouses termed as Low-Density Residential Plots. The said policy is still at draft stage and awaiting notification anytime soon along with Delhi Master Plan – 2041. The Policy will encourage ‘green development’ by promoting the production of food and other natural produce to improve food security & creating a regional environmental buffer, reducing impacts of air and noise pollution. The applicability of policy is divided into 3 Grades:

	Grade-1	Grade-2	Grade-3

1.3. Future Outlook

In general, the outlook for this asset class in any market may get influenced by factors like urbanization, zoning regulations, infrastructure development, and demand for such properties. It's crucial to understand that real estate markets are subject to constant change, and the prospects for farmhouses in Delhi can be shaped by various factors.

- **Government Policies and Regulations:** Changes in zoning regulations, land use policies, and other governmental decisions can significantly impact the development and value of farmhouses.
- **Price Trend:** Farmhouses granted approval under the green development policy might experience uptick in pricing, similar to that of plots in and around habitat colonies of South Delhi.
- **Urbanization and Infrastructure Development:** Delhi, like many other major cities, is subject to ongoing urbanization and infrastructure development. The expansion of urban areas can affect the availability of land for farmhouses and may impact property values.
- **Consumer Preferences:** Changing lifestyle preferences and the desire for more spacious and serene living environments might increase the demand for farmhouses. Factors such as air quality, green spaces, and a peaceful living atmosphere could be appealing to certain segments of the population.
- **Environmental Considerations:** Growing environmental awareness may lead to increased interest in properties that promote sustainable living. Farmhouses with eco-friendly features or proximity to green spaces might attract environmentally conscious buyers.
- **Development of New Clusters:** New clusters of farmhouses may emerge as the city expands, providing alternative options for those seeking a retreat from urban life.
- **Investment Opportunities:** Farmhouses may continue to be viewed as attractive investment opportunities, either for personal use or rental income.

In conclusion, the increasing population, evolving lifestyle preferences, and urban expansion might play a significant role in shaping the demand for farmhouses in Delhi.

Gurugram stands out as one of the most dynamic residential real estate markets in the NCR, with approximately 51% of total area absorbed. Demand in the Delhi-NCR market has outpaced supply with supply catching up due to low ready to move inventory levels. Demand in the Delhi-NCR real estate market is growing primarily due to connectivity and linkage, presence of social and lifestyle infrastructure, access to educated talent pool, growth of IT and global capacity centres in India and healthy mix of commercial, IT/ITeS and SEZ developments. Sector 63A, Gurugram is a premium locality which currently houses marquee projects such as DLF Arbour, DLF Camellias, commercial centres and DLF Cyber City. Sector 63A, Gurugram is located 5 kilometres from the Sector - 56 metro station, 24 kilometres from Indira Gandhi International Airport, 7 kilometres from DLF 5, DLF Camelias and One Horizon Centre, 13 kilometres from DLF Cyber City and has connectivity to national highway 48 which is 13 kilometres via the Golf Course Extension Road. In addition, ongoing projects and planned projects in New Delhi and NCR accounted for 16.46 million square feet, as of September 30,

A diverse portfolio of residential and commercial projects with large land reserves and a strong project pipeline

We believe that our large land reserves are an important component of our real estate development business. We typically acquire agricultural land which is subsequently converted into developable land. We identify location based on the potential use of land. After identification, we reach out to the owners through our network of brokers. We conduct diligence of the title and viability of the land. After acquisition, we acquire the relevant licenses to develop properties based on development plans. As of September 30, 2023, we held a total of 312.20 acres across the Delhi-NCR region of which we held 88.44 acres of land reserves in the New Delhi region, 167.14 acres of land reserves in Sector 63A, Gurugram and 56.62 acres of commercial land and buildings. The land reserves are either owned by us or are land reserves over which we have sole development rights.

As of September 30, 2023, our total land reserves had a Potential Developable area of 3.19 million square feet in the New Delhi region. Our expansive land reserves allow us to launch and market our residential and commercial developments at appropriate times to take advantage of favourable market conditions and demand, without having to acquire land in time-constrained circumstances. This allows us to respond more effectively to changes in market conditions and demand. Our land reserves also provide us with the ability to develop projects at strategic locations, which we believe command higher values resulting in relatively higher margins and higher lease income. As of September 30, 2023, our land reserves are uncontested and are not subject to any ongoing litigation.

We believe, our strong brand recall, track record of quality execution and deliveries have been instrumental in our sales and performance. As of September 30, 2023, we have been able to complete and nearly-complete 11 projects with an aggregate Developable area of 9.07 million square feet. Our completed projects include Anant Raj Aashray I in Neemrana, Rajasthan, an office building in Sector 44, Gurugram and Anant Raj Tech Park in Panchkula and Manesar. As part of our project Anant Raj Estate, we are currently developing 7.84 million square feet of which we are developing 0.67 million square feet of plots and villas and have planned to develop two projects of independent floors of 0.40 million square feet each, which is to be completed by Fiscal 2027 and Fiscal 2028, respectively. As of September 30, 2023, we have delivered a total inventory of 4.72 million square feet of floors, plots and villas. We expect to complete further development of 1.47 million square feet of floors, plots and villas by Fiscal 2027 and 2028. For further details, please see “*Our Planned Residential Projects*” on page 169.

Our customers have diversified profiles and aspirations across ready-to-move homes and newly-launched projects (which may take a few years to complete). To cater to customer demand, we aim to tailor our inventory mix to an optimum proportion of under-construction developments and ready-to-move units. We believe that such inventory mix positions us as one of the few real estate developers in India with a diverse portfolio of ready-to-move homes and under-construction developments, enabling us to cater to the varied preferences of residential customers.

The table below sets forth details of the Saleable area/Leasable area of our completed projects and near-completion projects, ongoing projects and planned projects:

Portfolio	Saleable Area/Leasable area (million square feet)	
	Residential	Commercial
Completed Projects/Near-Completion Projects	5.75	3.32
Ongoing Projects	5.08	2.58
Planned Projects	3.98	4.82
Total	14.81	10.72

Over the past three years, the National Capital Region (NCR) has generally experienced higher absorption levels compared to supply in the region due to increased affordability, coupled with ongoing and upcoming infrastructure projects that enhance the mobility of people. (*Source: C&W Report*) We believe that due to the large number of our residential properties that are either available for sale or will be available for sale, we are well positioned to benefit from an upturn in the Indian residential real estate market. In respect of several of our recent developments such as Anant Raj Estate and Ashok Estate, we have been able to increase our average selling prices, from project launch until completion. (*Source: C&W Report*)

We are also focused on the execution of our planned projects. The tables below provides information in relation to these Planned Projects as of September 30, 2023:

Ability to capitalize on industry tailwinds, rising prices and low unsold inventories in our key micro markets

In light of the current market scenario and the upturn in economic activity, the residential market in the National Capital Region (NCR) is poised to witness strong activity, propelled by the demand from end users. Gurugram stands out as one of the most dynamic real estate markets in the NCR, particularly in terms of residential supply. Out of the total units launched in NCR in 2022 (24,206 units), Gurugram accounted for ~75%. In 2022, Gurugram saw the addition of 18,201 units, aligning with the figures from the previous year. The supply continued to rise, with 15,595 new launches until Q3 2023, constituting ~53% of the total supply in Delhi NCR. Over the past three years, numerous launches in Gurugram included plotted projects and units with additional spaces such as study rooms, catering to the demand driven by the work-from-home concept.

Golf Course Extension Road has established itself as a distinguished and premium real estate micro market. The region features a mix of residential projects, including high-rise apartments, independent floors, plots and villas. As customer preferences pivoted toward premium and luxury housing, the micro-market experienced comparable supply levels in both 2022 and 2023, accompanied by exceptional sales momentum. In the years 2022 and 2023, the micro-market saw the addition of approximately 3,000 units by 7 developers such as DLF, Birla Estate, Emaar, Adani Realty and others. During this time, the Golf Course Extension Road market has experienced the supply of both independent floors and apartments. According to C&W, multiple newly launched projects have recorded significant traction within a short period of launch. For instance, Emaar Urban Oasis and Puri Aravallis were entirely sold out within the initial two weeks of their releases, priced in the range of Rs. 15,500 to 16,500 per square feet. Moreover, DLF The Arbour, a luxury project, also received a tremendous response and got sold out within the first week of its launch. The historic launch of a residential project with a price range of Rs. 17,500 -18,500 per square feet in Golf Course Road Extension area indicates that the real estate market in the location is highly buoyant. This might be attributed to various factors including the location, connectivity, and amenities available in the area, along with the overall favourable sentiment towards the real estate market in the region. Furthermore, the market witnessed a further elevated the price range of the micro market to Rs. 18,000 – 22,000 per square feet with launches of Birla Avik. (Source: C&W Report)

Unless there is a change in consumer sentiment, the upward momentum in prices will persist for several quarters. These launches have exhibited strong absorption trends. Presently, plots in this micro market are valued within the range of Rs. 1,75,000 to 2,00,000 per square yard. From 2018 to 2023, ~3702 units of Apartments were launched while ~3,004 units of independent floors were launched. Both residential formats saw healthy absorption with apartments observing ~99% absorption while independent floors observing 96% absorption levels. (Source: C&W Report)

We believe that we are well positioned to capitalize on the industry tailwinds in the Delhi-NCR real estate market including increasing prices and absorption rates. Our unsold inventory in Anant Raj Estate which is located in the Golf Course Extension Road micro-market enables us to monetize our land parcels in the area.

Investments in the high growth, high yield data centre segment

We believe that our investments in the data centre segment enable us to capitalize on rising data consumption coupled with data localisation law fuelling rapid demand. In August 2023, the Parliament of India approved the Digital Personal Data Protection Act, 2023, which mandates companies to store personal data locally, encouraging local storage of the data gathered within India. In the Delhi-NCR region, the data centre capacity is expected to increase from 84MW in calendar year 2022 to 364MW in 2026. The demand for data centres is being largely driven by recent development in artificial intelligence & machine learning and the widespread transition of 4G to 5G in India. Data localization norms initiated by the government and regulators, that mandates storage of sensitive data within India, is also expected to support development of local data centres. (Source: C&W Report)

We currently possess land parcels with a potential Leasable area of 5.66 million square feet at Manesar, Panchkula and Rai which can be structurally strengthened and retrofitted to create a potential data centre capacity of 300 MW. Phase I of our data centre in Manesar, Gurugram is currently operational with an initial capacity of 3 MW and an enhancement of an additional 3 MW is ongoing. We expect the capacity of our data centres to increase to 50MW in subsequent years. We have received TIA-942 tier III certification for phase I of our proposed 21MW data centre at Manesar, 5G ready and have strategic tie ups with government agencies to provide data centre services to the government. Our data centres enable us to offer cost-effective data storage, with the advantage of low maintenance, high-end protection, and risk management. The table below provides details of the total developable area and maximum capacity of our proposed data centres:

Property	Total developable area (in million square feet)	Total proposed capacity (in MW)
Anant Raj Tech Park, Manesar	1.70	50
Anant Raj Tech Park, Panchkula	0.56	50
Anant Raj Tech Centre, Rai	3.40	200

Note: The details in the tables above in relation to total proposed capacity have been confirmed by Udayan Chaudhari & Associates Pvt. Ltd., pursuant to their certificate dated January 4, 2024.

We have the ability to lease out the existing capacity of 3 MW at our Manesar data centre. Data Centres with a capacity of 1MW to 5MW are projected to be rented at a rate of 80-100 USD per KW per month. (Source: C&W Report)

Land Reserves for Future Development

Our planned residential projects are spread across several micro-markets in the Delhi-NCR region, including Sector 63A, Gurugram. Our land holdings enable us to launch and market our residential and commercial developments at appropriate times to take advantage of favourable market conditions and demand, without having to acquire land in time-constrained circumstances.

Our land reserves are either owned by us or are land reserves over which we have sole development rights. The table below provides details of our land reserves as of September 30, 2023:

Particulars	Area (In acres)
New Delhi	88.44
Sector 63A, Gurugram	167.14
Commercial land and buildings	56.62
Total	312.20

Key Business Processes

We have established a systematic process for land acquisition, designing and planning, project execution, advertising and marketing, sales and customer care.

Land Acquisition

We use different ways to acquire land. We primarily acquire agricultural land which we convert into developable land. Land is typically acquired directly through negotiations with the seller. It can also be acquired through acquisitions, joint ventures, or other such arrangements with the entities that hold land parcels.

Design and Planning

Concept Design

As part of our design and planning process, we discuss the relevant assessment report internally and the heads of our internal departments provide their inputs. Further, we submit a project brief in text format to an architect, who is responsible thereon for developing the conceptual design for the project. The conceptual design includes master-planning and landscaping with orientation of buildings.

Design Development

The output of the concept design phase is a master plan with a broad description of the planned development in the form of a presentation. The design development phase involves further detailing of the concept design. Upon finalization of the design drawing, approvals are taken from relevant authorities. Once approvals are obtained, we prepare another set of drawings called “good for construction” drawings. The “good for construction” drawings include minute design details, such as dimensions, wall thickness, window dimensions, air conditioning connections and toilet piping, and are a blueprint of the proposed development which the construction team uses in execution the project.

Project Execution

Regulatory Approvals

We have a liaison team comprising qualified personnel whose function is to obtain approvals from various statutory authorities including environmental approvals, approval of building plans, layout plans and in certain cases, approvals for conversion of

agricultural land to commercial or residential land. For our ongoing and planned projects, we are required to obtain the necessary approvals and certificates for the construction and development of our projects.

Site Development and Construction

We have a large construction management team working on various projects that employs advanced construction techniques in our projects. A quality assurance team is present at every project site to carry out checks on all materials used in construction. We also have a team of project engineers who manage and coordinate site development and construction activities.

Advertising and Marketing

We believe in our messaging with our Company's values and mission. Our marketing approach involves building a robust online presence through our website that is aimed at both domestic and international markets. We employ search engine optimization (SEO) strategies to enhance online visibility and attract organic traffic for our websites and social media channels. We also have a dedicated public relations team for media relations and issuing press releases in relation to significant Company milestones or product launches. In addition, we also maintain a consistent physical presence at events and expos to boost visibility, direct customer interaction, and channel development.

Sales

Our sales strategy is targeted at middle class, upper middle class, and high net worth ('HNI') individuals from Andhra Pradesh and North India, specifically Delhi, NCR, Haryana, Punjab, Rajasthan, residing in India and abroad. We attract and acquire customers through our balanced pricing strategy, advanced product segmentation, quote effectiveness and efficiency maintained through intelligent pricing guidelines, and automation of pricing and quote-to-closure process.

Customer Care

We have a planned and organised process for resolution of customer grievances through a dedicated team, backed up by an escalation matrix devised to deal with unresolved grievances. The 'Customer Relationship Department', located at our Head Office in Delhi, is a nodal point for handling customer grievances. Our customer care team reports to the department head and escalates the customer complaints as and when required for complete resolution of customer query.

Customer queries could either be in the form of service request or a complaint where the desired work is unfulfilled within the stipulated time frame. We are adequately and suitably staffed to facilitate customers to lodge their grievances through our interactive voice response (IVR) system, email, phone, website and our social media. While complaints are resolved through a structured complaints matrix, queries involving inputs required from cross-functional teams are dealt accordingly by the team and the same is communicated to customer for closure of their service request within the defined turn-around time (TAT). All complaints/queries received are recorded, tracked and reported by the customer care representative where focus is on customer satisfaction and retaining him with the company.

Safety Measures

Our Company has in place systematic risk management process to identify and control hazards at construction project sites and offices. We conduct initial and periodic inspections of the workplace to identify new or recurring hazards. In Fiscal 2023, working conditions and health and safety measures at 100% of our project locations were assessed by the Anant Raj Safety Team to revisit existing processes and discuss scope for improvement of working conditions.

Fire alarm systems and smoke detectors are installed at all premises. Fire extinguishers are maintained in quality condition to ensure effective use during any untoward incidents. We also strive to use non-flammable substitutes for its construction project sites. In addition, we also establish project-specific safety committees to discuss improvement areas. All employees at project sites are required to wear appropriate safety gear including safety helmets, safety goggles, ear muffs or ear plugs, safety gloves, full body suits, safety shoes and high visibility clothing. Our buildings are designed keeping the health and well-being of our employees and customers in mind. Different design elements minimise stress or discomfort due to loud sounds, insufficient light or excessive glare, or thermal stress in order to create ergonomically friendly spaces. We have also taken steps to control the dust released from our projects by installing high barricades and mandatorily covering construction materials kept on the ground or in vehicles.

We believe that we have established adequate processes for workers to report work related hazards and to remove themselves from such risks. In the last three Fiscals, we have had no recordable work-related injuries, fatalities, high consequence work-related injury or ill-health, or complaints in relation to working conditions and health and safety.

Data Protection

Our Company has established standard operating procedures to ensure security of data to minimise the Company's exposure to security breaches and compliance issues, including potential subsequent financial loss, reputation damage or legal exposure.

Compliance with the standard procedure is mandatory for staff involved in purchasing or designing new physical infrastructure, or updated systems or processes which necessitate processing of data. Compliance failures are reported to the Head of Information for further action, and such failures are treated as misconduct which may result in summary dismissal. Further, non-adherence to the standard procedure is treated as an information security incident and must be reported to our management.

Insurance

We believe that we have robust risk management processes in place. Our insurance policies cover risks which we envisage for our projects, which may include physical loss or damage, including natural perils. The insurance policies maintained in respect of our projects include building insurance and public liability insurance.

Intellectual Property

As of September 30, 2023, we have 10 trademark registrations for various names and logos of our projects and an application for the registration of the name 'Anant Raj Limited'.

FVCIs are not permitted to participate in the Issue. Currently, QIBs, who are eligible to participate in the Issue and also as defined under Regulation 2(1)(ss) of the SEBI ICDR Regulations, are set forth below:

- scheduled commercial banks;
- state industrial development corporations;
- the National Investment Fund set up by resolution no. F. No. 2/3/2005-DDII dated November 23, 2005, of the Government published in the Gazette of India; and
- systemically important non-banking financial companies.

Eligible FPIs are permitted to participate under Schedule II of FEMA Rules in this Issue. Eligible FPIs are permitted to participate in the Issue subject to compliance with all applicable laws and such that the shareholding of the FPIs do not exceed specified limits as prescribed under applicable laws in this regard. FVCIs are not permitted to participate in this Issue.

In terms of the SEBI FPI Regulations, the offer of Equity Shares to a single FPI or an investor group (which means the same set of ultimate beneficial owner(s) investing through multiple entities) is not permitted to exceed 10% of our post-Issue Equity Share capital of our Company. Further, in terms of the FEMA Rules, the total holding by each FPI or investor group shall be below 10% of the total paid-up Equity Share capital of our Company. Hence, Eligible FPIs may invest in such number of Equity Shares in the Issue such that (i) the individual investment of the FPI in our Company does not exceed 10% of the post-Issue paid-up capital of our Company on a fully diluted basis, and (ii) the aggregate investment by FPIs in our Company does not exceed the sectoral cap applicable to our Company on a fully diluted basis. In case the holding of an FPI or investor group increases to 10% or more of the total paid-up equity capital, on a fully diluted basis, the FPI including its investor group is required to divest the excess holding within five trading days from the date of settlement of the trades resulting in the breach. In the event that such divestment of excess holding is not done within the aforementioned prescribed time, the total investment made by such FPI together with its investor group will be re-classified as FDI as per the procedure specified by SEBI, and the FPI and its investor group will be prohibited from making any further portfolio investment in our Company under the SEBI FPI Regulations. However, in accordance with Regulation 22(4) of the SEBI FPI Regulations, the FPIs who are: (i) appropriately regulated public retail funds; (b) public retail funds where the majority is owned by appropriately regulated public retail fund on look through basis; or (c) public retail funds and investment managers of such foreign portfolio investors are appropriately regulated, the aggregation of the investment limits of such FPIs having common control, shall not be applicable.

Two or more subscribers of ODIs having a common beneficial owner shall be considered together as a single subscriber of the ODI. In the event an investor has investments as a FPI and as a subscriber of ODIs, these investment restrictions shall apply on the aggregate of the FPI and ODI investments held in the underlying company. Pursuant to the SEBI Circular dated April 5, 2018 (Circular No: IMD/FPIC/CIR/P/2018/61), our Company has appointed National Securities Depository Limited as the designated depository to monitor the level of FPI/NRI shareholding in our Company on a daily basis and once the aggregate foreign investment of a company reaches a cut-off point, which is 3% below the overall limit a red flag shall be activated. SEBI however, pursuant to its Circular dated May 17, 2018 (Circular No: SEBI/HO/IMD/FPIC/CIR/P/2018/81), directed that this system of monitoring foreign investment limits in Indian listed companies be made operational with effect from June 1, 2018. The depository is then required to inform the Stock Exchanges about the activation of the red flag. The Stock Exchanges are then required to issue the necessary circulars/ public notifications on their respective websites. Once a red flag is activated, the FPIs must trade cautiously, because in the event that there is a breach of the sectoral cap, the FPIs will be under an obligation to disinvest the excess holding within five trading days from the date of settlement of the trades.

As per the circular issued by SEBI on November 5, 2019, these investment restrictions shall also apply to subscribers of P-Notes. Two or more subscribers of P-Notes having a common beneficial owner shall be considered together as a single subscriber of the P-Note. In the event an investor has investments as a FPI and as a subscriber of P-Notes, these investment restrictions shall apply on the aggregate of the FPI and P-Note investments held in the underlying company.

Eligible FPIs are permitted to participate in the Issue subject to compliance with conditions and restrictions which may be specified by the Government from time to time.

In terms of the FEMA Rules, for calculating the aggregate holding of FPIs in a company, holding of all registered FPIs shall be included.

THE SECURITIES MARKET OF INDIA

The information in this section has been extracted from documents available on the respective websites of SEBI and the Stock Exchanges and has not been prepared or independently verified by our Company or the BRLM or any of its respective affiliates or advisors.

The Indian Securities Market

India has a long history of organized securities trading. In 1875, the first stock exchange was established in Mumbai. BSE and NSE are the significant stock exchanges in India in terms of the number of listed companies, market capitalisation and trading activity.

Indian Stock Exchanges

Indian stock exchanges are regulated primarily by SEBI, as well as by the Government acting through the Ministry of Finance, Capital Markets Division, under the SCRA and the SCRR. On October 9, 2018, SEBI, in exercise of its powers under the SCRA and the SEBI Act, notified the Securities Contracts (Regulation) (Stock Exchanges and Clearing Corporations) Regulations, 2018 (the “**SCR (SECC) Regulations**”), which regulate *inter alia* the recognition, ownership and governance of stock exchanges and clearing corporations in India together with providing for minimum net-worth requirements for stock exchanges. The SCRA, the SCRR and the SCR (SECC) Regulations along with various rules, bye-laws and regulations of the respective stock exchanges, regulate the recognition of stock exchanges, the qualifications for membership thereof and the manner, in which contracts are entered into, settled and enforced between members of the stock exchanges.

The SEBI Act empowers SEBI to regulate the Indian securities markets, including stock exchanges and intermediaries in the capital markets, promote and monitor self-regulatory organisations and prohibit fraudulent and unfair trade practices. Regulations and guidelines concerning minimum disclosure requirements by listed companies, rules and regulations concerning investor protection, insider trading, substantial acquisitions of shares and takeover of companies, buy-backs of securities, employee stock option schemes, stockbrokers, merchant bankers, underwriters, mutual funds, foreign portfolio investors, credit rating agencies and other capital market participants have been notified by the relevant regulatory authority.

BSE

Established in 1875, it is the oldest stock exchange in India. In 1956, it became the first stock exchange in India to obtain permanent recognition from the Government under the SCRA. Pursuant to the BSE (Corporatization and Demutualization) Scheme 2005 of SEBI, with effect from August 19, 2005, BSE was incorporated as a company under the Companies Act, 1956. BSE was listed on NSE with effect from February 3, 2017.

NSE

NSE was established by financial institutions and banks to provide nationwide online, satellite-linked, screen-based trading facilities with market-makers and electronic clearing and settlement for securities including government securities, debentures, public sector bonds and units. NSE was recognised as a stock exchange under the SCRA in April 1993 and commenced operations in the wholesale debt market segment in June 1994. The capital market (equities) segment commenced operations in November 1994 and operations in the derivatives segment commenced in June 2000.

Listing and delisting of Securities

The listing of securities on a recognised Indian stock exchange is regulated by the applicable Indian laws including the Companies Act, 2013 the SCRA, the SCRR, the SEBI Act and various guidelines and regulations issued by SEBI including the SEBI ICDR Regulations and the SEBI Listing Regulations, as well as pursuant to the listing agreements entered into by our Company with the Stock Exchanges. The SCRA empowers the governing body of each recognised stock exchange to suspend trading of or withdraw admission to dealings in a listed security for breach of or non-compliance with any conditions or breach of company’s obligations under the SEBI Listing Regulations or for any reason, subject to the issuer receiving prior written notice of the intent of the exchange and upon granting of a hearing in the matter. SEBI also has the power to amend the SEBI Listing Regulations and bye-laws of the stock exchanges in India, to overrule a stock exchange’s governing body and withdraw recognition of a recognized stock exchange.

Delisting of equity shares from the stock exchanges, whether by way of a compulsory or a voluntary delisting, is governed by the provisions of the Securities and Exchange Board of India (Delisting of Equity Shares) Regulations, 2021, as amended (the “**Delisting Regulations**”). Following a compulsory delisting of equity shares, a company, its whole-time directors, its

promoters, person(s) responsible for ensuring compliance with the securities laws and the companies promoted by any of them cannot directly or indirectly access the securities market or seek listing of any equity shares for a period of 10 years from the date of such delisting. In addition, certain amendments to the SCRR have also been notified in relation to delisting.

Minimum Level of Public Shareholding

All listed companies (except exempted public sector undertakings) are required to maintain a minimum public shareholding of 25%. Where the public shareholding in a listed company falls below 25% at any time, such company shall bring the public shareholding to 25% within a maximum period of 12 months from the date of such the public shareholding having fallen below the 25% threshold. Consequently, a listed company may be delisted from the Stock Exchanges for not complying with the above-mentioned requirements. Our Company is in compliance with this minimum public shareholding requirement.

Disclosures under the Companies Act and securities regulations.

Under the Companies Act, a public offering of securities in India must be made by means of a prospectus, which must contain information specified in the Companies Act, 2013, the Companies (Prospectus and Allotment of Securities) Rules, 2014 and the SEBI ICDR Regulations. The prospectus must be filed with the relevant registrar of companies having jurisdiction over the place where a company's registered office is situated. A company's directors and promoters shall be subject to civil and criminal liability for misrepresentation in a prospectus. The Companies Act also sets forth procedures for the acceptance of subscriptions and payment of commission rates for the sale of securities. Pursuant to the provisions of the SEBI Act, SEBI has issued detailed guidelines concerning disclosures by public companies and to further investor protection. The SEBI ICDR Regulations permit companies to price their domestic issues of securities in consultation with the lead merchant banker or through the book building process.

Public limited companies are required under the Companies Act, and other applicable guidelines to prepare, file with the RoC and circulate to their shareholders audited annual accounts which comply with the Companies Act's disclosure requirements and regulations governing their manner of presentation and which include sections pertaining to corporate governance, related party transactions and the management's discussion and analysis as required under the SEBI Listing Regulations. In addition, a listed company is subject to continuing disclosure requirements pursuant to the terms of the SEBI Listing Regulations. Accordingly, companies are required to publish unaudited financial statements (subject to a limited review by the company's auditors) on a quarterly basis and are required to inform stock exchanges immediately regarding any unpublished price sensitive information.

Insider Trading Regulations

The Securities and Exchange Board of India (Prohibition of Insider Trading) Regulations, 2015, as amended (the "**Insider Trading Regulations**") have been notified by SEBI to amongst other things, prohibit and penalize insider trading in India and prohibit dealing in the securities of a listed company when in possession of unpublished price sensitive information ("**UPSI**").

The Insider Trading Regulations also impose certain restrictions on the communication of UPSI relating to a company or securities listed or proposed to be listed. In terms of the Insider Trading Regulations, (i) no insider shall communicate, provide or allow access to any UPSI relating to such companies and securities to any person including other insiders; and (ii) no person shall procure or cause the communication by any insider of UPSI relating to such companies and securities, except in furtherance of legitimate purposes, performance of duties or discharge of legal obligations. It also provides disclosure obligations for promoters, employees and directors, with regard to their shareholding in the company, and the changes therein. However, UPSI may be communicated, provided or allowed access to or procured, under certain circumstances specified in the Insider Trading Regulations.

The Insider Trading Regulations define the term "unpublished price sensitive information" to mean any information, relating to a company or its securities, directly or indirectly, that is not generally available which upon becoming generally available, is likely to materially affect the price of its securities and ordinarily includes but not restricted to information relating to the following: (a) financial results; (b) dividends; (c) change in capital structure; (d) mergers, de-mergers, acquisitions, de-listings, disposals and expansion of business and such other transactions; and (e) changes in key managerial personnel. Further, in terms of the Insider Trading Regulations, "generally available information" is defined as information that is accessible to the public on a non-discriminatory basis. An "insider" means any person who is i) a connected person; or ii) in possession of or having access to unpublished price sensitive information. The term "connected person" means any person who is or has during the six months prior to the concerned act been associated with a company, directly or indirectly, in any capacity, including by reason of frequent communication with its officers or by being in any contractual, fiduciary or employment relationship or by being a director, officer or an employee of the company or holding any position, including a professional or business relationship between himself and the company, whether temporary or permanent, that allows such person, directly or indirectly, to have access to unpublished price sensitive information or is reasonably expected to allow such access.

The Insider Trading Regulations make it compulsory for listed companies and certain other entities (including fiduciaries and intermediaries) that are required to handle UPSI in the course of business operations to establish (i) an internal code of practices and procedures for fair disclosure of UPSI; (ii) an internal code to regulate, monitor and report trading by designated persons and immediate relatives of designated persons; and (iii) a policy for procedures to be adopted by a company in case of any leak of UPSI. There are also initial and continuing shareholding disclosure obligations under the Insider Trading Regulations.

Index-Based Market-Wide Circuit Breaker System

In order to restrict abnormal price volatility in any particular stock, SEBI has instructed stock exchanges to apply daily circuit breakers which do not allow transactions beyond a certain level of price volatility. The index-based market-wide circuit breaker system (equity and equity derivatives) applies at three stages of the index movement, at 10%, 15% and 20%. These circuit breakers, when triggered, bring about a coordinated trading halt in all equity and equity derivative markets nationwide. The market-wide circuit breakers are triggered by movement of either the SENSEX of BSE or the NIFTY 50 of NSE, whichever is breached earlier.

In addition to the market-wide index-based circuit breakers, there are currently in place individual scrip-wise price bands of 20% movements either up or down, for all scrips in the compulsory rolling settlement. However, no price bands are applicable on scrips on which derivative products are available or scrips included in indices on which derivative products are available.

The stock exchanges in India can also exercise the power to suspend trading during periods of market volatility. Margin requirements are imposed by stock exchanges that are required to be paid by the stockbrokers.

Settlement

The stock exchanges in India operate on a trading day plus two, or T+2 rolling settlement system. At the end of the T+2 period, obligations are settled with buyers of securities paying for and receiving securities, while sellers transfer and receive payment for securities. For example, trades executed on a Monday would typically be settled on a Wednesday.

Further, in accordance with the circular dated September 7, 2021, issued by SEBI, at any time on or after January 1, 2022, a Stock Exchanges may choose to offer T+1 settlement cycle after giving an advance notice of at least one month.

Trading Hours

Trading on both BSE and NSE normally occurs from Monday through Friday between 9:15 a.m. IST and 3:30 p.m. IST (excluding the 15 minutes pre-open session from 9.00 a.m. IST to 9.15 a.m. IST that has been introduced). BSE and NSE are closed on public holidays. . The recognised stock exchanges have been permitted to set their own trading hours (in the cash and derivatives segments) subject to the condition that (i) the trading hours are between 9.00 a.m. and 5.00 p.m; and (ii) the stock exchange has in place a risk management system and infrastructure commensurate to the trading hours. **Internet-Based Securities Trading and Security Trading using Wireless Technology Services**

Internet trading takes place through order routing systems, which route client orders to exchange trading systems for execution. This permits clients throughout the country to trade using brokers' internet trading systems. Stock brokers interested in providing this service are required to apply for permission to the relevant stock exchange and also have to comply with certain minimum conditions stipulated under applicable law. NSE became the first exchange to grant approval to its members for providing internet-based trading services. Internet trading is possible on both the "equities" as well as the "derivatives" segments of NSE.

Trading Procedure

In order to facilitate smooth transactions, BSE replaced its open outcry system with BSE online trading facility in 1995. This 100% automated screen-based trading in securities was put into practice nationwide. This has enhanced transparency in dealings and has assisted considerably in smoothening settlement cycles and improving efficiency in back-office work. In the year 2014, BSE introduced its new generation trading platform BOLT Plus. NSE has a fully automated trading system called NEAT, which operates on strict time/price priority besides enabling efficient trade.

Depositories

The Depositories Act, 1996 provides a legal framework for the establishment of depositories to record ownership details and effect transfers in electronic book-entry form. Further, SEBI has framed the Securities and Exchange Board of India (Depositories and Participants) Regulations, 2018 in relation to, among other things, the formation and registration of such depositories, the registration of participants as well as the rights and obligations of the depositories, participants, companies and beneficial owners.

SEBI Listing Regulations

Public listed companies are required under the SEBI Listing Regulations to prepare and circulate to their shareholders audited annual accounts which comply with the disclosure requirements and regulations governing their manner of presentation and which include sections relating to corporate governance, related party transactions and management's discussion and analysis as required under the SEBI Listing Regulations. In addition, a listed company is subject to continuing disclosure requirements pursuant to the terms of the SEBI Listing Regulations.

Takeover Regulations

Disclosure and mandatory bid obligations for listed Indian companies under Indian law are governed by the specific regulations in relation to substantial acquisition of shares and takeover. After listing on the stock exchanges, the provisions of the Securities and Exchange Board of India (Substantial Acquisition of Shares and Takeovers) Regulations, 2011 (the “**Takeover Regulations**”) will apply to our Company, which provide specific regulations in relation to substantial acquisition of shares and takeovers. Once the equity shares of a company are listed on a stock exchange in India, the provisions of the Takeover Regulations will apply to any acquisition of the company's shares/voting rights/control. The Takeover Regulations prescribes certain thresholds or trigger points in the shareholding that a person or entity (along with persons acting in concert with such person or entity) has in the listed Indian company, which give rise to certain obligations on the part of the acquirer. Acquisition of shares or voting rights up to a certain threshold prescribed under the Takeover Regulations mandate specific disclosure requirements, while acquisitions (direct or indirect, along with persons acting in concert with such acquirer) crossing particular thresholds may result in the acquirer having to make an open offer for the shares of the target company.

Buy-back

A company may buy-back its shares subject to compliance with the requirements of Section 68 of the Companies Act, 2013, as amended and the SEBI (Buy-back of Securities) Regulations 2018, as amended. Under Section 68 of the Companies Act, 2013, as amended, a company may buy-back its shares out of its free reserves or securities premium account or the proceeds of the issue of any shares or other specified securities, other than proceeds of an earlier issue of the same kind of shares or same kind of other specified securities.

Derivatives (Futures and Options)

Trading in derivatives is governed by the SCRA, the SCRR and the SEBI Act. The SCRA was amended in February 2000 and derivatives contracts were included within the term “securities”, as defined by the SCRA. Trading in derivatives in India takes place either on separate and independent derivatives exchanges or on a separate segment of an existing stock exchange. The derivatives exchange or derivatives segment of a stock exchange functions as a self-regulatory organisation under the supervision of the SEBI.

A review of interim financial information consists of making inquiries, primarily of the persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Standards on Auditing specified under Section 143(10) of the Companies Act, 2013, and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

6. We did not review the interim financial statements/financial information/financial results of 39 (thirty nine) subsidiaries and 1 (one) jointly controlled entity included in the consolidated unaudited financial results of the entities included in the Group, whose results reflect total assets of Rs. 1265.48 crores as at September 30, 2023, and total revenues of Rs. 148.81 crores and Rs. 293.72 crores, total net profit after tax (net) of Rs. 39.91 crores and Rs. 69.80 crores and total comprehensive income of Rs. 39.91 crores and Rs. 69.80 crores, for the quarter ended September 30, 2023, and for the period from April 1, 2023, to September 30, 2023, respectively.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

The Holding Company's Board of Directors is responsible for the preparation and presentation of these consolidated financial statements in terms of the requirements of the Act that give a true and fair view of the consolidated financial position, consolidated financial performance including other comprehensive income, consolidated changes in equity and consolidated cash flows of the Group including the Accounting Standards specified under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended. The respective Board of Directors of the companies/entities included in the Group and of its associates and jointly controlled entities are responsible for maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of each company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and the design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring accuracy and completeness of the accounting records, relevant to the preparation and presentation of the consolidated financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error, which have been used for the purpose of preparation of the consolidated financial statements by the Directors of the Holding Company, as aforesaid.

In preparing the consolidated financial statements, the respective Board of Directors of the companies included in the Group and of its associates and jointly controlled entities are responsible for assessing the ability of the respective entities to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the respective Board of Directors either intend to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

The respective Board of Directors of the companies included in the Group and of its associates and jointly controlled entities are responsible for overseeing the financial reporting process of the Group and of its associates and jointly controlled entities.

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material

misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal financial controls relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Holding company has adequate internal financial controls system in place with reference to financial statements and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the ability of the Group and of its associates and its jointly controlled entity to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group and of its associates and jointly controlled entities to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group and its associates and jointly controlled entities to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the audit of financial statements of such entities or business activities included in the consolidated financial statements of which we are the independent auditors. For the other entities included in the consolidated financial statements, which have been audited/certified by other auditors/management, such other auditors/management remain responsible for the direction, supervision and performance of the audits carried out by them. We remain solely responsible for our audit opinion.

We communicate with those charged with governance of the Holding Company and such other entities included in the consolidated financial statements of which we are the independent auditors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal controls that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements for the financial year ended March 31, 2023, and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

ANNEXURE "B" TO THE INDEPENDENT AUDITOR'S REPORT

(Referred to in paragraph 1(f) under 'Report on Other Legal and Regulatory Requirements' section of our report of even date)

Report on the Internal Financial Controls under Clause (i) of sub-section 3 of the section 143 of the Companies Act, 2013 ("the Act")

Opinion

In conjunction with our audit of the consolidated financial statements of Anant Raj Ltd. (hereinafter referred to as "the Holding Company") as of and for the year ended March 31, 2023, we have audited the internal financial controls with reference to consolidated financial statements of the Holding Company and such companies incorporated in India under the Act which are its subsidiary companies, its associate companies and its jointly controlled entity, as of that date.

In our opinion, the Holding Company and such companies incorporated in India which are its subsidiary companies, its associate companies and jointly controlled entity, have, in all material respects, adequate internal financial controls with reference to consolidated financial statements and such internal financial controls were operating effectively as at March 31, 2023, based on the internal financial controls with reference to consolidated financial statements criteria established by such companies considering the essential components of such internal controls stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India (the "Guidance Note").

Management's Responsibility for Internal Financial Controls

The respective Board of Directors of the Company, its subsidiary companies, its associate companies and its jointly controlled entity are responsible for establishing and maintaining internal financial controls with reference to consolidated financial statements based on the criteria established by the respective company considering the essential components of internal control stated in the Guidance Note. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to the respective company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

Auditor's Responsibility

Our responsibility is to express an opinion on the internal financial controls with reference to consolidated financial statements based on our audit. We conducted our audit in accordance with the Guidance Note and the Standards on Auditing, prescribed under section 143(10) of the Act, to the extent applicable to an audit of internal financial controls with reference to consolidated financial statements. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls with reference to consolidated financial statements were established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls with reference to consolidated financial statements and their operating effectiveness. Our audit of internal financial controls with reference to consolidated financial

statements included obtaining an understanding of internal financial controls with reference to consolidated financial statements, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of the internal controls based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained and the audit evidence obtained by the other auditors of the relevant subsidiary companies, associate companies and jointly controlled entity in terms of their reports referred to in the Other Matters paragraph below, is sufficient and appropriate to provide a basis for our audit opinion on the internal financial controls with reference to consolidated financial statements.

Meaning of Internal Financial Controls over Financial Reporting

A Company's internal financial controls with reference to consolidated financial statements are a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial controls with reference to consolidated financial statements includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of consolidated financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the consolidated financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls with reference to consolidated financial statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls with reference to consolidated financial statements to future periods are subject to the risk that the internal financial controls with reference to consolidated financial statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Other Matters

Our aforesaid report under Section 143(3) (i) of the Act on the adequacy and operating effectiveness of the internal financial controls over financial reporting insofar as it relates to 38 (thirty eight) subsidiary companies, 1 (One) jointly controlled entity and 3 (three) associate companies, which are companies incorporated in India, is based solely on the corresponding reports of the auditors of such companies incorporated in India.

Opinion

In our opinion, to the best of our information and according to the explanations given to us, the Company and its subsidiary companies, associate companies and jointly controlled entity, which are companies incorporated in India, have, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2023, based on the internal control over financial reporting

criteria established by the respective Companies considering the essential components of internal control stated in the Guidance Note issued by the ICAI.

The Company is primarily engaged in development and construction of residential townships, group housings, commercial developments, information and technology parks, malls, office complexes, affordable housings, data centres, hospitality and services apartments primarily in the State of Delhi, Haryana, Rajasthan and the National Capital Region.

The consolidated financial statements are approved for issue by the Company's Board of Directors on April 25, 2023.

2 Significant Accounting policies**(a) Basis of preparation and presentation of financial statements**

The financial statements of the subsidiaries, associates and jointly controlled entities used in the consolidation are upto the same reporting date as that of the Company i.e. March 31, 2023.

These consolidated financial statements (CFS) of the Company are prepared in accordance with the Indian Accounting Standards (Ind AS), under historical cost convention on the accrual basis except for certain financial instruments which are measured at fair values, the provisions of the Companies Act, 2013 (Act), (to the extent notified) and guidelines issued by the Securities and Exchange Board of India (SEBI). The consolidated financial statements have been prepared on a going concern basis in accordance with accounting principles generally accepted in India. The Ind AS are prescribed under section 133 of the Act read with Rule 3 of the Companies (Indian Accounting Standards) Rules, 2015, and relevant amendment rules issued thereunder.

Accounting policies have been consistently applied except where a newly issued Accounting Standard is initially adopted or a revision to an existing Accounting Standard requires a change in the Accounting policies hitherto in use.

The consolidated Balance Sheet, the Statement of Changes in Equity, the Statement of Profit and Loss and disclosures are presented in the format prescribed under Division III of Schedule III of the Act, as amended from time to time that are required to comply with Ind AS. The Statement of Cash Flows has been presented as per the requirements of Ind AS 7 'Statement of Cash Flows'.

The consolidated financial statements are presented in Indian Rupees, which is also its functional currency. All amounts have been rounded off to the nearest Rupees lakhs, unless otherwise indicated.

(b) Basis of consolidation

The CFS comprise the financial statements of the Company and its subsidiaries as at March 31, 2023. Control is achieved when the Group is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Specifically, the Group controls an investee if and only if the Group has:

- (i) Power over the investee (i.e. existing rights that give it the current ability to direct the relevant activities of the investee);
- (ii) Exposure, or rights, to variable returns from its involvement with the investee; and
- (iii) The ability to use its power over the investee to affect its returns.

Generally, there is a presumption that a majority of voting rights result in control. To support this presumption and when the Group has less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- (i) The contractual arrangement with the other vote holders of the investee;
- (ii) Rights arising from other contractual arrangements;
- (iii) The Group's voting rights and potential voting rights;
- (iv) The size of the group's holding of voting rights relative to the size and dispersion of the holdings of the other voting rights holders.

The Group re-assesses whether or not it controls an investee, if facts and circumstances, indicate that there are changes to one or more of the three elements of control. Consolidation of a subsidiary begins when the Group obtains control over the subsidiary and ceases when the Group loses control of the subsidiary. Assets, liabilities, income and expenses of a subsidiary acquired or disposed of during the year are included in the CFS from the date the Group gains control until the date the Group ceases to control the subsidiary.

CFS are prepared using uniform accounting policies for like transactions and other events in similar circumstances. If a member of the group uses accounting policies other than those adopted in the CFS for like transactions and events in similar circumstances, appropriate adjustments are made to that group member's financial statements in preparing the CFS to ensure conformity with the group's accounting policies.

The financial statements of all entities used for the purpose of consolidation are drawn up to same reporting date as that of the parent company, i.e., year ended on March 31. When end of the reporting period of the parent is different from that of a subsidiary, the subsidiary prepares, for consolidation purposes, additional financial information as of the same date as the financial statements of the parent to enable the parent to consolidate the financial information of the subsidiary, unless it is impracticable to do so.

- (i) Combine like items of assets, liabilities, equity, income, expenses and cash flows of the parent with those of its subsidiaries. For this purpose, income and expenses of the subsidiary are based on the amounts of the assets and liabilities recognised in the CFS at the acquisition date;
- (ii) Offset (eliminate) the carrying amount of the parent's investment in each subsidiary and the parent's portion of equity of each subsidiary;
- (iii) Eliminate in full intragroup assets and liabilities, equity, income, expenses and cash flows relating to transactions between entities of the group (profits or losses resulting from intragroup transactions that are recognised in assets, such as inventory and fixed assets, are eliminated in full). Intragroup losses may indicate an impairment that requires recognition in the CFS. Ind AS12 'Income Taxes' applies to temporary differences that arise from the elimination of profits and losses resulting from intragroup transactions.

- (iv) Profit or loss and each component of 'Other Comprehensive Income' (OCI) are attributed to the equity holders of the parent of the Group and to the non-controlling interests, even if, this results in the non-controlling interests having a deficit balance. When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with the Group's accounting policies. All intra-group assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Group are eliminated in full on consolidation.
- (v) The Company consolidates the entities which it owns or controls. The CFS of the Company, its controlled subsidiaries are disclosed in Note No. 36. Control exists when the parent has power over the entity, is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Power is demonstrated through existing rights that give the ability to direct relevant activities, those which significantly affect the investee's returns. Subsidiaries are consolidated from the date control commences until the date control ceases.
- (vi) The financial statements of the Group companies are consolidated on a line-by-line basis and intra-group balances and transaction including unrealized gain/ loss from such transaction are eliminated upon consolidation. These financial statements are prepared by applying uniform accounting policies in use at the Group. Non-controlling interests which represent part of the net profit or loss and net asset of subsidiaries that are not, directly or indirectly, owned or controlled by the company, are excluded.
- (vii) Associates are entities over which the Group has significant influence but not control. Investment in associates are accounted for using the equity method of accounting. The investment is initially recognized at cost, and the carrying amount is increased or decreased to recognize the investor's share of profit or loss of the investee after the acquisition date. The Group's investment in associates includes goodwill identified on acquisition.

(c) Use of estimates

The preparation of the CFS in conformity with Ind AS requires management to make estimates, judgments and assumptions. These estimates, judgments and assumptions affect the application of accounting policies and the reported amounts of assets and liabilities, the disclosures of contingent assets and liabilities at the date of the CFS and reported amounts of revenues and expenses during the period. Application of accounting policies that require critical accounting estimates involving complex and subjective judgments and the use of assumptions in these CFS have been disclosed in Note 17. Accounting estimates could change from period to period. Actual results could differ from those estimates. Appropriate changes in estimates are made as management becomes aware of changes in circumstances surrounding the estimates. Changes in estimates are reflected in the CFS in the period in which changes are made and, if material, their effects are disclosed in the notes to the CFS.

d) Critical accounting estimates

(i) Revenue recognition

The Group's contracts with customers include promises to transfer multiple products and services to a customer. Revenues from customer contracts are considered for recognition and measurement when the contract has been approved, in writing, by the parties to the contract, the parties to contract are committed to perform their respective obligations under the contract, and the contract is legally enforceable. The Group assesses the services promised in a contract and identifies distinct performance obligations in the contract. Identification of distinct performance obligations to determine the deliverables and the ability of the customer to benefit independently from such deliverables, and allocation of transaction price to these distinct performance obligations involves significant judgement.

The Group uses the percentage-of-completion method in accounting for other fixed-price contracts. Use of the percentage-of-completion method requires the Group to determine the actual efforts or costs expended to date as a proportion of the estimated expended have been used to measure progress towards completion total efforts or costs to be incurred. Efforts or costs as there is a direct relationship between input and productivity. The estimation of total efforts or costs involves significant judgement and is assessed throughout the period of the contract to reflect any changes based on the latest available information.

(ii) Allowance for credit losses on receivables and unbilled revenue

The Group determines the allowance for credit losses based on historical loss experience adjusted to reflect current and estimated future economic conditions. The Group considered current and anticipated future economic conditions relating to industries the Group deals with. In calculating expected credit loss, the Group has also considered credit reports and other related credit information for its customers to estimate the probability of default in future.

e) Property, plant and equipment

Property, plant and equipment are stated at their cost of acquisition/construction, net of accumulated depreciation and impairment losses, if any. Costs directly attributable to acquisition are capitalized until the property, plant and equipment are ready for use, as intended by management.

Capital work-in-progress represents expenditure incurred in respect of capital projects which are carried at cost. Cost includes land, related acquisition expenses, development and construction costs, borrowing costs and other direct expenditure.

Advances paid towards acquisition of property, plant and equipment outstanding at each Balance Sheet date are disclosed as Capital Advances under 'Other Non-Current Assets' and cost of fixed assets not yet ready for their intended use as at the reporting date are disclosed under 'Capital Work in Progress'. Subsequent expenditures relating to property, plant and equipment is capitalized only when it is probable that future economic benefits associated with these will flow to the Group and the cost of the item can be measured reliably. Repairs and maintenance costs are recognized in the Statement of Profit and Loss when incurred. The cost and related accumulated depreciation are eliminated from the financial statements upon sale or retirement of the asset and the resultant gains or losses are recognized in the Statement of Profit and Loss. Assets to be disposed off are reported at the lower of the carrying value or the fair value less cost to sell.

Depreciation on fixed assets is charged in accordance with estimate of useful life of the assets on written down value method, at rates specified in Schedule II of the Act. Depreciation on assets purchased/sold during a period is proportionately charged.

Depreciation methods, useful lives and residual values are reviewed periodically, including at each financial year end.

f) Investment property

Property that is held for long-term rental yields or for capital appreciation or both, and that is not occupied, is classified as investment property. Investment property is measured initially at its cost, including related transaction costs. Subsequent to initial recognition, investment properties are stated at cost less accumulated depreciation and accumulated impairment loss, if any. Subsequent expenditure is capitalised to the asset's carrying amount only when it is probable that future economic benefits associated with the expenditure will flow to the Company and the cost of the item can be measured reliably.

The Group discloses the fair value of investment properties in notes to the consolidated financial statements. Fair values are determined based on annual evaluation performed by the management.

Investment properties are derecognized either when they have been disposed off or when they have been permanently withdrawn from use and no future economic benefit is expected from their disposal. The difference between net disposal proceeds and the carrying amount of the asset is recognised in the Statement of Profit and Loss in the period of derecognition.

g) Financial instruments**(i) Initial recognition**

The Group recognizes financial assets and financial liabilities when it becomes a party to the contractual provisions of the instrument. All financial assets and liabilities are recognized at fair value on initial recognition, except for trade receivables which are initially measured at transaction price. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities, that are not at fair value through profit or loss, are added to the fair value on initial recognition. Regular way purchase and sale of financial assets are accounted for at trade date.

(ii) Subsequent measurement**Financial assets carried at amortised cost**

A financial asset is subsequently measured at amortised cost if it is held within a business model whose objective is to hold the asset in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Investments in equity instruments of subsidiaries, joint ventures and associates

Investments in subsidiaries, are stated at cost less provision for impairment losses, if any. Investments are tested for impairment whenever an event or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the carrying amount of investments exceeds its recoverable amount. If, in a subsequent period, recoverable amount equals or exceeds the carrying amount, the impairment loss recognised is reversed accordingly.

Investments in equity instruments of subsidiaries, joint ventures and associates are accounted for at cost in accordance with Ind AS-27 'Separate Financial Instruments'.

(iii) Financial liabilities

Financial liabilities are carried at amortized cost using the effective interest method, except for contingent consideration recognized in a business combination which is measured at fair value through profit or loss. For trade and other payables maturing within one year from the Balance Sheet date, the carrying amounts approximate fair value due to the short maturity of these instruments.

(iv) Derecognition of financial instruments

The Group derecognizes a financial asset when the contractual rights to the cash flows from the financial asset expire or it transfers the financial asset and the transfer qualifies for derecognition in accordance with Ind AS 109 "Financial Instruments" issued by the Ministry of Corporate Affairs, Government of India. A financial liability (or a part of a financial liability) is derecognized from the Company's Balance Sheet when the obligation specified in the contract is discharged or cancelled or expires.

h) Impairment**(i) Financial assets**

The Group recognizes loss allowances using the expected credit loss (ECL) model for the financial assets which are not fair valued through profit or loss. Loss allowance for trade receivables with no significant financing component is measured at an amount equal to lifetime ECL. For all other financial assets, expected credit losses are measured at an amount equal to the 12-month ECL, unless there has been a significant increase in credit risk from initial recognition in which case those are measured at lifetime ECL. The amount of expected credit losses (or reversal) that is required to adjust the loss allowance at the reporting date to the amount that is required to be recognised is recognized as an impairment gain or loss in profit or loss.

(ii) Non-financial assets

Property, plant and equipment are evaluated for recoverability whenever events or changes in circumstances indicate that their carrying amounts may not be recoverable. For the purpose of impairment testing, the recoverable amount (i.e. the higher of the fair value less cost to sell and the value-in-use) is determined on an individual asset basis unless the asset does not generate cash flows that are largely independent of those from other assets. In such cases, the recoverable amount is determined for the cash generating unit (CGU) to which the asset belongs.

If such assets are considered to be impaired, the impairment to be recognized in the Statement of Profit and Loss is measured by the amount by which the carrying value of the assets exceeds the estimated recoverable amount of the asset. An impairment loss is reversed in the Statement of Profit and Loss, if there has been a change in the estimates used to determine the recoverable amount. The carrying amount of the asset is increased to its revised recoverable amount, provided that this amount does not exceed the carrying amount that would have been determined (net of any accumulated amortization or depreciation) had no impairment loss been recognized for the asset in prior years.

i) Provisions and contingent liabilities**Provisions**

A provision is recognized if, as a result of a past event, it has a present legal or constructive obligation that is reasonably estimable, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.

Contingent liabilities

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the entity or a present obligation that is not recognised because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognised because it cannot be measured reliably. The Group does not recognise a contingent liability but discloses its existence in the financial statements. Contingent assets are neither recognised nor disclosed in the financial statements.

j) Inventories

Real Estate: Lower of cost or net market value; Cost includes cost of acquisition and other related expenses incurred in bringing the inventories to their present location and condition. Net market value is the estimated selling price in the ordinary course of business.

Constructed/Under Construction Properties: Lower of cost or net realisable value. Cost includes the cost of land, internal development cost, external development charges, construction costs, overheads, borrowing costs and development/ construction material.

Development Rights: At cost of acquisition, including cost of acquiring rights of any interested party. Development rights are considered to have been acquired on execution of a Development Agreement upon vesting of irrevocable rights in the Company to construct, market, and sell the development over land and realize and retain the economic and other benefits.

k) Unbilled receivables

Unbilled receivables represent revenue recognized based on Percentage of Completion of Construction Method [Para (l) below], to the extent the work completed exceeds billed receivables.

l) Revenue recognition**(i) Revenue from contracts from customers**

Pursuant to the application of Ind AS-115, the Company has applied following accounting policy for revenue recognition:

The Company satisfies a performance obligation and recognises revenue over time, if one of the following criteria is met:

- The customer simultaneously receives and consumes the benefits provided by the Company's performance as the entity performs; or
- The Company's performance creates or enhances an asset that the customer controls as the asset is created or enhanced; or
- The Company's performance does not create an asset with an alternative use to the Company and the entity has an enforceable right to payment for performance completed to date.

For performance obligations, where one of the above conditions are not met, revenue is recognised at the point in time at which the performance obligation is satisfied.

Revenue is recognised either at point of time and over a period to time based on various conditions as included in the contracts with customers.

(ii) Others

- (a) Revenues from sale of investment properties and assets to the extent of sale consideration reduced by the respective costs thereof in each case, being value inclusive of cost of acquisition, and construction and development cost thereof.
- (b) Forfeiture due to non fulfilment of obligations by counter parties is accounted as Revenue on unconditional appropriation.
- (c) Revenues from rentals are recognised on accrual basis in accordance with terms of agreements executed with respective tenants.
- (d) Service receipts and interest from customers is accounted for on accrual basis.
- (e) Dividend income is recognised when the shareholder or unit holder's right to receive payment is established, which is generally when shareholder approve the dividend.
- (f) Share of profit/loss from firm in which the Company is a partner is accounted for in the financial year ending on the date of the Balance Sheet.
- (g) Interest income is recognized using effective interest method.
- (h) Interest on arrears of allotment money is accounted in the year of receipt.

- (iii) Revenue from fixed-price, fixed-time frame contracts, where the performance obligations are satisfied over time and where there is no uncertainty as to measurement or collectability of consideration, is recognized as per the percentage-of-completion method. When there is uncertainty as to measurement or ultimate collectability, revenue recognition is postponed until such uncertainty is resolved. Efforts or costs expended have been used to measure progress towards completion as there is a direct relationship between input and productivity. Maintenance revenue is recognized rateably over the term of the underlying maintenance arrangement.

m) Claims

Claims lodged by and lodged against are accounted in the year of payment or settlement thereof.

n) Borrowing costs

Borrowing costs directly attributable to the acquisition and/or construction/production of qualifying assets which are assets that necessarily take a substantial period of time to get ready for their intended use, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use. All other borrowing costs are charged to Statement of Profit and Loss as incurred. Borrowing consist of interest and other costs that is incurred in connection with the borrowings of funds.

o) Employee benefits

- (i) Benefits such as salaries, wages and short term compensations etc. and the expected cost of ex-gratia is recognized in the period in which the employee renders the related service.
- (ii) The Gratuity and Leave encashment schemes are defined benefit plans. Gratuity is provided by covering eligible employees on the basis of actuarial valuation as carried out by an independent actuary using the Projected Unit Credit method, which recognizes each period of service as giving rise to additional unit of employee benefit entitlement and measures each unit separately to build up the final obligation. The obligation is measured at the present value of the estimated future cash flows. The discount rates used for determining the present value of obligation under defined benefit plans is based on the market yields on Government securities as at the Balance Sheet date.
- (iii) The liability is un-funded. Actuarial gains and losses arising through re-measurement of net defined benefit liability/(assets) are recognised in 'Other Comprehensive Income'.
- The employees of the Company are entitled to compensated absences as per the policy of the Company. The Company recognises the charge to the Statement of Profit and Loss and corresponding liability on account of such non-vesting accumulated leave entitlement based on a valuation by an independent actuary. The cost of providing compensated absences are determined using the projected unit credit method. Remeasurements as a result of experience adjustments and changes in actuarial assumptions are recognised in Statement of Profit and Loss.
- (iv) Contributions payable to the concerned government authorities in respect of provident fund, family pension fund and employees state insurance are defined contribution plans. The contributions are recognized as an expense in the Statement of Profit and Loss during the period in which the employee renders the related service. There is no further obligation in this respect, beyond such contribution. Other employee benefits are accounted for on accrual basis.

p) Foreign currency translation

On initial recognition, all foreign currency transactions are translated in to the functional currency using the exchange rates prevailing on the date of the transaction. As at the reporting date, foreign currency monetary assets and liabilities are translated at the exchange rate prevailing on the Balance Sheet date and the exchange gains or losses are recognised in the Consolidated Statement of Profit and Loss.

q) Cash and cash equivalents

Cash and cash equivalents comprise cash at bank, cash in hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value. Short-term deposits are made for varying periods of between one day and three months, depending on the immediate cash requirements, and earn interest at the respective short-term deposit rates.

r) Cash flow statement

Cash flows are reported using the indirect method, whereby profit for the period is adjusted for the effects of transactions of a non-cash nature, any deficits or accruals of past or future operating cash receipts or payments and item of income or expenses associated with investing or financing cash flows. The cash flows from operating, investing and financing activities are segregated. All highly liquid investments are considered that are readily convertible to known amounts of cash to be cash equivalents.

s) Dividends

Dividend on equity shares are recorded as a liability on the date of approval by the shareholders and interim dividends are recorded as a liability on the date of declaration by the Company's Board of Directors.

t) Income taxes

Income tax expense comprises current and deferred tax. It is recognised in Statement of Profit and Loss except to the extent that it relates to items recognised directly in equity or in other comprehensive income.

Income tax expense comprises current and deferred income tax. Income tax expense is recognized in the Statement of Profit and Loss except to the extent that it relates to items recognized directly in equity, in which case it is recognized in 'Other Comprehensive Income'. Current income tax for current and prior periods is recognized at the amount expected to be paid to or recovered from the tax authorities, using the tax rates and tax laws that have been enacted or substantively enacted by the balance sheet date. Deferred income tax assets and liabilities are recognized for all temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

Deferred tax is recorded on temporary differences between the tax bases of assets and liabilities and their carrying amounts, at the rates that have been enacted or substantively enacted at the reporting date. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable profits during the periods in which those temporary differences and tax loss carry-forwards become deductible. The Company considers expected reversal of deferred tax liabilities and projected future taxable income in making this assessment. The amount of deferred tax assets considered realisable, however, could reduce in the near term if estimates of future taxable income during the carry-forward period are reduced.

u) Earnings per share

Basic earnings per equity share is computed by dividing the net profit attributable to the equity holders of the Group by the weighted average number of equity shares outstanding during the period. Diluted earnings per equity share is computed by dividing the net profit attributable to the equity holders of the Group by the weighted average number of equity shares considered for deriving basic earnings per equity share and also the weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares. The dilutive potential equity shares are adjusted for the proceeds receivable had the equity shares been actually issued at fair value (i.e. the average market value of the outstanding equity shares). Dilutive potential equity shares are deemed converted as of the beginning of the period, unless issued at a later date. Dilutive potential equity shares are determined independently for each period presented.

The number of equity shares and potentially dilutive equity shares are adjusted retrospectively for all periods presented for any share splits and bonus shares issues including for changes effected prior to the approval of the financial statements by the Board of Directors.

v) Leases

The Group evaluates if an arrangement qualifies to be a lease as per the requirements of Ind AS 116. Identification of a lease requires significant judgment. The Group uses significant judgement in assessing the lease term (including anticipated renewals) and the applicable discount rate. The Group determines the lease term as the non-cancellable period of a lease, together with both periods covered by an option to extend the lease if the Company is reasonably certain to exercise that option; and periods covered by an option to terminate the lease if the Company is reasonably certain not to exercise that option. In assessing whether the Company is reasonably certain to exercise an option to extend a lease, or not to exercise an option to terminate a lease, it considers all relevant facts and circumstances that create an economic incentive for the Company to exercise the option to extend the lease, or not to exercise the option to terminate the lease. The Group revises the lease term if there is a change in the non-cancellable period of a lease. The discount rate is generally based on the incremental borrowing rate specific to the lease being evaluated or for a portfolio of leases with similar characteristics.

w) Segment reporting

Operating segments are reported in the manner consistent with the internal reporting provided to the chief operating decision maker (CODM). The Managing Director of the Company has been identified as CODM and he is responsible for allocating the resources, assess the financial performance and position of the Company and makes strategic decisions.

The Company has identified one reportable segment "Real Estate" based on the information reviewed by the CODM. Refer Note no. 46 for the Segment information presented.

x) Current versus non-current classification

The assets and liabilities are presented in the balance sheet based on current/ non-current classification. An asset is treated as current when it is:

- Expected to be realised or intended to be sold or consumed in normal operating cycle;
- Held primarily for the purpose of trading;
- Expected to be realised within twelve months after the reporting period; or
- Cash or cash equivalents unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

A liability is current when:

- It is expected to be settled in normal operating cycle;
- It is held primarily for the purpose of trading;
- It is due to be settled within twelve months after the reporting period; or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

All other liabilities are classified as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

y) Goods and service tax paid on acquiring of assets or on incurring expenses

Expenses and assets are recognised net of the goods and service tax paid, except when the tax incurred on a purchases of assets or services is not recoverable from the tax authority, in which case, tax paid is recognised as part of the cost of acquisition of the asset or as part of the expense item as applicable. The net amount of tax recoverable from, or payable to, the tax authority is included as part of receivables or payables, respectively, in the balance sheet.

z) Recent Pronouncements

On March 31, 2023, the Ministry of Corporate Affairs ("MCA") notified new standards or amendments to the existing standards under Companies (Indian Accounting Standards) Rules as issued from time to time as below:

Ind AS 1- Presentation of financial statements:

This amendment requires the entities to disclose their material accounting policies rather than their significant accounting policies. The effective date for adoption of this amendment is annual periods beginning on or after April 1, 2023. The Company has evaluated the amendment and the impact of the amendment is insignificant in the standalone financial statements.

Ind AS 8- Accounting policies, Changes in Accounting Estimates and Errors

This amendment has introduced a definition of 'accounting estimates' and included amendments to Ind AS 8 to help entities distinguish changes in accounting policies from changes in accounting estimates. The effective date for adoption of this amendment is annual periods beginning on or after April 1, 2023. The Company has evaluated the amendment and there is no impact on its standalone financial statements.

Ind AS 12 - Income Taxes

This amendment has narrowed the scope of the initial recognition exemption so that it does not apply to transactions that give rise to equal and offsetting temporary differences. The effective date for adoption of this amendment is annual periods beginning on or after April 1, 2023. The Company has evaluated the amendment and there is no impact on its standalone financial statements.

The amendments are extensive and the Group will evaluate the same to give effect to them as required by law.

(b) Right, preference and restrictions attached to shares

The Company has only one class of equity shares having a par value of Rs. 2 each. Each shareholder is eligible for one vote per share held and carry a right of dividend. The dividend proposed by the Board of Directors is subject to the approval of the shareholders in the ensuing Annual General Meeting, except in case of interim dividend.

In the event of liquidation, the equity shareholders are eligible to receive the remaining assets of the Company after distribution of all preferential amounts, in proportion to their shareholding.

(c) Dividend

The final dividend on shares is recorded as a liability on the date of approval by the shareholders and interim dividend is recorded as a liability on the date of declaration by the Company's Board of Directors. Income tax consequences of dividends on financial instruments classified as equity will be recognized according to where the entity originally recognized those past transactions or events that generated distributable profits.

The Company declares and pays dividends in Indian rupees. The Finance Act, 2020, has repealed the Dividend Distribution Tax (DDT). Companies are now required to pay/distribute dividend after deducting applicable taxes. The remittance of dividends outside India is also subject to withholding tax at applicable rates.

The Board of Directors in their meeting held on April 25, 2023, recommended a final dividend @ 25% i.e. Re. 0.50 per equity share (face value of Rs. 2 per equity share) for the financial year ended March 31, 2023. This payment is subject to the approval of shareholders in the ensuing Annual General Meeting of the Company and if approved, would result in a net cash outflow of approximately Rs. 16.20 crores.

48 Fair value measurements

The Company uses the following hierarchy for determining and/or disclosing the fair value of financial instruments by valuation techniques:

The following is the basis of categorising the financial instruments measured at fair value into Level 1 to Level 3:

- Level 1: This level includes financial assets that are measured by reference to quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2: This level includes financial assets and liabilities, measured using inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices).
- Level 3: This level includes financial assets and liabilities measured using inputs that are not based on observable market data (unobservable inputs).

Fair values are determined in whole or in part, using a valuation model based on assumptions that are neither supported by prices from observable current market transactions in the same instrument nor are they based on available market data.

Trade receivables, cash and cash equivalents, other bank balances, loans, other current financial assets, trade payables and other current financial liabilities: Approximate their carrying amounts largely due to short-term maturities of these instruments.

Management uses its best judgment in estimating the fair value of its financial instruments. However, there are inherent limitations in any estimation technique. Therefore, for substantially all financial instruments, the fair value estimates presented above are not necessarily indicative of all the amounts that the Company could have realized or paid in sale transactions as of respective dates. As such, the fair value of the financial instruments subsequent to the respective reporting dates may be different from the amounts reported at each year end.

49 Financial risk management objectives

The Company's principal financial liabilities comprise loans and borrowings, trade and other payables. The main purpose of these financial liabilities is to finance and support Company's operations. The Company's principal financial assets include inventory, trade and other receivables, cash and cash equivalents and land advances that derive directly from its operations.

The Company is exposed to market risk, credit risk and liquidity risk. The Company's senior management oversees the management of these risks. The Company's senior management provides assurance that the Company's financial risk activities are governed by appropriate policies and procedures and that financial risks are identified, measured and managed in accordance with the Company's policies and risk objectives. The Board of Directors reviews and agrees policies for managing each of these risks, which are summarised below:

(a) Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises two types of risk: interest rate risk and other price risk, such as equity price risk and commodity/ real-estate risk. Financial instruments affected by market risk include loans and borrowings.

(b) Credit risk

Credit risk is the risk that counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The Company is exposed to credit risk from its operating activities (primarily trade receivables) and from its financing activities, including refundable joint development deposits, security deposits, loans to employees and other financial instruments. To manage this, the Company periodically assesses financial reliability of customers and other counter parties, taking into account the financial condition, current economic trends, and analysis of historical bad debts and ageing of financial assets.

Trade receivables

- (i) Receivables resulting from sale of properties: Customer credit risk is managed by requiring customers to pay advances before transfer of ownership, therefore, substantially eliminating the Company's credit risk in this respect.
- (ii) Receivables resulting from other than sale of properties: Credit risk is managed by each business unit subject to the Company's established policy, procedures and control relating to customer credit risk management. Outstanding customer receivables are regularly monitored. The impairment analysis is performed at each reporting date on an individual basis for major clients. In addition, a large number of minor receivables are grouped into homogeneous groups and assessed for impairment collectively.

(c) Financial instrument and cash deposits

Prudent liquidity risk management implies maintaining sufficient cash and marketable securities and the availability of funding through an adequate amount of committed credit facilities to meet obligations when due and to close out market positions. Due to the dynamic nature of the underlying businesses, the Company's treasury maintains flexibility in funding by maintaining availability under committed credit lines. The management monitors rolling forecasts of the Company's liquidity position and cash and cash equivalents on the basis of expected cash flows.

- 50 The Code on Social Security, 2020, (Code) relating to employees benefits during employment and post-employment benefits received President assent in September, 2020. The Code has been published in the Gazette of India. However, the date on which the Code will come into effect has not been notified and the final rules/interpretation have not yet been issued. The Company will assess the impact of the Code when it comes into effect and will record any related impact in the period the Code becomes effective.

INDEPENDENT AUDITOR'S REPORT

To the Members of Anant Raj Limited

Report on the Audit of Consolidated Financial Statements

Opinion

We have audited the accompanying consolidated financial statements of Anant Raj Limited (hereinafter referred to as the 'Holding Company') and its subsidiaries (Holding Company and its subsidiaries together referred to as "the Group"), its associates and jointly controlled entities, which comprise the Consolidated Balance Sheet as at March 31, 2022, and the Consolidated Statement of Profit and Loss (including Other Comprehensive Income), the Consolidated Statement of Changes in Equity and the Consolidated Statement of Cash Flows for the year then ended, and notes to the consolidated financial statements, including a summary of significant accounting policies and other explanatory information prepared based on the relevant records (hereinafter referred to as "the consolidated financial statements").

In our opinion and to the best of our information and according to the explanations given to us, and based on the consideration of reports of other auditors on separate financial statements of such subsidiaries, associates and jointly controlled entities as were audited by the other auditors referred to in the Other Matters section below, the aforesaid consolidated financial statements, give the information required by the Companies Act, 2013, as amended ("the Act") in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards prescribed under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended (Ind AS) and other accounting principles generally accepted in India, of the consolidated state of affairs of the Group, its associates and its jointly controlled entities as at March 31, 2022, and their consolidated profit, their consolidated other comprehensive income, their consolidated changes in equity and their consolidated cash flows for the year ended on that date.

Basis for Opinion

We conducted our audit of consolidated financial statements in accordance with the Standards on Auditing (SAs) specified under section 143 (10) of the Act. Our responsibilities under those Standards are further described in the 'Auditor's Responsibilities for the Audit of the Consolidated Financial Statements' section of our report. We are independent of the Group, its associates and its jointly controlled entities in accordance with the ethical requirements that are relevant to our audit of the consolidated financial statements in terms of *Code of Ethics* issued by the Institute of Chartered Accountants of India (ICAI) and the relevant provisions of the Act and Rules made thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence obtained by us and the audit evidence obtained by the other auditors in terms of their reports referred to in the Other Matters section below, is sufficient and appropriate to provide a basis for our audit opinion on the consolidated financial statements.

Emphasis of matter

We draw attention to Note 43 to the consolidated financial statements for the financial year ended March 31, 2022, with regard to management's evaluation of uncertainty due to outbreak of Covid-19 and its impact on future operations of the Company. Our opinion is not modified in respect this matter.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements for the financial year ended March 31, 2022. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Information Other than the consolidated Financial Statements and Auditor's Report Thereon

The Holding Company's Board of Directors is responsible for the preparation of the other information. The other information comprises the information included in the Management Discussion and Analysis, Board's Report including Annexures to Board's Report, Business Responsibility Report, Corporate Governance and Shareholder's Information (Annual Report), but does not include the consolidated financial statements, standalone financial statements and our auditor's report thereon.

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained during the course of our audit or otherwise appears to be materially misstated.

If, based on the work we have performed and based on the work done/ audit report of other auditors, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Management's Responsibilities for the Consolidated Financial Statements

The Holding Company's Board of Directors is responsible for the matters stated in section 134(5) of the Act with respect to the preparation and presentation of these consolidated financial statements that give a true and fair view of the consolidated financial position, consolidated financial performance including other comprehensive income, consolidated changes in equity and consolidated cash flows of the Group in accordance with the accounting principles generally accepted in India, including the Accounting Standards specified under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended.

The respective Board of Directors of the companies/entities included in the Group and of its associates and jointly controlled entities are responsible for maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of each company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and the design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring accuracy and completeness of the accounting records, relevant to the preparation and presentation of the consolidated financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error, which have been used for the purpose of preparation of the consolidated financial statements by the Directors of the Holding Company, as aforesaid.

In preparing the consolidated financial statements, the respective Board of Directors of the companies included in the Group and of its associates and jointly controlled entities are responsible for assessing the ability of the respective entities to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the respective Board of Directors either intend to liquidate their respective entities or to cease operations, or has no realistic alternative but to do so.

The respective Board of Directors of the companies included in the Group and of its associates and jointly controlled entities is responsible for overseeing the financial reporting process of each company.

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal financial controls relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Holding company has adequate internal financial controls system in place with reference to financial statements and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting in preparation of consolidated financial statements and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the ability of the Group and of its associates and its jointly controlled entity to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group and of its associates and jointly controlled entities to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated Financial Statements, including the disclosures, and whether the consolidated Financial Statements represent the underlying transactions and events in a manner that achieves fair presentation.

Obtain sufficient appropriate audit evidence regarding the financial information of its associates and jointly controlled entities to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the audit of financial statements of such entities or business activities included in the financial consolidated financial statements of

which we are the independent auditors. For the other entities or business activities included in the consolidated financial statements, which have been audited by other auditors, such other auditors remain responsible for the direction, supervision and performance of the audits carried out by them. We remain solely responsible for our audit opinion. Our responsibilities in this regard are further described in para (b) of the section titled 'Other Matters' in this audit report.

Materiality is the magnitude of misstatements in the consolidated financial statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the consolidated financial statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the consolidated financial statements.

We communicate with those charged with governance of the Holding Company and such other entities included in the consolidated financial statements of which we are the independent auditors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication

ANNEXURE "B" TO THE INDEPENDENT AUDITOR'S REPORT

(Referred to in paragraph 1(f) under 'Report on Other Legal and Regulatory Requirements' section of our report of even date)

Report on the Internal Financial Controls under Clause (i) of sub-section 3 of the section 143 of the Companies Act, 2013 ("the Act")

Opinion

In conjunction with our audit of the consolidated financial statements of Anant Raj Ltd. (hereinafter referred to as "the Holding Company") as of and for the year ended March 31, 2022, we have audited the internal financial controls with reference to consolidated financial statements of the Holding Company and such companies incorporated in India under the Act which are its subsidiary companies, its associate companies and its jointly controlled entity, as of that date.

In our opinion, the Holding Company and such companies incorporated in India which are its subsidiary companies, its associate companies and jointly controlled entity, have, in all material respects, adequate internal financial controls with reference to consolidated financial statements and such internal financial controls were operating effectively as at March 31, 2022, based on the internal financial controls with reference to consolidated financial statements criteria established by such companies considering the essential components of such internal controls stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India (the "Guidance Note").

Management's Responsibility for Internal Financial Controls

The respective Board of Directors of the Company, its subsidiary companies, its associate companies and its jointly controlled entity are responsible for establishing and maintaining internal financial controls with reference to consolidated financial statements based on the criteria established by the respective company considering the essential components of internal control stated in the Guidance Note. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to the respective company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

Auditor's Responsibility

Our responsibility is to express an opinion on the internal financial controls with reference to consolidated financial statements based on our audit. We conducted our audit in accordance with the Guidance Note and the Standards on Auditing, prescribed under section 143(10) of the Act, to the extent applicable to an audit of internal financial controls with reference to consolidated financial statements. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls with reference to consolidated financial statements were established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls with reference to consolidated financial statements and their operating effectiveness. Our audit of internal financial controls with reference to consolidated financial

statements included obtaining an understanding of internal financial controls with reference to consolidated financial statements, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of the internal controls based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained and the audit evidence obtained by the other auditors of the relevant subsidiary companies, associate companies and jointly controlled entity in terms of their reports referred to in the Other Matters paragraph below, is sufficient and appropriate to provide a basis for our audit opinion on the internal financial controls with reference to consolidated financial statements.

Meaning of Internal Financial Controls over Financial Reporting

A Company's internal financial controls with reference to consolidated financial statements are a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial controls with reference to consolidated financial statements includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of consolidated financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the consolidated financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls with reference to consolidated financial statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls with reference to consolidated financial statements to future periods are subject to the risk that the internal financial controls with reference to consolidated financial statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Other Matters

Our aforesaid report under Section 143(3) (i) of the Act on the adequacy and operating effectiveness of the internal financial controls over financial reporting insofar as it relates to 37 (Thirty Seven) subsidiary companies, 1 (One) Jointly Controlled Entity and 4 (Four) associate companies, which are companies incorporated in India, is based solely on the corresponding reports of the auditors of such companies incorporated in India.

Opinion

In our opinion, to the best of our information and according to the explanations given to us, the Company and its subsidiary companies, associate companies and jointly controlled entity, which are companies incorporated in India, have, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2022, based on the internal control over financial reporting criteria established by the respective Companies considering the essential components of internal control stated in the Guidance Note issued by the ICAI.

- Level 2: This level includes financial assets and liabilities, measured using inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices).
- Level 3: This level includes financial assets and liabilities measured using inputs that are not based on observable market data (unobservable inputs).

Fair values are determined in whole or in part, using a valuation model based on assumptions that are neither supported by prices from observable current market transactions in the same instrument nor are they based on available market data.

Trade receivables, cash and cash equivalents, other bank balances, loans, other current financial assets, trade payables and other current financial liabilities: Approximate their carrying amounts largely due to short-term maturities of these instruments.

Management uses its best judgment in estimating the fair value of its financial instruments. However, there are inherent limitations in any estimation technique. Therefore, for substantially all financial instruments, the fair value estimates presented above are not necessarily indicative of all the amounts that the Company could have realized or paid in sale transactions as of respective dates. As such, the fair value of the financial instruments subsequent to the respective reporting dates may be different from the amounts reported at each year end.

48 Financial risk management objectives

The Company's principal financial liabilities comprise loans and borrowings, trade and other payables. The main purpose of these financial liabilities is to finance and support Company's operations. The Company's principal financial assets include inventory, trade and other receivables, cash and cash equivalents and land advances that derive directly from its operations.

The Company is exposed to market risk, credit risk and liquidity risk. The Company's senior management oversees the management of these risks. The Company's senior management provides assurance that the Company's financial risk activities are governed by appropriate policies and procedures and that financial risks are identified, measured and managed in accordance with the Company's policies and risk objectives. The Board of Directors reviews and agrees policies for managing each of these risks, which are summarised below:

(a) Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises two types of risk: interest rate risk and other price risk, such as equity price risk and commodity/ real-estate risk. Financial instruments affected by market risk include loans and borrowings.

(b) Credit risk

Credit risk is the risk that counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The Company is exposed to credit risk from its operating activities (primarily trade receivables) and from its financing activities, including refundable joint development deposits, security deposits, loans to employees and other financial instruments. To manage this, the Company periodically assesses financial reliability of customers and other counter parties, taking into account the financial condition, current economic trends, and analysis of historical bad debts and ageing of financial assets.

Trade receivables

- (i) Receivables resulting from sale of properties: Customer credit risk is managed by requiring customers to pay advances before transfer of ownership, therefore, substantially eliminating the Company's credit risk in this respect.
- (ii) Receivables resulting from other than sale of properties: Credit risk is managed by each business unit subject to the Company's established policy, procedures and control relating to customer credit risk management. Outstanding customer receivables are regularly monitored. The impairment analysis is performed at each reporting date on an individual basis for major clients. In addition, a large number of minor receivables are grouped into homogeneous groups and assessed for impairment collectively.

(c) Financial instrument and cash deposits

Prudent liquidity risk management implies maintaining sufficient cash and marketable securities and the availability of funding through an adequate amount of committed credit facilities to meet obligations when due and to close out market positions. Due to the dynamic nature of the underlying businesses, the Company's treasury maintains flexibility in funding by maintaining availability under committed credit lines. The management monitors rolling forecasts of the Company's liquidity position and cash and cash equivalents on the basis of expected cash flows.

- 49 The Code on Social Security, 2020, (Code) relating to employees benefits during employment and post-employment benefits received President assent in September, 2020. The Code has been published in the Gazette of India. However, the data on which the Code will come into effect has not been notified and the final rules/interpretation have not yet been issued. The Company will assess the impact of the Code when it comes into effect and will record any related impact in the period the Code becomes effective.

We have audited the accompanying consolidated financial statements of Anant Raj Limited (hereinafter referred to as the 'Holding Company') and its subsidiaries (Holding Company and its subsidiaries together referred to as "the Group"), its associates and jointly controlled entities, which comprise the Consolidated Balance Sheet as at March 31, 2021, and the Consolidated Statement of Profit and Loss (including Other Comprehensive Income), the Consolidated Statement of Changes in Equity and the Consolidated Statement of Cash Flows for the year then ended, and notes to the consolidated financial statements, including a summary of significant accounting policies and other explanatory information prepared based on the relevant records (hereinafter referred to as "the consolidated financial statements").

In our opinion and to the best of our information and according to the explanations given to us, and based on the consideration of reports of other auditors on separate financial statements of such subsidiaries, associates and jointly controlled entities as were audited by the other auditors, the aforesaid consolidated financial statements, give the information required by the Companies Act, 2013 ("Act") in the manner so required and give a true and fair view in conformity with the Indian Accounting principles generally accepted in India, of the consolidated state of affairs of the Group, its associates and its jointly controlled entities as at March 31, 2021, and their consolidated profit, their consolidated other comprehensive income, their consolidated changes in equity and their consolidated cash flows for the year ended on that date

Basis for Opinion

We conducted our audit of consolidated financial statements in accordance with the Standards on Auditing (SAs) specified under section 143 (10) of the Act. Our responsibilities under those Standards are further described in the *Auditor's Responsibilities for the Audit of the Consolidated Financial Statements* section of our report. We are independent of the group, its associates and its jointly controlled entities in accordance with the ethical requirements that are relevant to our audit of the consolidated financial statements in terms of *Code of Ethics* issued by the Institute of Chartered Accountants of India (ICAI) and the relevant provisions of the Act and Rules made thereunder, and we have fulfilled our other

ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained along with the consideration of audit reports of the other auditors referred to in the "Other Matters" paragraph below, is sufficient and appropriate to provide a basis for our audit opinion on the consolidated financial statements.

Emphasis of matter

We draw attention to Note 33 of the consolidated financial statements which states that the Hon'ble Chandigarh Bench of the National Company Law Tribunal at Chandigarh vide its Order dated and pronounced on 24th August, 2020 ("Order") had sanctioned the Composite Scheme for Arrangement involving the amalgamation of Anant Raj Agencies Private Limited ("ARAPL") with and into Anant Raj Limited ("ARL" or "Company") and immediately thereupon, the demerger of the Project Division of ARL and vesting thereof into Anant Raj Global Limited ("ARGL"). In terms of Clause 8. The equity shares of Anant Raj Global Limited listed on BSE Limited and National Stock Exchange of India Limited w.e.f. December 18, 2020.

The appointed date for the Composite Scheme for Arrangement as sanctioned by Hon'ble NCLT, Chandigarh, is September 30, 2018. As the Scheme is effective with effect from the Appointed Date, the Company has given effect to the applicable accounting entries in its books of account in accordance with the accounting treatment prescribed in Clause 10 of Chapter 2 of the Scheme and Clause 9 of Chapter 3 of the Scheme, which is in compliance and accordance with the Indian Accounting Standards applicable to the Company as of the Appointed Date of the Scheme.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Information Other than the consolidated Financial Statements and Auditor's Report Thereon

The Holding Company's Board of Directors is responsible for the preparation of the other information. The other information comprises the information included in the Management Discussion and Analysis, Board's Report including Annexures to Board's Report, Business Responsibility Report, Corporate Governance and Shareholder's Information, but does not include the consolidated financial statements and our auditor's report thereon.

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained during the course of our audit or otherwise appears to be materially misstated.

If, based on the work we have performed and based on the work done/ audit report of other auditors, we conclude that there is a material misstatement of this other information, we are required to report that fact.,
we have nothing to report in this regard.

Management's Responsibilities for the Consolidated Financial Statements

The Holding Company's Board of Directors is responsible for the preparation and presentation of these consolidated financial statements that give a true and fair view of the consolidated financial position, consolidated financial performance, consolidated changes in equity and consolidated cash flows of the Group in accordance with the accounting principles generally accepted in India, including the Accounting Standards specified under section 133 of the Act.

The respective Board of Directors of the companies/entities included in the Group and of its associates and jointly controlled entities are responsible for maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of each company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and the design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring accuracy and completeness of the accounting records, relevant to the preparation and presentation of the consolidated financial statements that give a true and fair view and are free from material

misstatement, whether due to fraud or error, which have been used for the purpose of preparation of the consolidated financial statements by the Directors of the Holding Company, as aforesaid.

In preparing the consolidated financial statements, the respective Board of Directors of the companies included in the Group and of its associates and jointly controlled entities are responsible for assessing the ability of the respective entities to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the respective Board of Directors either intend to liquidate their respective entities or to cease operations, or has no realistic alternative but to do so.

The respective Board of Directors of the companies included in the Group and of its associates and jointly controlled entities is responsible for overseeing the financial reporting process of each company.

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

Obtain an understanding of internal financial controls relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section

143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Holding company has adequate internal financial controls with reference to financial statements in place and the operating effectiveness of such controls.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management and Board of Directors.
- Conclude on the appropriateness of management and Board of Directors use of the going concern basis of accounting in preparation of consolidated financial statements and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the on the appropriateness of this assumption. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group and of its associates and jointly controlled entities to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated Financial Statements, including the disclosures, and whether the consolidated Financial Statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of such entities or business activities within the group and its associates and jointly controlled entities to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the audit of financial information of such entities included in the financial consolidated financial statements of which we are the independent auditors. For the other entities included in the consolidated financial statements, which have been audited by other auditors, such other auditors remain responsible for the direction, supervision and performance of the audits carried out by them. We remain solely responsible for our audit opinion. Our responsibilities in this regard are further described in para (b) of the section titled 'Other Matters' in this audit report.

- We believe that the audit evidence obtained by us along with the consideration of audit reports of the other auditors referred to in subparagraph (b) of the Other Matters paragraph below, is sufficient and appropriate to provide a basis for our audit opinion on the consolidated financial statements.

We communicate with those charged with governance of the Holding Company and such other entities included in the consolidated financial statements of which we are the independent auditors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

**ANNEXURE “A” TO THE INDEPENDENT AUDITOR’S REPORT
(Referred to in paragraph 1(f) under ‘Report on Other Legal and Regulatory Requirements’ section of our report of even date)**

Report on the Internal Financial Controls under Clause (i) of sub-section 3 of the section 143 of the Companies Act, 2013 (“the Act”)

Opinion

In conjunction with our audit of the consolidated financial statements of Anant Raj Ltd. (hereinafter referred to as “the Holding Company”) as of and for the year ended March 31, 2021, we have audited the internal financial controls with reference to consolidated financial statements of the Holding Company and such companies incorporated in India under the Act which are its subsidiary companies, its associate companies and its jointly controlled companies, as of that date.

In our opinion, the Holding Company and such companies incorporated in India which are its subsidiary companies, its associate companies and jointly controlled companies, have, in all material respects, adequate internal financial controls with reference to consolidated financial statements and such internal financial controls were operating effectively as at March 31, 2021, based on the internal financial controls with reference to consolidated financial statements criteria established by such companies considering the essential components of such internal controls stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India (the “Guidance Note”).

Management’s Responsibility for Internal Financial Controls

The respective Board of Directors of the Company, its subsidiary companies, its associate companies and its jointly controlled Companies are responsible for establishing and maintaining internal financial controls with reference to consolidated financial statements based on the criteria established by the respective company considering the essential components of internal control stated in the Guidance Note. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to the respective company’s policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

Auditor's Responsibility

Our responsibility is to express an opinion on the internal financial controls with reference to consolidated financial statements based on our audit. We conducted our audit in accordance with the Guidance Note and the Standards on Auditing, prescribed under section 143(10) of the Act, to the extent applicable to an audit of internal financial controls with reference to consolidated financial statements. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls with reference to consolidated financial statements were established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls with reference to consolidated financial statements and their operating effectiveness. Our audit of internal financial controls with reference to consolidated financial statements included obtaining an understanding of internal financial controls with reference to consolidated financial statements, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of the internal controls based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained and the audit evidence obtained by the other auditors of the relevant subsidiary companies, associate companies and jointly controlled companies in terms of their reports referred to in the Other Matters paragraph below, is sufficient and appropriate to provide a basis for our audit opinion on the internal financial controls with reference to consolidated financial statements.

Meaning of Internal Financial Controls over Financial Reporting

A Company's internal financial controls with reference to consolidated financial statements are a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial controls with reference to consolidated financial statements includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the

transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of consolidated financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the consolidated financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls with reference to consolidated financial statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls with reference to consolidated financial statements to future periods are subject to the risk that the internal financial controls with reference to consolidated financial statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Other Matters

Our aforesaid report under Section 143(3)(i) of the Act on the adequacy and operating effectiveness of the internal financial controls over financial reporting insofar as it relates to 37 (Thirty Seven) subsidiary companies, 1 (One) Jointly Controlled Entity and 3 (Three) associate companies, which are companies incorporated in India, is based solely on the corresponding reports of the auditors of such companies incorporated in India.

1 Company overview

The Company is a public Company domiciled in India and is incorporated under the provisions of the Companies Act, 1956. The Company has its primary listings on the BSE Limited and National Stock Exchange of India Limited.

The Company is primarily engaged in development and construction of information and technology parks, hospitality projects, residential townships, data Centres, affordable housing, office complexes and shopping malls in the State of Delhi, Haryana, Andhra Pradesh, Rajasthan and the National Capital Region.

The consolidated financial statements are approved for issue by the Company's Board of Directors on June 30, 2021.

2 Significant Accounting policies**(a) Basis of preparation of financial statements**

The financial statements of the subsidiaries, associates and jointly controlled entities used in the consolidation are upto the same reporting date as that of the Company i.e. March 31, 2021.

These consolidated financial statements (CFS) of the Company are prepared in accordance with the Indian Accounting Standards (Ind AS), under historical cost convention on the accrual basis except for certain financial instruments which are measured at fair values, the provisions of the Companies Act, 2013 (Act), (to the extent notified) and guidelines issued by the Securities and Exchange Board of India (SEBI). The consolidated financial statements have been prepared on a going concern basis in accordance with accounting principles generally accepted in India. The Ind AS are prescribed under section 133 of the Act read with Rule 3 of the Companies (Indian Accounting Standards) Rules, 2015, and relevant amendment rules issued thereunder.

Accounting policies have been consistently applied except where a newly issued Accounting Standard is initially adopted or a revision to an existing Accounting Standard requires a change in the Accounting policies hitherto in use.

The consolidated financial statements are presented in Indian Rupees, which is also functional currency. All amounts have been rounded off to the nearest Rs. lakhs, unless otherwise indicated.

(b) Basis of consolidation

The CFS comprise the financial statements of the Company and its subsidiaries as at March 31, 2021. Control is achieved when the Group is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Specifically, the Group controls an investee if and only if the Group has:

- (i) Power over the investee (i.e. existing rights that give it the current ability to direct the relevant activities of the investee);
- (ii) Exposure, or rights, to variable returns from its involvement with the investee; and
- (iii) The ability to use its power over the investee to affect its returns

Generally, there is a presumption that a majority of voting rights result in control. To support this presumption and when the Group has less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- (i) The contractual arrangement with the other vote holders of the investee;
- (ii) Rights arising from other contractual arrangements;
- (iii) The Group's voting rights and potential voting rights;
- (iv) The size of the group's holding of voting rights relative to the size and dispersion of the holdings of the other voting rights holders.

The Group re-assesses whether or not it controls an investee, if facts and circumstances, indicate that there are changes to one or more of the three elements of control. Consolidation of a subsidiary begins when the Group obtains control over the subsidiary and ceases when the Group loses control of the subsidiary. Assets, liabilities, income and expenses of a subsidiary acquired or disposed of during the year are included in the CFS from the date the Group gains control until the date the Group ceases to control the subsidiary.

CFS are prepared using uniform accounting policies for like transactions and other events in similar circumstances. If a member of the group uses accounting policies other than those adopted in the CFS for like transactions and events in similar circumstances, appropriate adjustments are made to that group member's financial statements in preparing the CFS to ensure conformity with the group's accounting policies.

The financial statements of all entities used for the purpose of consolidation are drawn up to same reporting date as that of the parent company, i.e., year ended on March 31. When end of the reporting period of the parent is different from that of a subsidiary, the subsidiary prepares, for consolidation purposes, additional financial information as of the same date as the financial statements of the parent to enable the parent to consolidate the financial information of the subsidiary, unless it is impracticable to do so.

- (i) Combine like items of assets, liabilities, equity, income, expenses and cash flows of the parent with those of its subsidiaries. For this purpose, income and expenses of the subsidiary are based on the amounts of the assets and liabilities recognised in the CFS at the acquisition date.
- (ii) Offset (eliminate) the carrying amount of the parent's investment in each subsidiary and the parent's portion of equity of each subsidiary.
- (iii) Eliminate in full intragroup assets and liabilities, equity, income, expenses and cash flows relating to transactions between entities of the group (profits or losses resulting from intragroup transactions that are recognised in assets, such as inventory and fixed assets, are eliminated in full). Intragroup losses may indicate an impairment that requires recognition in the CFS. Ind AS 12 'Income Taxes' applies to temporary differences that arise from the elimination of profits and losses resulting from intragroup transactions.

- (iv) Profit or loss and each component of 'Other Comprehensive Income' (OCI) are attributed to the equity holders of the parent of the Group and to the non-controlling interests, even if, this results in the non-controlling interests having a deficit balance. When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with the Group's accounting policies. All intra-group assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Group are eliminated in full on consolidation.
- (v) The Company consolidates the entities which it owns or controls. The CFS of the Company, its controlled subsidiaries are disclosed in Note No. 34. Control exists when the parent has power over the entity, is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Power is demonstrated through existing rights that give the ability to direct relevant activities, those which significantly affect the investee's returns. Subsidiaries are consolidated from the date control commences until the date control ceases.
- (vi) The financial statements of the Group companies are consolidated on a line-by-line basis and intra-group balances and transaction including unrealized gain/ loss from such transaction are eliminated upon consolidation. These financial statements are prepared by applying uniform accounting policies in use at the Group. Non-controlling interests which represent part of the net profit or loss and net asset of subsidiaries that are not, directly or indirectly, owned or controlled by the company, are excluded.
- (vii) Associates are entities over which the Group has significant influence but not control. Investment in associates are accounted for using the equity method of accounting. The investment is initially recognized at cost, and the carrying amount is increased or decreased to recognize the investor's share of profit or loss of the investee after the acquisition date. The Group's investment in associates includes goodwill identified on acquisition.

(c) Use of estimates

The preparation of the CFS in conformity with Ind AS requires management to make estimates, judgments and assumptions. These estimates, judgments and assumptions affect the application of accounting policies and the reported amounts of assets and liabilities, the disclosures of contingent assets and liabilities at the date of the CFS and reported amounts of revenues and expenses during the period. Application of accounting policies that require critical accounting estimates involving complex and subjective judgments and the use of assumptions in these CFS have been disclosed in Note 'D'. Accounting estimates could change from period to period. Actual results could differ from those estimates. Appropriate changes in estimates are made as management becomes aware of changes in circumstances surrounding the estimates. Changes in estimates are reflected in the CFS in the period in which changes are made and, if material, their effects are disclosed in the notes to the CFS.

Estimation of uncertainties relating to pandemic from COVID-19

The Group has considered the possible effects that may result from the pandemic relating to COVID-19 in the preparation of these consolidated financial statements including the recoverability of carrying amounts of financial and non financial assets. In developing the assumptions relating to the possible future uncertainties in the global economic conditions because of this pandemic, the group has, at the date of approval of these financial statements, used internal and external sources of information including credit reports and related information and economic forecasts and expects that the carrying amount of these assets will be recovered. The impact of COVID-19 on the Group's financial statements may differ from that estimated as at the date of approval of these consolidated financial statements.

d) Critical accounting estimates

(i) Revenue recognition

The Group's contracts with customers include promises to transfer multiple products and services to a customer. Revenues from customer contracts are considered for recognition and measurement when the contract has been approved, in writing, by the parties to the contract, the parties to contract are committed to perform their respective obligations under the contract, and the contract is legally enforceable. The Group assesses the services promised in a contract and identifies distinct performance obligations in the contract. Identification of distinct performance obligations to determine the deliverables and the ability of the customer to benefit independently from such deliverables, and allocation of transaction price to these distinct performance obligations involves significant judgement.

The Group uses the percentage-of-completion method in accounting for other fixed-price contracts. Use of the percentage-of-completion method requires the Group to determine the actual efforts or costs expended to date as a proportion of the estimated expended have been used to measure progress towards completion total efforts or costs to be incurred. Efforts or costs as there is a direct relationship between input and productivity. The estimation of total efforts or costs involves significant judgement and is assessed throughout the period of the contract to reflect any changes based on the latest available information.

(ii) Allowance for credit losses on receivables and unbilled revenue

The Group determines the allowance for credit losses based on historical loss experience adjusted to reflect current and estimated future economic conditions. The Group considered current and anticipated future economic conditions relating to industries the Group deals with. In calculating expected credit loss, the Group has also considered credit reports and other related credit information for its customers to estimate the probability of default in future and has taken into account estimates of possible effect from the pandemic relating to COVID-19.

e) Property plant and equipment

Property, plant and equipment are stated at their cost of acquisition/construction, net of accumulated depreciation and impairment losses, if any. Costs directly attributable to acquisition are capitalized until the property, plant and equipment are ready for use, as intended by management.

Capital work-in-progress represents expenditure incurred in respect of capital projects which are carried at cost. Cost includes land, related acquisition expenses, development and construction costs, borrowing costs and other direct expenditure.

Advances paid towards acquisition of property, plant and equipment outstanding at each Balance Sheet date are disclosed as Capital Advances under 'Other Non-Current Assets' and cost of fixed assets not yet ready for their intended use as at the reporting date are disclosed under 'Capital Work in Progress'. Subsequent expenditures relating to property, plant and equipment is capitalized only when it is probable that future economic benefits associated with these will flow to the Group and the cost of the item can be measured reliably. Repairs and maintenance costs are recognized in the Statement of Profit and Loss when incurred. The cost and related accumulated depreciation are eliminated from the financial statements upon sale or retirement of the asset and the resultant gains or losses are recognized in the Statement of Profit and Loss. Assets to be disposed off are reported at the lower of the carrying value or the fair value less cost to sell.

Depreciation on fixed assets is charged in accordance with estimate of useful life of the assets on written down value method, at rates specified in Schedule II of the Act. Depreciation on assets purchased/sold during a period is proportionately charged.

Depreciation methods, useful lives and residual values are reviewed periodically, including at each financial year end.

f) Investment properties

Property that is held for long-term rental yields or for capital appreciation or both, and that is not occupied by the Company, is classified as investment property. Investment property is measured initially at its cost, including related transaction costs. Subsequent to initial recognition, investment properties are stated at cost less accumulated depreciation and accumulated impairment loss, if any. Subsequent expenditure is capitalised to the asset's carrying amount only when it is probable that future economic benefits associated with the expenditure will flow to the Company and the cost of the item can be measured reliably.

The Group discloses the fair value of investment properties in notes to the consolidated financial statements. Fair values are determined based on annual evaluation performed by the management.

Investment properties are derecognized either when they have been disposed off or when they have been permanently withdrawn from use and no future economic benefit is expected from their disposal. The difference between net disposal proceeds and the carrying amount of the asset is recognised in the Statement of Profit and Loss in the period of derecognition.

g) Financial instruments

(i) Initial recognition

The Group recognizes financial assets and financial liabilities when it becomes a party to the contractual provisions of the instrument. All financial assets and liabilities are recognized at fair value on initial recognition, except for trade receivables which are initially measured at transaction price. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities, that are not at fair value through profit or loss, are added to the fair value on initial recognition. Regular way purchase and sale of financial assets are accounted for at trade date.

(ii) Subsequent measurement

Financial assets carried at amortised cost

A financial asset is subsequently measured at amortised cost if it is held within a business model whose objective is to hold the asset in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Investments in equity instruments of subsidiaries, joint ventures and associates

Investments in subsidiaries, are stated at cost less provision for impairment losses, if any. Investments are tested for impairment whenever an event or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the carrying amount of investments exceeds its recoverable amount. If, in a subsequent period, recoverable amount equals or exceeds the carrying amount, the impairment loss recognised is reversed accordingly.

Investments in equity instruments of subsidiaries, joint ventures and associates are accounted for at cost in accordance with Ind AS-27 'Separate Financial Instruments'.

(iii) Financial liabilities

Financial liabilities are subsequently carried at amortized cost using the effective interest method, except for contingent consideration recognized in a business combination which is subsequently measured at fair value through profit or loss. For trade and other payables maturing within one year from the Balance Sheet date, the carrying amounts approximate fair value due to the short maturity of these instruments.

(iv) Derecognition of financial instruments

The Group derecognizes a financial asset when the contractual rights to the cash flows from the financial asset expire or it transfers the financial asset and the transfer qualifies for derecognition in accordance with Ind AS 109 'Financial Instruments' issued by the Ministry of Corporate Affairs, Government of India. A financial liability (or a part of a financial liability) is derecognized from the Company's Balance Sheet when the obligation specified in the contract is discharged or cancelled or expires.

b) Impairment**(i) Financial assets**

The Group recognizes loss allowances using the expected credit loss (ECL) model for the financial assets which are not fair valued through profit or loss. Loss allowance for trade receivables with no significant financing component is measured at an amount equal to lifetime ECL. For all other financial assets, expected credit losses are measured at an amount equal to the 12-month ECL, unless there has been a significant increase in credit risk from initial recognition in which case those are measured at lifetime ECL. The amount of expected credit losses (or reversal) that is required to adjust the loss allowance at the reporting date to the amount that is required to be recognised is recognized as an impairment gain or loss in profit or loss.

(ii) Non-financial assets

Property, plant and equipment are evaluated for recoverability whenever events or changes in circumstances indicate that their carrying amounts may not be recoverable. For the purpose of impairment testing, the recoverable amount (i.e. the higher of the fair value less cost to sell and the value-in-use) is determined on an individual asset basis unless the asset does not generate cash flows that are largely independent of those from other assets. In such cases, the recoverable amount is determined for the cash generating unit (CGU) to which the asset belongs.

If such assets are considered to be impaired, the impairment to be recognized in the Statement of Profit and Loss is measured by the amount by which the carrying value of the assets exceeds the estimated recoverable amount of the asset. An impairment loss is reversed in the Statement of Profit and Loss, if there has been a change in the estimates used to determine the recoverable amount. The carrying amount of the asset is increased to its revised recoverable amount, provided that this amount does not exceed the carrying amount that would have been determined (net of any accumulated amortization or depreciation) had no impairment loss been recognized for the asset in prior years.

i) Provisions and contingent liabilities**Provisions**

A provision is recognized if, as a result of a past event, the Company has a present legal or constructive obligation that is reasonably estimable, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.

Contingent liabilities

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company or a present obligation that is not recognised because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognised because it cannot be measured reliably. The Company does not recognise a contingent liability but discloses its existence in the financial statements. Contingent assets are neither recognised nor disclosed in the financial statements.

j) Inventories

Real Estate: Lower of cost or net market value; Cost includes cost of acquisition and other related expenses incurred in bringing the inventories to their present location and condition. Net market value is the estimated selling price in the ordinary course of business.

Constructed/Under Construction Properties: Lower of cost or net realisable value. Cost includes the cost of land, internal development cost, external development charges, construction costs, overheads, borrowing costs and development/ construction material.

Development Rights: At cost of acquisition, including cost of acquiring rights of any interested party. Development rights are considered to have been acquired on execution of a Development Agreement upon vesting of irrevocable rights in the Company to construct, market, and sell the development over land and realize and retain the economic and other benefits.

k) Unbilled receivables

Unbilled receivables represent revenue recognized based on Percentage of Completion of Construction Method (Para (l) below), to the extent the work completed exceeds billed receivables.

l) Revenue recognition**(i) Revenue from contracts from customers**

Pursuant to the application of Ind AS-115, the Company has applied following accounting policy for revenue recognition:

The Company satisfies a performance obligation and recognises revenue over time, if one of the following criteria is met:

- (a) The customer simultaneously receives and consumes the benefits provided by the Company's performance as the entity performs; or
- (b) The Company's performance creates or enhances an asset that the customer controls as the asset is created or enhanced; or
- (c) The Company's performance does not create an asset with an alternative use to the Company and the entity has an enforceable right to payment for performance completed to date.

For performance obligations, where one of the above conditions are not met, revenue is recognised at the point in time at which the performance obligation is satisfied.

Revenue is recognised either at point of time and over a period to time based on various conditions included in the contracts with customers.

(ii) Others

- (a) Revenues from sale of investment properties and assets to the extent of sale consideration reduced by the respective costs thereof in each case, being value inclusive of cost of acquisition, and construction and development cost thereof.
- (b) Forfeiture due to non fulfilment of obligations by counter parties is accounted as Revenue on unconditional appropriation.
- (c) Revenues from rentals are recognised on accrual basis in accordance with terms of agreements executed with respective tenants.
- (d) Service receipts and interest from customers is accounted for on accrual basis.
- (e) Divided income is recognised when the shareholder or unit holder's right to receive payment is established, which is generally when shareholder approve the dividend.
- (f) Share of profit/loss from firm in which the Company is a partner is accounted for in the financial year ending on the date of the Balance Sheet.
- (g) Interest income is recognized using effective interest method.
- (h) Interest on arrears of allotment money is accounted in the year of receipt.

(iii) Revenue from fixed-price, fixed-time frame contracts, where the performance obligations are satisfied over time and where there is no uncertainty as to measurement or collectability of consideration, is recognized as per the percentage-of-completion method. When there is uncertainty as to measurement or ultimate collectability, revenue recognition is postponed until such uncertainty is resolved. Efforts or costs expended have been used to measure progress towards completion as there is a direct relationship between input and productivity. Maintenance revenue is recognized ratably over the term of the underlying maintenance arrangement.

m) Claims

Claims lodged by and lodged against the Company are accounted in the year of payment or settlement thereof.

n) Borrowing costs

Borrowing costs directly attributable to the acquisition and/or construction/production of qualifying assets which are assets that necessarily take a substantial period of time to get ready for their intended use, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use. All other borrowing costs are charged to Statement of Profit and Loss as incurred. Borrowing consist of interest and other costs that the Company incurs in connection with the borrowings of funds.

o) Employee benefits

Benefits such as salaries, wages and short term compensations etc. and the expected cost of ex-gratia is recognized in the period in which the employee renders the related service.

The Company's Gratuity and Leave encashment schemes are defined benefit plans. The Company provides for gratuity covering eligible employees on the basis of actuarial valuation as carried out by an independent actuary using the Projected Unit Credit method, which recognizes each period of service as giving rise to additional unit of employee benefit entitlement and measures each unit separately to build up the final obligation. The obligation is measured at the present value of the estimated future cash flows. The discount rates used for determining the present value of obligation under defined benefit plans is based on the market yields on Government securities as at the Balance Sheet date.

The liability is un-funded. Actuarial gains and losses arising through re-measurement of net defined benefit liability/(assets) are recognised in 'Other Comprehensive Income'.

Leave encashment benefits payable to employees of the Company with respect to accumulated leave outstanding at the year end are accounted for on the basis of an actuarial valuation as at the Balance Sheet date.

Contributions payable by the Company to the concerned government authorities in respect of provident fund, family pension fund and employees state insurance are defined contribution plans. The contributions are recognized as an expense in the Statement of Profit and Loss during the period in which the employee renders the related service. The Company does not have any further obligation in this respect, beyond such contribution. Other employee benefits are accounted for on accrual basis.

p) Foreign currency translation

On initial recognition, all foreign currency transactions are translated in to the functional currency using the exchange rates prevailing on the date of the transaction. As at the reporting date, foreign currency monetary assets and liabilities are translated at the exchange rate prevailing on the Balance Sheet date and the exchange gains or losses are recognised in the Consolidated Statement of Profit and Loss.

q) Cash and cash equivalents

Cash and cash equivalents comprise cash at bank, cash in hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value. Short-term deposits are made for varying periods of between one day and three months, depending on the immediate cash requirements of the Company, and earn interest at the respective short-term deposit rates.

r) Cash flow statement

Cash flows are reported using the indirect method, whereby profit for the period is adjusted for the effects of transactions of a non-cash nature, any deferrals or accruals of past or future operating cash receipts or payments and item of income or expenses associated with investing or financing cash flows. The cash flows from operating, investing and financing activities of the Company are segregated. The Company considers all highly liquid investments that are readily convertible to known amounts of cash to be cash equivalents.

s) Dividends

Dividend on equity shares are recorded as a liability on the date of approval by the shareholders and interim dividends are recorded as a liability on the date of declaration by the Company's Board of Directors.

t) Income taxes

Income tax expense comprises current and deferred income tax. Income tax expense is recognized in the Statement of Profit and Loss except to the extent that it relates to items recognized directly in equity, in which case it is recognized in 'Other Comprehensive Income'. Current income tax for current and prior periods is recognized at the amount expected to be paid to or recovered from the tax authorities, using the tax rates and tax laws that have been enacted or substantively enacted by the balance sheet date. Deferred income tax assets and liabilities are recognized for all temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

Deferred tax is recorded on temporary differences between the tax bases of assets and liabilities and their carrying amounts, at the rates that have been enacted or substantively enacted at the reporting date. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable profits during the periods in which those temporary differences and tax loss carry-forwards become deductible. The Company considers expected reversal of deferred tax liabilities and projected future taxable income in making this assessment. The amount of deferred tax assets considered realisable, however, could reduce in the near term if estimates of future taxable income during the carry-forward period are reduced.

u) Earnings per equity share

Basic earnings per equity share is computed by dividing the net profit attributable to the equity holders of the Group by the weighted average number of equity shares outstanding during the period. Diluted earnings per equity share is computed by dividing the net profit attributable to the equity holders of the Group by the weighted average number of equity shares considered for deriving basic earnings per equity share and also the weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares. The dilutive potential equity shares are adjusted for the proceeds receivable had the equity shares been actually issued at fair value (i.e. the average market value of the outstanding equity shares). Dilutive potential equity shares are deemed converted as of the beginning of the period, unless issued at a later date. Dilutive potential equity shares are determined independently for each period presented.

The number of equity shares and potentially dilutive equity shares are adjusted retrospectively for all periods presented for any share splits and bonus shares issues including for changes effected prior to the approval of the financial statements by the Board of Directors.

v) Leases

The Group evaluates if an arrangement qualifies to be a lease as per the requirements of Ind AS 116. Identification of a lease requires significant judgment. The Group uses significant judgement in assessing the lease term (including anticipated renewals) and the applicable discount rate. The Group determines the lease term as the non-cancellable period of a lease, together with both periods covered by an option to extend the lease if the Company is reasonably certain to exercise that option; and periods covered by an option to terminate the lease if the Company is reasonably certain not to exercise that option. In assessing whether the Company is reasonably certain to exercise an option to extend a lease, or not to exercise an option to terminate a lease, it considers all relevant facts and circumstances that create an economic incentive for the Company to exercise the option to extend the lease, or not to exercise the option to terminate the lease. The Group revises the lease term if there is a change in the non-cancellable period of a lease. The discount rate is generally based on the incremental borrowing rate specific to the lease being evaluated or for a portfolio of leases with similar characteristics.

w) Segment reporting

Operating segments are reported in the manner consistent with the internal reporting provided to the chief operating decision maker (CODM). The Managing Director of the Company has been identified as CODM and he is responsible for allocating the resources, assess the financial performance and position of the Company and makes strategic decisions.

The Company has identified one reportable segment "Real Estate" based on the information reviewed by the CODM. Refer Note no. 43 for the Segment information presented.

x) Current versus non-current classification

The Company presents assets and liabilities in the balance sheet based on current/ non-current classification. An asset is treated as current when it is:

- Expected to be realised or intended to be sold or consumed in normal operating cycle;
- Held primarily for the purpose of trading;
- Expected to be realised within twelve months after the reporting period; or
- Cash or cash equivalents unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

A liability is current when:

- It is expected to be settled in normal operating cycle;
- It is held primarily for the purpose of trading;
- It is due to be settled within twelve months after the reporting period; or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

The Company classifies all other liabilities as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

In order to achieve this overall objective, the Company's capital management, amongst other things, aims to ensure that it meets financial covenants attached to the interest-bearing loans and borrowings that define capital structure requirements. Breaches in meeting the financial covenants would permit the bank to immediately call loans and borrowings. There have been no breaches in the financial covenants of any interest-bearing loans and borrowing in the current period.

45 Fair value measurements

The Company uses the following hierarchy for determining and/or disclosing the fair value of financial instruments by valuation techniques:

The following is the basis of categorising the financial instruments measured at fair value into Level 1 to Level 3:

- Level 1: This level includes financial assets that are measured by reference to quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2: This level includes financial assets and liabilities, measured using inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices).
- Level 3: This level includes financial assets and liabilities measured using inputs that are not based on observable market data (unobservable inputs).

Fair values are determined in whole or in part, using a valuation model based on assumptions that are neither supported by prices from observable current market transactions in the same instrument nor are they based on available market data.

Trade receivables, cash and cash equivalents, other bank balances, loans, other current financial assets, trade payables and other current financial liabilities: Approximate their carrying amounts largely due to short-term maturities of these instruments.

Management uses its best judgment in estimating the fair value of its financial instruments. However, there are inherent limitations in any estimation technique. Therefore, for substantially all financial instruments, the fair value estimates presented above are not necessarily indicative of all the amounts that the Company could have realized or paid in sale transactions as of respective dates. As such, the fair value of the financial instruments subsequent to the respective reporting dates may be different from the amounts reported at each year end.

46 Financial risk management objectives

The Company's principal financial liabilities comprise loans and borrowings, trade and other payables. The main purpose of these financial liabilities is to finance and support Company's operations. The Company's principal financial assets include inventory, trade and other receivables, cash and cash equivalents and land advances that derive directly from its operations.

The Company is exposed to market risk, credit risk and liquidity risk. The Company's senior management oversees the management of these risks. The Company's senior management provides assurance that the Company's financial risk activities are governed by appropriate policies and procedures and that financial risks are identified, measured and managed in accordance with the Company's policies and risk objectives. The Board of Directors reviews and agrees policies for managing each of these risks, which are summarised below:

(a) Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices.

Market risk comprises two types of risk: interest rate risk and other price risk, such as equity price risk and commodity/ real-estate risk.

Financial instruments affected by market risk include loans and borrowings.

(b) Credit risk

Credit risk is the risk that counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The Company is exposed to credit risk from its operating activities (primarily trade receivables) and from its financing activities, including refundable joint development deposits, security deposits, loans to employees and other financial instruments. To manage this, the Company periodically assesses financial reliability of customers and other counter parties, taking into account the financial condition, current economic trends, and analysis of historical bad debts and ageing of financial assets.

Trade receivables

(i) Receivables resulting from sale of properties: Customer credit risk is managed by requiring customers to pay advances before transfer of ownership, therefore, substantially eliminating the Company's credit risk in this respect.

(ii) Receivables resulting from other than sale of properties: Credit risk is managed by each business unit subject to the Company's established policy, procedures and control relating to customer credit risk management. Outstanding customer receivables are regularly monitored. The impairment analysis is performed at each reporting date on an individual basis for major clients. In addition, a large number of minor receivables are grouped into homogeneous groups and assessed for impairment collectively.

(c) Financial Instrument and cash deposits

Prudent liquidity risk management implies maintaining sufficient cash and marketable securities and the availability of funding through an adequate amount of committed credit facilities to meet obligations when due and to close out market positions. Due to the dynamic nature of the underlying businesses, the Company's treasury maintains flexibility in funding by maintaining availability under committed credit lines. The management monitors rolling forecasts of the Company's liquidity position and cash and cash equivalents on the basis of expected cash flows.

- 47 The Indian Parliament has approved the Code on Social Security, 2020 which would impact the contributions by the company towards Provident Fund and Gratuity. The Ministry of Labour and Employment has released draft rules for the Code on Social Security, 2020 on November 13, 2020, and has invited suggestions from stake holders which are under active consideration by the Ministry. The Company and its Indian subsidiaries will assess the impact and its evaluation once the subject rules are notified and will give appropriate impact in its financial statements in the period in which, the Code becomes effective and the related rules to determine the financial impact are published.
